

COURSE OUTLINE: AMF102 - SOLID MODELLING I

Prepared: Donovan Kennedy

Approved: Corey Meunier, Chair	, Technology and Skilled Trades
--------------------------------	---------------------------------

	AMF102: SOLID MODELLING I				
Program Number: Name	4069: AUTOMATED MANUFACT.				
Department:	ROBOTICS GRADUATE CERTIFICATE				
Academic Year:	2022-2023				
Course Description:	Solid Modelling I focuses on the transition from 2D to 3D design and 3D software used in manufacturing product applications. The student will be introduced to mechanical 3d design software used to build parametric models of parts and assemblies, and how to make drawings of those parts and assemblies.				
Total Credits:	3				
Hours/Week:	3				
Total Hours:	42				
Prerequisites:	There are no pre-requisites for this course.				
Corequisites:	There are no co-requisites for this course.				
This course is a pre-requisite for:	AMF202, AMF205				
Vocational Learning	4069 - AUTOMATED MANUFACT.				
Outcomes (V/I O's)	4003 - A				
Outcomes (VLO's) addressed in this course:	VLO 2	Analyze and synthesize technical data to develop graphics and related technical documents conforming to engineering standards.			
Outcomes (VLO's) addressed in this course: Please refer to program web page for a complete listing of program	VLO 2 VLO 3	Analyze and synthesize technical data to develop graphics and related technical documents conforming to engineering standards. Select and manage appropriate hardware and software for the creation of engineering designs.			
Outcomes (VLO's) addressed in this course: Please refer to program web page for a complete listing of program outcomes where applicable.	VLO 2 VLO 3 VLO 7	Analyze and synthesize technical data to develop graphics and related technical documents conforming to engineering standards. Select and manage appropriate hardware and software for the creation of engineering designs. Exercise professionalism, leadership, and effective communication in an industrial work setting to increase overall productivity and support a positive work environment.			
Outcomes (VLO's) addressed in this course: Please refer to program web page for a complete listing of program outcomes where applicable. Essential Employability Skills (EES) addressed in	VLO 2 VLO 3 VLO 7 EES 1	Analyze and synthesize technical data to develop graphics and related technical documents conforming to engineering standards. Select and manage appropriate hardware and software for the creation of engineering designs. Exercise professionalism, leadership, and effective communication in an industrial work setting to increase overall productivity and support a positive work environment. Communicate clearly, concisely and correctly in the written, spoken, and visual form that fulfills the purpose and meets the needs of the audience.			
Outcomes (VLO's) addressed in this course: Please refer to program web page for a complete listing of program outcomes where applicable. Essential Employability Skills (EES) addressed in this course:	VLO 2 VLO 3 VLO 7 EES 1 EES 2	Analyze and synthesize technical data to develop graphics and related technical documents conforming to engineering standards. Select and manage appropriate hardware and software for the creation of engineering designs. Exercise professionalism, leadership, and effective communication in an industrial work setting to increase overall productivity and support a positive work environment. Communicate clearly, concisely and correctly in the written, spoken, and visual form that fulfills the purpose and meets the needs of the audience. Respond to written, spoken, or visual messages in a manner that ensures effective communication.			
Outcomes (VLO's) addressed in this course: Please refer to program web page for a complete listing of program outcomes where applicable. Essential Employability Skills (EES) addressed in this course:	VLO 2 VLO 3 VLO 7 EES 1 EES 2 EES 4	Analyze and synthesize technical data to develop graphics and related technical documents conforming to engineering standards. Select and manage appropriate hardware and software for the creation of engineering designs. Exercise professionalism, leadership, and effective communication in an industrial work setting to increase overall productivity and support a positive work environment. Communicate clearly, concisely and correctly in the written, spoken, and visual form that fulfills the purpose and meets the needs of the audience. Respond to written, spoken, or visual messages in a manner that ensures effective communication. Apply a systematic approach to solve problems.			
Outcomes (VLO's) addressed in this course: Please refer to program web page for a complete listing of program outcomes where applicable. Essential Employability Skills (EES) addressed in this course:	VLO 2 VLO 3 VLO 7 EES 1 EES 2 EES 4 EES 5	Analyze and synthesize technical data to develop graphics and related technical documents conforming to engineering standards. Select and manage appropriate hardware and software for the creation of engineering designs. Exercise professionalism, leadership, and effective communication in an industrial work setting to increase overall productivity and support a positive work environment. Communicate clearly, concisely and correctly in the written, spoken, and visual form that fulfills the purpose and meets the needs of the audience. Respond to written, spoken, or visual messages in a manner that ensures effective communication. Apply a systematic approach to solve problems. Use a variety of thinking skills to anticipate and solve problems.			
Outcomes (VLO's) addressed in this course: Please refer to program web page for a complete listing of program outcomes where applicable. Essential Employability Skills (EES) addressed in this course:	VLO 2 VLO 3 VLO 7 EES 1 EES 2 EES 4 EES 5 EES 6	Analyze and synthesize technical data to develop graphics and related technical documents conforming to engineering standards. Select and manage appropriate hardware and software for the creation of engineering designs. Exercise professionalism, leadership, and effective communication in an industrial work setting to increase overall productivity and support a positive work environment. Communicate clearly, concisely and correctly in the written, spoken, and visual form that fulfills the purpose and meets the needs of the audience. Respond to written, spoken, or visual messages in a manner that ensures effective communication. Apply a systematic approach to solve problems. Use a variety of thinking skills to anticipate and solve problems. Locate, select, organize, and document information using appropriate technology and information systems.

Select and manage appropriate hardware and software for the creation of engineering designs. Exercise professionalism, leadership, and effective communication in an industrial work setting to increase overall productivity and support a positive work environment. Communicate clearly, concisely and correctly in the written, spoken, and visual form that fulfills the purpose and meets the needs of the audience. Respond to written, spoken, or visual messages in a manner that ensures effective communication. Apply a systematic approach to solve problems. Use a variety of thinking skills to anticipate and solve problems. Locate, select, organize, and document information using appropriate technology and information systems. Analyze, evaluate, and apply relevant information from a variety of sources.			
Outcomes (VLO's) addressed in this course: Please refer to program web page for a complete listing of program outcomes where applicable. Essential Employability Skills (EES) addressed in this course:	VLO 2 VLO 3 VLO 7 EES 1 EES 2 EES 4 EES 5 EES 6 EES 7 EES 9	Analyze and synthesize technical data to develop graphics and related technical documents conforming to engineering standards. Select and manage appropriate hardware and software for the creation of engineering designs. Exercise professionalism, leadership, and effective communication in an industrial work setting to increase overall productivity and support a positive work environment. Communicate clearly, concisely and correctly in the written, spoken, and visual form that fulfills the purpose and meets the needs of the audience. Respond to written, spoken, or visual messages in a manner that ensures effective communication. Apply a systematic approach to solve problems. Use a variety of thinking skills to anticipate and solve problems. Locate, select, organize, and document information using appropriate technology and information systems. Analyze, evaluate, and apply relevant information from a variety of sources. Interact with others in groups or teams that contribute to effective working relationships and the achievement of goals.			

	EES 11 Take responsibility for ones own actions, decisions, and consequences.				
Course Evaluation:	Passing Grade: 50%, D				
	A minimum program GPA of 2.0 or higher where program specific standards exist is required for graduation.				
Other Course Evaluation & Assessment Requirements:	Grade Definition Grade Point Equivalent A+ 90 - 100% 4.00 A 80 - 89% B 70 - 79% 3.00 C 60 - 69% 2.00				
	F (Fail)49% and below 0.00 CR (Credit) Credit for diploma requirements has been awarded. S Satisfactory achievement in field /clinical placement or non-graded subject area. U Unsatisfactory achievement in field/clinical placement or non-graded subject area. X A temporary grade limited to situations with extenuating circumstances giving a student additional time to complete the requirements for a course. NR Grade not reported to Registrar's office. W Student has withdrawn from the course without academic penalty.				
	Smart watches, smart phones and similar devices are not allowed during tests or quizzes and must be removed.				
	A student who attends less than 80% (12) classes will receive a zero (0) for their attendance grade.				
	Sault College is committed to student success. There is a direct correlation between academic performance and class attendance, therefore, for the benefit of all its constituents, all students are encouraged to attend all of their scheduled learning and evaluation sessions. This implies arriving on time and remaining for the duration of the scheduled session.				
	It is the departmental policy that once the classroom door has been closed, the learning process has begun. Late arrivers will not be granted admission to the room.				
Course Outcomes and Learning Objectives:	Course Outcome 1	Learning Objectives for Course Outcome 1			
	1. Two Dimensional Sketching	1.1 Establish Sketch Planes1.2 2D Constraints1.3 Parametric Dimensions			
	Course Outcome 2	Learning Objectives for Course Outcome 2			
	2. Revolved and Extruded Features	2.1 Extrude Solid Parts From Sketches2.2 Revolve Solid Parts from Sketches2.3 Cut-outs from Parts using Extrusions2.4 Revolved Cuts from Parts using Revolutions2.5 Establishing Planes for Features			
	Course Outcome 3	Learning Objectives for Course Outcome 3			
	3. Holes and Patterns	3.1 How to Use Hole and Thread Features3.2 How to use Patterns to Create Multiple Features			

SAULT COLLEGE | 443 NORTHERN AVENUE | SAULT STE. MARIE, ON P6B 4J3, CANADA | 705-759-2554

	Course Outcome 4 4. Assemblies Course Outcome 5 5. Drawings from 3D Models and Assemblies Course Outcome 6 6. Solid Modelling for Automated Manufacturing		Learning Objectives for Course Outcome 4		
			4.1 Create Assemblies4.2 Understand Assembly Constraints4.3 Bottom-up design4.4 Top-down design		
			Learning Objectives for Course Outcome 5		
			5.1 Drawings from 3D Models and Assemblies5.2 Placement of Dimensions5.3 BOM tables and automatic population		
			Learning Objectives for Course Outcome 6		
			6.1 Mass Property Analysis6.2 Check Interference6.3 Editing and Modifying Parts and Assemblies		
Evaluation Process and	Evaluation Type	Evaluation	Weight		
Grading System:	Assignments	70%	Treight		
	Attendance	10%			
	Final Exam	20%			
Date:	June 1, 2022	,			
Addendum:	Please refer to the information.	course out	ine adder	dum on the Learning Management System for further
