PHILOSOPHY/GOALS

Fundamentals of the financial function of business. The special emphasis of this course deals with short and long term decision making with respect to the composition of the assets, the level of working capital, the capital structure and the distribution of profits of a firm.

METHOD OF ASSESSMENT (GRADING METHOD):

Students will be evaluated on the following basis:

Three Tests	75%
Class Participation	15%
Case	10%

	100%

TESTS:

The date of each test will be announced approximately one week in advance. Each test will be of equal value.

If a student is not able to write a test because of illness or a legitimate emergency, that student must submit a medical certificate or contact the instructor prior to the holding of the test and provide an acceptable explanation for the absence. In all other cases, the student will receive a mark of zero for that test.

There will not be any rewrites of individual tests.

CLASS PARTICIPATION:

Class participation will include attendance and participation in classroom discussion on lecture material and topics of current interest as well as proper preparation of assignments.

FINAL GRADE:

A+	95-100%
A	85-94%
B	70-84%
C	55-69%
R	54% or less

In order to successfully complete the course, a student must achieve an overall grade of 55%. For students who are not successful, there is provision for a supplemental test in certain limited circumstances. A student with a final grade of 40% to 55% may apply to the instructor for permission to write a supplemental test which will be based on work taken throughout the entire semester. Based on the attitude and participation of the student, the instructor may allow the student to write the supplemental test provided that each student has attempted all semester tests, and has given some indication of potential success on a supplemental test. It is the responsibility of any student in this category to apply for the supplemental test. A final grade of "C" will be assigned to any student who successfully completes the supplemental test.

In all other instances, students with a final grade of less than 55% will have to repeat the course.

* The student is expected to keep proper notes and any necessary documents from each lecture so as to enable the student to review and prepare for examinations and tests at any designated date.
