Course Description: This course is a co-requisite to Community Practicum 11. Students will use self-reflection activities, self-care processes and responsiveness to feedback as tools for enhancing their own professional competence. Reference will be made to material drawn from other CYC courses.

The fieldwork and seminar format enables students to gain self-confidence in their abilities, become aware of their motivations and share their problems, anxieties and feelings. This class also assists the students with understanding the broader social context involved in an individual child's life (i.e. family, peers and community).
