SAULT COLLEGE OF APPLIED ARTS AND TECHNOLOGY

SAULT STE. MARIE, ONTARIO

CICE COURSE OUTLINE

COURSE TITLE:	Heavy Equipment III Shop		
CODE NO. : MODIFIED CODE:	HED201 HED096	SEMESTER:	Fall
PROGRAM:	Truck and Coach / Heavy Duty Equipment Technician		
AUTHOR: MODIFIED BY:	George Parsons Shirley Timmerman, Learning Specialist CICE Program		
DATE:	Sept 2008	PREVIOUS OUTLINE DATED:	Sept 2007
APPROVED:		"Angelique Lemay"	
	CHAIF	R, COMMUNITY SERVICES	DATE
TOTAL CREDITS:	CHAIF 9	R, COMMUNITY SERVICES	DATE
TOTAL CREDITS: PREREQUISITE(S):			DATE
	9	D010	DATE

(705) 759-2554, Ext. 2603

I. COURSE DESCRIPTION:

This hands-on shop course compliments and reinforces the theory taken in HED200-8 during the fall, third semester. The course content requires the student to independently perform a variety of shop assignments and communicate clearly and correctly the diagnostics, the objective, service procedure and specifications in summarized, written service reports. In addition to previously taught content, the student will work on hydraulic, electrical and fuel injection tasks as demonstrated through the semester. Demonstrated skills learned in this course will assist the student in a wide scope of trade related employment including the trucking, agricultural, construction, material handling, mining, forestry, railway, equipment rental and equipment dealership industries.

II. LEARNING OUTCOMES AND ELEMENTS OF THE PERFORMANCE:

Upon successful completion of this course, the CICE student with the assistance of a Learning Specialist will demonstrate the basic ability to:

1. Support mobile and stationary hydraulic systems and circuits by assisting in competently diagnosing, repairing / replacing components, analyzing failure causes, removing problems and testing and adjusting to ensure efficient hydraulic performance through observation and participation.

Potential Elements of the Performance:

- Identify basic hydraulic components, their purpose and function in a typical hydraulic system.
- Remove, assemble and replace hydraulic hoses.
- Disassemble, inspect and identify hydraulic pumps.
- Disassemble, inspect and repack hydraulic cylinders.
- Disassemble, inspect and identify the operation of hydraulic directional control valves and optional valving and purpose.
- Examine and identify flow control, pressure reducing, sequence, and holding valves and their circuit locations and purpose.
- Perform meter flow testing, time circuit time cycles, pressure test primary and secondary relief valve settings and adjust to specifications.

2. Perform basic electrical diagnostic tasks with multimeters, test lamps and equipment to support the mobile equipment industry, identify faults, causes and repair / replace parts and components that make up cranking, charging and accessory electrical circuits.

Potential Elements of the Performance:

- Measure voltage drops, amperage and resistance values of various circuits.
- Perform safe battery charging techniques, load testing and charge testing procedures, and safe boosting procedures.
- Disassemble, inspect and identify the operating principles of Brush and brushless alternators, external and internally Regulated, then reassemble and load test.
- Identify the operating principles of electrical, air and hydraulic cranking motors.
- Perform cranking cable voltage drop tests, starter control circuit tests including crank inhibit devices.
- Perform heavy duty electrical circuit troubleshooting procedures for entire cranking, charging and accessory circuits.
- 3. With support, maintain basic diesel fuel supply and fuel injection systems in the commercial vehicle and stationary power industries.

Potential Elements of the Performance:

- Inspect and identify fuel supply components including reservoirs, water traps and drains, primary filters, water separators, heaters, charge pumps, hand primers, regulating valves, secondary filters, bleeders and charge pressure tap points for a variety of diesel engines.
- Perform torque, dial indicator, and zero-lash tune-ups and cam timing on pressure-time mechanical injected engines.
- Test and adjust low and high idle and snap throttle pressure on PTG fuel pumps.
- Perform static pin timing, low and high pressure spill port timing of in-line multiplunger injection pumps.
- Identify hydraulic open and closed injectors, pop test and adjust opening pressures, and test for tip and back leakage, distribution patterns and chatter.
- Perform diagnostic tests of injection pump and injectors on live engines.
- Isolate a short or overfueled unit injector on a two-stroke diesel and correct condition with proper overhead tune up.
- Test charge pressure and recommend proper servicing of a two-stroke diesel injection system.
- Inspect and adjust fuel injection timing of various rotary injection pumps on various diesel engines.

III. TOPICS:

- 1. Hydraulics
- 2. Electrical Basics, Meters, Charging and Cranking Systems
- 3. Fuel Supply Systems
- 4. Diesel Fuel Injection and Engine Maintenance

IV. REQUIRED RESOURCES/TEXTS/MATERIALS:

Vickers Mobile Hydraulics Manual Heavy Duty Truck Systems 4th edition Diesel Technology Fundamentals / Service / Repair Diesel Technology Workbook Shop Assignment Sheet Protector Pens, pencils Approved Safety Glasses, Approved Safety Boots, and Coveralls

V. EVALUATION PROCESS/GRADING SYSTEM:

The Heavy Equipment Program considers both HED200-13 Theory and HED201-9 Shop to be <u>co-requisites</u>. Students must successfully complete both courses in the same semester.

Shop grade assessment is based on two criteria;

- 70% on project or shop assignments and on the students ability as measured subjectively by performance on a variety of shop work.
- 30% on employability skills; attendance, punctuality, preparedness, housekeeping, work organization, and general attitude.

The following semester grades will be assigned to students:

<u>Grade</u>	Definition	Grade Point <u>Equivalent</u>
A+ A	90 – 100% 80 – 89%	4.00
B	80 - 89% 70 - 79%	3.00
С	60 - 69%	2.00
D	50 – 59%	1.00
F (Fail)	49% and below	0.00

CR (Credit)	Credit for diploma requirements has been awarded.
S	Satisfactory achievement in field /clinical
U	placement or non-graded subject area. Unsatisfactory achievement in
	field/clinical placement or non-graded
V	subject area.
Х	A temporary grade limited to situations with extenuating circumstances giving a
	student additional time to complete the
	requirements for a course.
NR	Grade not reported to Registrar's office.
W	Student has withdrawn from the course
	without academic penalty.

VI. SPECIAL NOTES:

Disability Services:

If you are a student with special needs (e.g. physical limitations, visual impairments, hearing impairments, or learning disabilities), you are encouraged to discuss required accommodations with your professor and/or the Disability Services office. Visit Room E1101 or call Extension 2703 so that support services can be arranged for you.

Retention of Course Outlines:

It is the responsibility of the student to retain all course outlines for possible future use in acquiring advanced standing at other postsecondary institutions.

Communication:

The College considers **WebCT/LMS** as the primary channel of communication for each course. Regularly checking this software platform is critical as it will keep you directly connected with faculty and current course information. Success in this course may be directly related to your willingness to take advantage of the **Learning Management System** communication tool.

Plagiarism:

Students should refer to the definition of "academic dishonesty" in *Student Code of Conduct*. Students who engage in academic dishonesty will receive an automatic failure for that submission and/or such other penalty, up to and including expulsion from the course/program, as may be decided by the professor/dean. In order to protect students from inadvertent plagiarism, to protect the copyright of the material referenced, and to credit the author of the material, it is the policy of the department to employ a documentation format for referencing source material. Course Outline Amendments:

The professor reserves the right to change the information contained in this course outline depending on the needs of the learner and the availability of resources.

Substitute course information is available in the Registrar's office.

VII. PRIOR LEARNING ASSESSMENT:

Credit for prior learning will be given upon successful completion of a challenge exam or portfolio.

VIII. ADVANCE CREDIT TRANSFER:

Students who wish to apply for advance credit transfer (advanced standing) should obtain an Application for Advance Credit from the program coordinator (or the course coordinator regarding a general education transfer request) or academic assistant. Students will be required to provide an unofficial transcript and course outline related to the course in question.

CICE Modifications:

Preparation and Participation

- 1. A Learning Specialist will attend class with the student(s) to assist with inclusion in the class and to take notes.
- 2. Students will receive support in and outside of the classroom (i.e. tutoring, assistance with homework and assignments, preparation for exams, tests and quizzes.)
- 3. Study notes will be geared to test content and style which will match with modified learning outcomes.
- 4. Although the Learning Specialist may not attend all classes with the student(s), support will always be available. When the Learning Specialist does attend classes he/she will remain as inconspicuous as possible.

A. Tests may be modified in the following ways:

- 1. Tests, which require essay answers, may be modified to short answers.
- 2. Short answer questions may be changed to multiple choice or the question may be simplified so the answer will reflect a basic understanding.
- 3. Tests, which use fill in the blank format, may be modified to include a few choices for each question, or a list of choices for all questions. This will allow the student to match or use visual clues.
- 4. Tests in the T/F or multiple choice format may be modified by rewording or clarifying statements into layman's or simplified terms. Multiple choice questions may have a reduced number of choices.

B. Tests will be written in CICE office with assistance from a Learning Specialist.

The Learning Specialist may:

- 1. Read the test question to the student.
- 2. Paraphrase the test question without revealing any key words or definitions.
- 3. Transcribe the student's verbal answer.
- 4. Test length may be reduced and time allowed to complete test may be increased.

C. Assignments may be modified in the following ways:

- 1. Assignments may be modified by reducing the amount of information required while maintaining general concepts.
- 2. Some assignments may be eliminated depending on the number of assignments required in the particular course.

The Learning Specialist may:

- 1. Use a question/answer format instead of essay/research format
- 2. Propose a reduction in the number of references required for an assignment
- 3. Assist with groups to ensure that student comprehends his/her role within the group
- 4. Require an extension on due dates due to the fact that some students may require additional time to process information
- 5. Formally summarize articles and assigned readings to isolate main points for the student
- 6. Use questioning techniques and paraphrasing to assist in student comprehension of an assignment

D. Evaluation:

Is reflective of modified learning outcomes.
