

COURSE OUTLINE

CON200

Prepared: Sal lenco Approved: Corey Meunier

Course Code: Title	CON200: CONSTRUCTION MATERIALS I
Program Number: Name	4080: CIVIL ENG TECHNICIAN
Department:	CIVIL/CONSTRUCTION
Semester/Term:	17F
Course Description:	<p>Construction materials are the foundation for any type of construction project. They play an important role in all phases of a project.</p> <p>As a technician your responsibility is to understand the behavior and performance of materials. In this course the materials studied and tested include aggregates, Portland cement concretes and asphalt hot mixes.</p> <p>Throughout this course, students will conduct themselves in a safe, cooperative and responsible fashion.</p>
Total Credits:	4
Hours/Week:	4
Total Hours:	60
Substitutes:	ARC133, CON100
Vocational Learning Outcomes (VLO's): <small>Please refer to program web page for a complete listing of program outcomes where applicable.</small>	<p>#2. comply with workplace health and safety practices and procedures in accordance with current legislation and regulations.</p> <p>#4. carry out sustainable practices in accordance with contract documents, industry standards and environmental legislative requirements.</p> <p>#6. collect, process and interpret technical data to produce written and graphical project-related documents.</p> <p>#7. use industry-specific electronic and digital technologies to support civil engineering projects.</p> <p>#8. participate in the design and modeling phase of civil engineering projects by applying engineering concepts, basic technical mathematics and principles of science to the review and production of project plans.</p> <p>#10. perform quality control testing and the monitoring of equipment, materials and methods involved in the implementation and completion of civil engineering projects.</p>
Essential Employability Skills (EES):	#1. Communicate clearly, concisely and correctly in the written, spoken, and visual form that fulfills the purpose and meets the needs of the audience.

COURSE OUTLINE

CON200

Prepared: Sal lenco Approved: Corey Meunier

- #2. Respond to written, spoken, or visual messages in a manner that ensures effective communication.
- #3. Execute mathematical operations accurately.
- #4. Apply a systematic approach to solve problems.
- #5. Use a variety of thinking skills to anticipate and solve problems.
- #8. Show respect for the diverse opinions, values, belief systems, and contributions of others.
- #9. Interact with others in groups or teams that contribute to effective working relationships and the achievement of goals.
- #10. Manage the use of time and other resources to complete projects.
- #11. Take responsibility for ones own actions, decisions, and consequences.

Course Evaluation:

Passing Grade: 50%, D

Other Course Evaluation & Assessment Requirements:

Grade
 Definition Grade Point Equivalent
 A+ 90 – 100% 4.00
 A 80 – 89%
 B 70 - 79% 3.00
 C 60 - 69% 2.00
 D 50 – 59% 1.00
 F (Fail) 49% and below 0.00

CR (Credit) Credit for diploma requirements has been awarded.
 S Satisfactory achievement in field /clinical placement or non-graded subject area.
 U Unsatisfactory achievement in field/clinical placement or non-graded subject area.
 X A temporary grade limited to situations with extenuating circumstances giving a student additional time to complete the requirements for a course.
 NR Grade not reported to Registrar’s office.
 W Student has withdrawn from the course without academic penalty.

Evaluation Process and Grading System:

Evaluation Type	Evaluation Weight
Final Test	30%
Mid-Term Test	30%
Quizzes/Assignemtns/Laboratories	40%

Books and Required Resources:

Materials For Civil And Construction Engineers by Michael S. Mamlouk/John P. Zaniwski
 Publisher: Pearson Edition: Fourth
 ISBN: 10: 0-13-6111058-4

COURSE OUTLINE

CON200

3

Prepared: Sal Ienco Approved: Corey Meunier

Course Outcomes and Learning Objectives:

Course Outcome 1.

Upon successful completion, the student will be able to:

1. Perform standard aggregate tests following prescribed CSA (Canadian Standards Association) ASTM (American Society for Testing and Materials) standards.

Learning Objectives 1.

- 1.1 List and describe why the testing of aggregates is important (Real life examples of failures).
- 1.2 List the types of soil and rock deposits used for aggregates in Ontario.
- 1.3 Identify standards for sampling and testing aggregates and perform aggregate tests.
- 1.4 Describe the procedure for extracting representative samples of aggregates from conveyors, stockpiles trucks and pit faces.
- 1.5 Determine the size of sample required for any test to be performed on the aggregate.
- 1.6 Explain why we complete different aggregate tests and what they mean.
- 1.7 Perform or demonstrate standard tests such as sieve analysis, grain size distribution, wash test, relative density and absorption (course and fine aggregate), flat and elongated test and the testing for organics

Course Outcome 2.

Upon successful completion, the student will be able to:

2. Design and test Portland cement concrete mixes to satisfy design criteria such as water/cement ratio, admixtures and trial batch procedures

Learning Objectives 2.

- 2.1 List and describe why the testing of concrete is important (Real life examples of failures).
- 2.2 Describe the manufacture of Portland cements, the types produced and their uses in construction.
- 2.3 Describe Portland cement concrete including the materials used, the hydration process, water/cement ratio, curing requirements, workability, air content, admixtures and criteria used to measure properties.
- 2.4 Recognize methods used to improve durability of Portland cement concrete when exposed to freeze thaw cycles, road deicing chemicals and other destructive environments.

COURSE OUTLINE

CON200

4

Prepared: Sal lenco Approved: Corey Meunier

- 2.5 Prepare a Portland cement concrete mix, sample and test for temperature, slump air content and density.
- 2.6 Cast compressive strength cylinders.
- 2.7 Complete compression testing of standard cured concrete including the capping, breaking, and recording, plotting and evaluating results.
- 2.8 List and understand the use of reinforcing bar in concrete(Real Life Examples of Failure)
- 2.9 Review on how to inspect for reinforcing bar.

Course Outcome 3.

Upon successful completion, the student will be able to:

3. Define and explain asphalt concrete mixes using the Marshall and Superpave methods

Learning Objectives 3.

- 3.1 Understanding why the testing of asphalt is important (Real life examples of failures).
- 3.2 Sampling techniques used.
- 3.3 Process used to produce asphalt cements.
- 3.4 Identify the types and uses of asphalt cements.
- 3.5 Identify required asphalt cement tests.
- 3.6 Observe and record laboratory sample split test.
- 3.7 Participate in testing asphalt briquettes.
- 3.8 Participate in testing asphalt for air voids, density stability and asphalt cement content.
- 3.9 Perform an inspection of the types of road failures and their causes.

Course Outcome 4.

Upon successful completion, the student will be able to:

4. Identify sustainable practices as it relates to concrete and asphalt used in the construction industry.

Learning Objectives 4.

COURSE OUTLINE

CON200

5

Prepared: Sal lenco Approved: Corey Meunier

- 4.1 Identify the principles of sustainable construction using recycled concrete and asphalt.
- 4.2 Identify how to minimize waste and use appropriate waste management techniques.

Course Outcome 5.

Upon successful completion, the student will be able to:

- 5. Use industry-specific electronic technologies to support the calculations for typical strength of materials problems

Learning Objectives 5.

- 5.1 Calculate and graph the results of sieve analysis using an Excel spreadsheet.
- 5.2 Calculate the mass ingredients of water, cement, fine aggregate and coarse aggregate using appropriate shareware software.

Course Outcome 6.

Upon successful completion, the student will be able to:

- 6. Comply with health and safety practices and procedures while working in the laboratory.

Learning Objectives 6.

- 6.1 Review the rights and Responsibilities of workers.
- 6.2 Review the ten parts of the Occupational Health and Safety Act.
- 6.3 Apply the occupational health and safety regulations to specific in laboratory and specific job sites and conditions.
- 6.4 Apply the workplace hazardous materials information system in a testing laboratory setting.
- 6.5 Conduct self in safe manner and in accordance with the requirements of work situation
- 6.6 Identify unsafe situations in the laboratory and take corrective actions

Course Outcome 7.

COURSE OUTLINE

CON200

Prepared: Sal Ienco Approved: Corey Meunier

Upon successful completion, the student will be able to:
7. Apply teamwork, leadership and interpersonal skills when working individually or within a team to complete the survey field camp projects.

Learning Objectives 7.

- 7.1 Take initiative while working with your team to complete the laboratory assignments.
- 7.2 Assume accountability for self in managing the use of time and resources to meet established deadline.
- 7.3 Work as an effective team player to complete the laboratory assignments while promoting a positive work environment.
- 7.4 Use effective time-management and organizational techniques to prioritize project tasks and to accomplish goals set by the laboratory group.
- 7.5 Use conflict resolution skills in the laboratory including cooperation and compromise.

Date:

Friday, September 1, 2017

Please refer to the course outline addendum on the Learning Management System for further information.
