

COURSE OUTLINE: AVT366 - AIRCRAFT SYSTEMS

Prepared: Ryan London

Approved: Greg Farish, Chair, Aviation Technology - Flight

Course Code: Title	AVT366: AIRCRAFT SYSTEMS PREPARATION FOR FLIGHT
Program Number: Name	
Department:	AVIATION TECHNOLOGY
Academic Year:	2022-2023
Course Description:	A study of electrical hydraulic, fuel, oil, oxygen, and fire fighting systems in the aircraft used for multi-engine training as well as in a modern, turbine, pressurized transport aircraft.
Total Credits:	2
Hours/Week:	4
Total Hours:	56
Prerequisites:	AFT13, AVT252, AVT253, AVT257, AVT259
Corequisites:	There are no co-requisites for this course.
This course is a pre-requisite for:	AFT370, AVT370, AVT375, AVT377, AVT378
Essential Employability Skills (EES) addressed in this course:	<p>EES 1 Communicate clearly, concisely and correctly in the written, spoken, and visual form that fulfills the purpose and meets the needs of the audience.</p> <p>EES 2 Respond to written, spoken, or visual messages in a manner that ensures effective communication.</p> <p>EES 4 Apply a systematic approach to solve problems.</p> <p>EES 5 Use a variety of thinking skills to anticipate and solve problems.</p> <p>EES 6 Locate, select, organize, and document information using appropriate technology and information systems.</p> <p>EES 7 Analyze, evaluate, and apply relevant information from a variety of sources.</p> <p>EES 8 Show respect for the diverse opinions, values, belief systems, and contributions of others.</p> <p>EES 9 Interact with others in groups or teams that contribute to effective working relationships and the achievement of goals.</p> <p>EES 10 Manage the use of time and other resources to complete projects.</p> <p>EES 11 Take responsibility for ones own actions, decisions, and consequences.</p>
Course Evaluation:	<p>Passing Grade: 70%, B</p> <p>A minimum program GPA of 2.0 or higher where program specific standards exist is required for graduation.</p>
Other Course Evaluation & Assessment Requirements:	The student will be assessed by a combination of attendance and deportment, quizzes, tests and a final exam. Weighting of each will be as follows: 30% for quizzes, 40% for the PA44

exam 30% for the presentation/ project. A minimum mark of 70% (B) overall, as well as a minimum of 70% on the PA44 exam is required to pass the course.

Unexcused absences will result in 2% deduction of the final mark for each occurrence, arriving for class late will result in a 1% deduction of the final mark for each occurrence, and violations of the dress code will result in a 1% deduction of the final mark for each occurrence. Refer to the Sault College Aviation Standard Operating Procedures (SOP's) Section 10 for dress code policies and SOP Section 4 for policy regarding absence from classes.

Quizzes will be given without prior notice.

Students may request a deferment of a test for compassionate reasons. Compassionate grounds for deferment will include but not be limited to: death of an immediate family member, personal illness, or recent diagnosis of a serious illness of a family member. Make-ups will not be permitted after the fact for compassionate reasons.

A classroom code of conduct can be found in the Sault College Student Code of Conduct, on the Sault College Website. This along with the list of Unacceptable Behaviours in the SOP will be adhered to.

Attendance is mandatory for all Aviation classes unless approval is granted in advance. In the case of illness, a phone call, voice mail or e-mail message is expected before class.

If a student expects to be late or will be delayed for any reason, every attempt should be made to contact the professor, or leave a message on voice mail or e-mail.

Although attitude, co-operation, etc., are not graded, students may be terminated based on their performance in this area (see section 5.2 SOP). These attributes are also considered in the selection of the Air Canada Award and other scholarships.

Dates of tests will be announced at least 1 week in advance.

If a faculty member determines that a student is at risk of not being successful in their academic pursuits and has exhausted all strategies available to faculty, student contact information may be confidentially provided to Student Services in an effort to offer even more assistance with options for success. Any student wishing to restrict the sharing of such information should make their wishes known to the coordinator or faculty member.

Books and Required Resources:

1.Piper Seminole (PA44) Information Manual (manual part number 761-873 applicable to aircraft SN 4496001 and up)
Edition: Manual part number 761-873
If purchasing from other than the book store, please ensure that you get the correct SN

2.Sault College Approved Maintenance Schedule PA44
Downloadable from the Internet (Link on LMS)

Course Outcomes and Learning Objectives:

Course Outcome 1	Learning Objectives for Course Outcome 1
Describe the PA44 and its systems with sufficient detail to demonstrate a practical working knowledge.	Have a clear understanding of the terminology, abbreviations and definitions used in the flight manual. Have a clear understanding of the technical description of the aircraft and its systems. Know the operating limitations of the aircraft.

	Course Outcome 2	Learning Objectives for Course Outcome 2
	Apply the Normal and Emergency Procedures applicable to the PA44.	Practical knowledge of all checklist items including the rationale for each item. Memorization of necessary memory items. Ability to satisfactorily determine a procedure to use where there is no checklist procedure. Practical knowledge of good flying practices.
	Course Outcome 3	Learning Objectives for Course Outcome 3
	Accomplish all necessary pre-flight tasks applicable to the PA44.	Perform weight & balance calculations. Calculate performance requirements for take-off, climb, single engine flight, cruise, landing etc. Determine that maintenance requirements have been met and that the aircraft is certified and fit for flight.
	Course Outcome 4	Learning Objectives for Course Outcome 4
	Technically explain an aircraft system	Develop and present an in-depth analysis of an aircraft system Assimilate and compile the appropriate information Deliver the information in a clear and concise manner

Evaluation Process and Grading System:

Evaluation Type	Evaluation Weight
Presentation	30%
Quizzes	30%
Tests	40%

Date:

July 5, 2022

Addendum:

Please refer to the course outline addendum on the Learning Management System for further information.
