

COURSE OUTLINE: NASA203 - SECURING THE EDGE

Prepared: Christopher Barnett Approved: Corey Meunier, Chair, Technology and Skilled Trades

Course Code: Title	NASA203: SECURING THE EDGE & SECURITY ANALYTICS		
Program Number: Name	2196: NETWRK ARCH & SEC AN		
Department:	COMPUTER STUDIES		
Academic Year:	2022-2023		
Course Description:	This course will study theoretical and practical skills required to monitor and secure an organisation. Edge and internal security principles will be studied in order to protect an organisation from both external and internal threats.		
	The course will explore the principles of Network Security Monitoring along with its implementation and configuration. It delivers theoretical and technical knowledge, insight, and hands-on training needed to prepare a network against and monitor a network for intrusion.		
Total Credits:	5		
Hours/Week:	4		
Total Hours:	60		
Prerequisites:	There are no pre-requisites for this course.		
Corequisites:	There are no co-requisites for this course.		
	2196 - NETWRK ARCH & SEC AN VLO 2 Perform network monitoring, analysis and troubleshooting to determine efficient and		
Vocational Learning Outcomes (VLO's) addressed in this course:	2196 - N VLO 2	ETWRK ARCH & SEC AN Perform network monitoring, analysis and troubleshooting to determine efficient and

Course Evaluation:	Passing Grade: 50%, D
	A minimum program GPA of 2.0 or higher where program specific standards exist is required for graduation.
Other Course Evaluation & Assessment Requirements:	Grade Definition Grade Point Equivalent A+ 90 - 100% 4.00 A 80 - 89% 4.00 B 70 - 79% 3.00 C 60 - 69% 2.00 D 50 - 59% 1.00 F(Fail) below 50% 0.00
	CR (Credit) Credit for diploma requirements has been awarded. S Satisfactory achievement in field/clinical placement or non-graded subject area. U Unsatisfactory achievement in field/clinical placement or non-graded subject area. X A temporary grade limited to situations with extenuating circumstances giving a student additional time to complete the requirements for a course. NR Grade not reported to Registrar's office. W Student has withdrawn from the course without academic penalty.
	OTHER EVALUATION CONSIDERATIONS
	1. In order to pass this course the student must obtain an overall test/quiz average of 50% or better, as well as, an overall assignment average of 50% or better. A student who is not present to write a particular test/quiz, and does not notify the professor beforehand of their intended absence, may be subject to a zero grade on that test/quiz.
	2. There will be no supplemental or make-up quizzes/tests in this course unless there are extenuating circumstances.
	3. Assignments must be submitted by the due date according to the specifications of the professor. Late assignments will normally be given a mark of zero. Late assignments will only be marked at the discretion of the professor in cases where there were extenuating circumstances.
	 Any assignment/projects submissions, deemed to be copied, will result in a zero grade being assigned to all students involved in that particular incident.
	5. It is the responsibility of the student to ask the professor to clarify any assignment requirements.
	6. The professor reserves the right to modify the assessment process to meet any changing needs of the class.
	Attendance:
	Sault College is committed to student success. There is a direct correlation between academic performance and class attendance, therefore, for the benefit of all its constituents, all students are encouraged to attend all of their scheduled learning and evaluation sessions. This implies

	arriving on time and remaining for the duration of the scheduled session. It is the departmental policy that once the classroom door has been closed, the learning process has begun. Late arrivers may not be granted admission to the room.			
	Absences due to medical or other unavoidable circumstances should be discussed with the professor, otherwise a penalty may be assessed. The penalty depends on course hours and will be applied as follows: Course Hours Deduction 5 hrs/week (75 hrs) 1.0% /hr 4 hrs/week (60 hrs) 1.5% /hr 3 hrs/week (45 hrs) 2.0% /hr 2 hrs/week (30 hrs) 3.0% /hr			
Books and Required Resources:	The Practice of Network Security Monitoring by Richard Bejtlich Publisher: No Starch Press Edition: 4th ISBN: 9781593275099 9781593275341			
Course Outcomes and	Course Outcome 1	Learning Objectives for Course Outcome 1		
Learning Objectives:	Introduction to Network Security Monitoring	 Understand the goal of Network Security Monitoring Understand the concepts of Network Security Monitoring Understand the importance of time Know the seven data types 		
	Course Outcome 2	Learning Objectives for Course Outcome 2		
	Enterprise Security Life Cycle	 Understand the four phases of the ESLC Understand the sub-phases of the Detection and Response phases Know how to apply the ESLC 		
	Course Outcome 3	Learning Objectives for Course Outcome 3		
	Operations & Building a Team	 Understand the Operational Trap Learn how Computer Incident Response Teams are buil Learn about the different components of a CIRT Learn about a Defensible Network Architecture 		
	Course Outcome 4	Learning Objectives for Course Outcome 4		
	Cybersecurity Threats	 Review the attack vectors Learn about the CIA Triad Learn about the Destruction Triad Understand the objectives of malware attacks Understand the delivery mechanisms for malware attack Understand general protection mechanisms that fight malware attacks Learn about a variety of kinds of malware attacks and specific prevention measures that fight those attacks 		
	Course Outcome 5	Learning Objectives for Course Outcome 5		
	Social Engineering	Understand what Social Engineering is		

	 Understand the motivations of a social engineer Discover how social engineers gather information Understand the psychological principles behind social engineering Know what social engineers seek to exploit Understand how to combat social engineering 	
Course Outcome 6	Learning Objectives for Course Outcome 6	
Threat Intelligence	 Understand what Threat Intelligence is Understand the six phases of the Intelligence Cycle Understand how Threat Intelligence relates to Security Operations Understand the benefits of Threat Intelligence Understand the Threat Intelligence frameworks. 	
Course Outcome 7	Learning Objectives for Course Outcome 7	
Physical Security	 Understand the planning that goes into secure facility design Identify key assets that require protection Understand the three kinds of controls Learn how to protect the four kinds of key asset Learn the functional order of security control Learn about the two classifications of physical threat 	
Course Outcome 8	Learning Objectives for Course Outcome 8	
Collecting Network Traffic	 Learn about collecting network traffic via a NSM deployment case Understand where collection mechanisms must be placed Understand network data flow Understand the concept of Network Address Translation Understand the concept of IP Address Assignment Understand the concept of Network Port Address Translation Understand the methods of network traffic collection 	
Course Outcome 9	Learning Objectives for Course Outcome 9	
Deploy Security Onion Network Security Monitoring suite	 Learn about capacity requirements Understand the platform management principles Learn about the two different deployment modes Deploy a Security Onion VM 	
Course Outcome 10	Learning Objectives for Course Outcome 10	
Command Line Packet Analysis	 Learn about the Data Presentation, Delivery, and Collection layers Learn TCPDUMP in an interactive exercise Learn about Dumpcap and Tshark Learn about Argus RA 	
Course Outcome 11	Learning Objectives for Course Outcome 11	
Graphical Packet Analysis	 Configure and learn about WireShark in an interactive exercise Learn about and explore NetworkMiner Participate in a professor-led interactive hunting exercise 	

Course Outcome	12 L	earning	Objectives for Course Outcome 12	
Intrusion Detection Systems and Intrusion Prevention Systems		 Understand what an IDS/IPS is, where it is deployed, and what they can do Understand how an IDS/IPS functions Learn about the four kinds of IDS/IPS Learn about Snort Understand the difference between a signature, vulnerability, and exploit Understand the limitations of IDS 		
Course Outcome 1	13 L	earning	Objectives for Course Outcome 13	
NSM Consoles	d	 Recap Learn emonstra Exploi emonstra 	o the 7 data types about Sguil in an interactive professor-led tion re Squert in an interactive professor-led tion	
Course Outcome 1	14 L	earning	Objectives for Course Outcome 14	
NSM Challenges		LearnLearnLearn	how proxies make NSM more difficult how IP checksums make NSM more difficult how encryption makes NSM more difficult	
Course Outcome 1	15 L	earning	Objectives for Course Outcome 15	
Snort Rule Writing		LearnLearn	the components of a snort rule how to write snort rules	
Course Outcome 1	16 L	earning	Objectives for Course Outcome 16	
Lab Work	a to	 Using nd brute 1 Use to preview F Identif Identif Attribut Write Write 	case studies on topics such as malware infections force attacks students will learn to: bols like WireShark, NetworkMiner, Sguil, and Squert PCAP files fy indicators of compromise fy compromised assets ute compromised assets to users an incident report detailing findings Snort rules to help identify indicators of compromise	
Course Outcome	17 L	earning	Objectives for Course Outcome 17	
Security Awareness Presentations (Grou Assignment)	s up fo p e	 Give a coused or Create Create Create Create Create ducational 	an educational presentation on a cybersecurity topic n enhancing non-technical users understanding e an interactive exercise for the presentation e campaign materials for the cybersecurity topic and on e a plan for the delivery and implementation of the al presentation and materials
