

Prepared: George Parsons Approved: Corey Meunier

| Course Code: Title                       | MPF0103: WORK PRACTICES FOR CIE   |  |  |
|--|---|--|--|
| Program Number: Name                     | 1120: COMMUNITY INTEGRATN   |  |  |
| Department:                              | C.I.C.E.  |  |  |
| Semester/Term:                           | 17F   |  |  |
| Course Description:                      | Upon successful completion of this course, you will be able to describe the legal responsibilities of employees and employers relating to safe work practices, protection of the environment, and operation of lifting rigging, and blocking equipment according to government safety and environmental legislation, be able to use precision measuring tools, be able to perform fastening device installation and removal procedures, be able to describe the repair procedures for bearings, seals, and sealants, be able to identify and perform proper cleaning methods, be able to select and use proper hand tools including electric and pneumatic tools and be able to identify and perform proper lifting techniques using powered lift trucks and all in accordance to and following manufacturers` recommended procedures, government regulations and safe work practices.  |  |  |
| Total Credits:                           | 6   |  |  |
| Hours/Week:                              | 12  |  |  |
| Total Hours:                             | 48  |  |  |
| Essential Employability<br>Skills (EES): | <ul> <li>#1. Communicate clearly, concisely and correctly in the written, spoken, and visual form that fulfills the purpose and meets the needs of the audience.</li> <li>#2. Respond to written, spoken, or visual messages in a manner that ensures effective communication.</li> <li>#3. Execute mathematical operations accurately.</li> <li>#4. Apply a systematic approach to solve problems.</li> <li>#5. Use a variety of thinking skills to anticipate and solve problems.</li> <li>#6. Locate, select, organize, and document information using appropriate technology and information systems.</li> <li>#7. Analyze, evaluate, and apply relevant information from a variety of sources.</li> <li>#8. Show respect for the diverse opinions, values, belief systems, and contributions of others.</li> <li>#9. Interact with others in groups or teams that contribute to effective working relationships and the achievement of goals.</li> <li>#10. Manage the use of time and other resources to complete projects.</li> <li>#11. Take responsibility for ones own actions, decisions, and consequences.</li> </ul> |  |  |

| Course Outcomes and<br>Learning Objectives: | Upon successful completion of this course, the CICE student, with the assistance of a Learning Specialist will acquire varying levels of skill development relevant to the following learning outcomes:  |  |  |
|   | Course Outcon  | ne 1.  |  |
|   | Upon successful completion of this course, the student will demonstrate the ability to: Use the correct safety and environmental practices associated in an automotive shop.   |  |  |
|   | Learning Object  | ctives 1.  |  |
|   | <ul> <li>Describe the poter</li> <li>Describe the rights</li> <li>Occupational Health ar</li> <li>Outline the proper</li> <li>Exhibit knowledge</li> <li>Demonstrate propi</li> <li>Explain the laws a</li> <li>Fire Safety</li> <li>Proper Personal P</li> <li>Outline Hybrid safe</li> </ul> | uipment required to operate a motive power shop<br>ntial dangers associated with in the motive power repair industry<br>s and responsibilities of the employer and employees under the<br>nd Safety Act. (OHSA).<br><sup>•</sup> procedures to defuse potentially hazardous situations in the work place<br>e and understanding of the WHMIS Safety Act<br>ber use of cleaning equipment<br>and proper handling of air conditioning refrigerants<br>Protective Safety Equipment<br>fety guidelines and precautions<br><sup>•</sup> potential safety hazards in a motive power environment: |  |

Prepared: George Parsons Approved: Corey Meunier

- electrical hazards
- proper ventilation
- glove requirements
- slipping hazards
- tripping hazards
- lifting techniques
- eye hazards
- hearing hazards
- rings and jewelry

## **Course Outcome 2.**

Demonstrate the use of proper jacking and lifting equipment used in the motive power industry.

## Learning Objectives 2.

Demonstrate the proper method of raising and lowering vehicles using hoists, fork lifts, jacks, blocking and safety stands.

- Use safety stands and jacks
- · Perform vehicle placement and movement
- Find the lifting points
- Outline equipment maintenance
- · State lifting capacities of hoisting equipment
- Use adaptors & extensions
- · Describe types of hoists and lifting equipment
- Operate safety locks and releases
- Position vehicle / wheel chocks
- Check overhead environment
- · Verify correct engagement of lift points
- Verify balance
- Verify correct use of safety locks

### **Course Outcome 3.**

Identify and safely use hand and power tools common to the motive power industry.

Prepared: George Parsons Approved: Corey Meunier

## Learning Objectives 3.

Perform the following metal working operations:

- · verify thread strengths and torque requirements for wet and dry
- repair damaged threads
- free seized threads, remove broken studs / cap screws
- install helicoils and keenserts
- apply thread locker and anti-seize
  - perform metal working tasks related to
- drilling
- tapping
- hack sawing
- filing

• Identify hand and power tools used the repair of motive power vehicles and equipment.

· Perform component removal and installation using proper tools.

### Course Outcome 4.

Define the purpose and fundamentals of fasteners and tightening procedures

# Learning Objectives 4.

- identify fastener grades and applications
- · demonstrate the ability to identity SAE vrs SI
- explain tensile, yield, shear strength and how they differ
- choose the proper grade pitch threads per inch for the job being performed
- explain the factors that affect torque such as thread condition, lubrication, temperature and fastener composition

# Course Outcome 5.

Demonstrate a working knowledge of the purpose, construction, principals of operation, and calibration of precision and non-precision measuring tools

Prepared: George Parsons Approved: Corey Meunier

## Learning Objectives 5.

- · metric and imperial measurements and conversions
- · demonstrate use of micrometers (inside and outside)
- use small hole gauges, calipers. Verniers and telescoping gauges
- measure brake drums with metric and imperial drum gauges
- apply torque wrenches to the trade (click, dial, and beam)

## **Course Outcome 6.**

Upon successful completion, the student will be able to operate heating and cutting equipment following manufacturers' recommendations, government regulations, and safe work practices.

## Learning Objectives 6.

- · oxy-fuel gases
- eye, face, hand, foot, and clothing protection
- · set-up, ignition, and shutdown sequence
- cylinder handling/storage
- fire prevention
- combustible material (eg. Butane lighter risks)
- flashback
- backfire
- removing damaged or broken fasteners
- using heat to free seized fasteners
- cylinders
- identification features
- pressure regulator
- manual valves
- gauges and hoses
- cutting attachments
- tips
- · cutting metals
- heating
- torch body
- heating tips
- flashback arresters
- equipment set-up, ignition, and shutdown sequence

Prepared: George Parsons Approved: Corey Meunier

- · oxygen and acetylene pressure settings
- ignition procedures
- select heating and cutting tips
- · observe tip angle, travel speed, and gap
- · demonstrate awareness of potential damage from heating or cutting to

surrounding materials

- · identify potential risks for altering metallurgical properties
- perform appropriate pressure settings, ignition, and flame adjustments for specific heating and cutting tasks
- remove damaged fasteners
- · heating and removing procedures of seized fasteners

### Course Outcome 7.

Identify various types and styles of equipment utilized in the Motive Power Industry.

# Learning Objectives 7.

· Complete assigned project

**CICE Modifications:** 

### **Preparation and Participation**

1. A Learning Specialist will attend class with the student(s) to assist with inclusion in the class and to take notes.

2. Students will receive support in and outside of the classroom (i.e. tutoring, assistance with homework and assignments, preparation for exams, tests and quizzes.)

3. Study notes will be geared to test content and style which will match with modified learning outcomes.

4. Although the Learning Specialist may not attend all classes with the student(s), support will always be available. When the Learning Specialist does attend classes he/she will remain as inconspicuous as possible.

**A.** Further modifications may be required as needed as the semester progresses based on individual student(s) abilities and must be discussed with and agreed upon by the instructor.

### B. Tests may be modified in the following ways:

- 1. Tests, which require essay answers, may be modified to short answers.
- 2. Short answer questions may be changed to multiple choice or the question may be simplified

Prepared: George Parsons Approved: Corey Meunier

so the answer will reflect a basic understanding.

3. Tests, which use fill in the blank format, may be modified to include a few choices for each question, or a list of choices for all questions. This will allow the student to match or use visual clues.

4. Tests in the T/F or multiple choice format may be modified by rewording or clarifying statements into layman's or simplified terms. Multiple choice questions may have a reduced number of choices.

### C. Tests will be written in CICE office with assistance from a Learning Specialist.

### The Learning Specialist may:

- 1. Read the test question to the student.
- 2. Paraphrase the test question without revealing any key words or definitions.
- 3. Transcribe the student's verbal answer.
- 4. Test length may be reduced and time allowed to complete test may be increased.

### D. Assignments may be modified in the following ways:

1. Assignments may be modified by reducing the amount of information required while maintaining general concepts.

2. Some assignments may be eliminated depending on the number of assignments required in the particular course.

### The Learning Specialist may:

1. Use a question/answer format instead of essay/research format

2. Propose a reduction in the number of references required for an assignment

3. Assist with groups to ensure that student comprehends his/her role within the group

4. Require an extension on due dates due to the fact that some students may require additional time to process information

5. Formally summarize articles and assigned readings to isolate main points for the student 6. Use questioning techniques and paraphrasing to assist in student comprehension of an assignment

#### E. Evaluation:

Is reflective of modified learning outcomes.

NOTE: Due to the possibility of documented medical issues, CICE students may require

Prepared: George Parsons Approved: Corey Meunier

alternate methods of evaluation to be able to acquire and demonstrate the modified learning outcomes

Date:

Wednesday, September 6, 2017

Please refer to the course outline addendum on the Learning Management System for further information.
