

COURSE OUTLINE: ELR623 - CAND.ELECT. CODE - 1

Prepared: Sean Hager

Approved: Corey Meunier, Chair, Technology and Skilled Trades

Course Code: Title	ELR623: CANADIAN ELECTRICAL CODE - LEVEL 1					
Program Number: Name	6520: CONST & MTCE ELE BAS					
Department:	ELEC. APPRENTICES					
Semesters/Terms:	18F, 19W, 19F					
Course Description:	This course introduces the student to the Canadian Electrical Code with a focus on the general sections of the code and residential wiring practices.					
Total Credits:	4					
Hours/Week:	4					
Total Hours:	32					
Prerequisites:	There are no pre-requisites for this course.					
Corequisites:	There are no co-requisites for this course.					
General Education Themes:	Science and Technology					
Course Evaluation:	Passing Grade: 50%, D					
Other Course Evaluation & Assessment Requirements:	<p>Grade Definition Grade Point Equivalent A+ 90 - 100% 4.00 A 80 - 89% B 70 - 79% 3.00 C 60 - 69% 2.00 D 50 - 59% 1.00 F (Fail) 49% and below 0.00</p> <p>CR (Credit) Credit for diploma requirements has been awarded. S Satisfactory achievement in field /clinical placement or non-graded subject area. U Unsatisfactory achievement in field/clinical placement or non-graded subject area. X A temporary grade limited to situations with extenuating circumstances giving a student additional time to complete the requirements for a course. NR Grade not reported to Registrar's office. W Student has withdrawn from the course without academic penalty.</p>					
Books and Required Resources:	Canadian Electrical Code current version Publisher: CSA Group Edition: Current					
Course Outcomes and Learning Objectives:	<table border="1"> <thead> <tr> <th>Course Outcome 1</th> <th>Learning Objectives for Course Outcome 1</th> </tr> </thead> <tbody> <tr> <td>State the purpose of the Canadian Electrical Code and identify which sections apply to a given electrical installation.</td> <td> <ul style="list-style-type: none"> - State the objective, scope, and general arrangement of the Canadian Electrical Code. Course Outcome 1	Learning Objectives for Course Outcome 1					
State the purpose of the Canadian Electrical Code and identify which sections apply to a given electrical installation.	<ul style="list-style-type: none"> - State the objective, scope, and general arrangement of the Canadian Electrical Code. (CEC) - Identify the method used to indicate code regulation changes in new editions of the CEC. Identify installation requirements for electrical equipment (other than heating) installed in residential 					

	<p>occupancies as specified in the Installation of Electrical Equipment section of the CEC.</p> <ul style="list-style-type: none"> - Explain terms as listed in the Object, Scope and Definitions section and the Special Terminologies located in the general rules of other sections of the CEC. - Interpret general rules (Section 2) of the CEC.
	<p>Course Outcome 2</p>
	<p>Learning Objectives for Course Outcome 2</p> <ul style="list-style-type: none"> - Explain the CEC regulations regarding grounding and bonding (Section 10) of electrical systems and circuits operating at 750 volts or less. - Interpret the regulations of the CEC regarding wiring methods (Section 12) for installations operating at 750 volts or less. - Explain the general regulations regarding Class 1 and Class 2 signal and remote control Circuits (Section 16) of the CEC. - Interpret the CEC regulations for Pools, Tubs, Spas (Section 68). - Identify temporary wiring installation requirements for buildings or projects under construction or demolition (Section 76) of the CEC. - Calculate conduit fill where all conductors are the same size and have the same insulation type. - Calculate conduit fill where the conductors have different sizes and/or different insulation types. - Calculate raceway fill for the raceway types listed in Section 12 where all conductors are the same size and have the same insulation type. - Calculate raceway fill for the raceway types listed in Section 12 where the conductors have different sizes and/or different insulation types. - Calculate the maximum number of conductors sized #14 to #6 that are permitted in a box. - Calculate the minimum size of pull boxes for straight, angle and u-pulls for conductors larger than #6. - Calculate ampacity and apply correction factors for single conductors in free air, including conductors in parallel. - Calculate ampacity and apply correction factors for conductors in a raceway or multi-conductor cable, including conductors in parallel. - Calculate ampacity and apply correction factors for flexible cords and equipment wires. - Calculate ampacity and apply correction factors for underground conductor installations using IEEE Standard 835. - Calculate the size of service equipment for single dwelling units. - Identify installation requirements for electrical equipment (other than electric heating) including: lighting, receptacles, heating, and appliances installed in single dwelling occupancies as specified in the Installation of Electrical Equipment Section 26 and 30 of the CEC. - Interpret the CEC regulations regarding the installation of fire alarms located in dwelling units. - Explain requirements for the installation and wiring of Fixed Electric Surface and Space Heating Systems located in

residential occupancies.

Evaluation Process and Grading System:

Evaluation Type	Evaluation Weight	Course Outcome Assessed
Tests (2)	100%	

Date:

August 20, 2018

Please refer to the course outline addendum on the Learning Management System for further information.
