| <b>Course Description:</b>                                    | This course introduces the student to monitoring and communication systems, such as fire alarm systems, nurse call systems and paging systems. Related codes and standards are also covered. Theory is supported by appropriate labs.   |                 |                   |                  |     |                           |     |

**Course Outcomes and Learning Objectives:**

**Course Outcome 1.**

Interpret the Canadian Electrical Code (CEC), National Building Code and ULC requirements pertaining to Fire Alarm Systems.

**Learning Objectives 1.**

- Describe the principles of operation and installation requirements of single stage, two stage, initiation and supervisory circuits.
- Describe the principles of operation and installation requirements for pull stations, detectors, flow switches, bells, speakers, addressable initiating devices and sprinkler supervisory devices.
- Describe the principles of operation and installation requirements of speaker and ancillary relay circuits, annunciators and emergency phones.
- Describe the basic operation of wet and dry sprinkler systems.
- Describe the uses and dangers of fire suppression agents, the components and systems used for their installation in suppression systems.
- List the ULC standard for the installation, inspection, testing and verification of Fire Alarm Systems.
- Use the Canadian Building Code to determine the installation requirements for fire alarm systems and related equipment.
- Demonstrate the installation, troubleshooting and testing of initiation and supervisory circuits and devices including two stage initiator wiring.
- Demonstrate the installation, troubleshooting and testing of speaker and ancillary relay circuits, annunciators.
- Demonstrate the installation, operation and testing of alarm panels with respect to lights and lamps, power supplies, overcurrent devices, ground fault indicators, annunciator panels and common trouble functions.
- Connect intrusion systems and devices.
- Connect the wiring and operation of nurse call systems.

**Date:**

Monday, April 23, 2018

Please refer to the course outline addendum on the Learning Management System for further information.
