

I. COURSE DESCRIPTION:

Geographical Information Systems (GIS) is a tool used by engineers and planners. As a technician you work with the engineering or planning team. Consequently a working knowledge of GIS is necessary.

This course is designed to provide you with a basic understanding of Geographical Information Systems. The primary software for this course is ArcGIS.

II. LEARNING OUTCOME:

- 1. Demonstrate relevant mathematical, computer and technical problem solving skills as it relates to civil engineering / construction projects.**
- 2. Demonstrate an understanding of the working roles and inter-relationships required to adhere to the objectives of the project and work in accordance to labour-management principles and practices**

IV. EVALUATION PROCESS/GRADING SYSTEM:

You will be assigned a final grade based on successful completion of laboratories, assignments and tests, weighted as follows:

Assignments	40%
Mid Term Test	30%
Final Test	<u>30%</u>
TOTAL	100%

Each assignment carries equal weight. Late submittals receive only a maximum grade of 60%. However, laboratories or assignments handed in later than one week will receive a grade of 0%.

An average of 50% on laboratories/assignments and 50% on tests is required for successful completion of this course.

The following semester grades will be assigned::

<u>Grade</u>	<u>Definition</u>	<u>Grade Point Equivalent</u>
A+	90 - 100%	4.00
A	80 - 89%	4.00
B	70 - 79%	3.00
C	60 - 69%	2.00
D	50 – 59%	1.00
F (Fail)	49% and below	0.00
CR (Credit)	Credit for diploma requirements has been awarded.	
S	Satisfactory achievement in field /clinical placement or non-graded subject area.	
U	Unsatisfactory achievement in field/clinical placement or non-graded subject area.	
X	A temporary grade limited to situations with extenuating circumstances giving a student additional time to complete the requirements for a course.	
NR	Grade not reported to Registrar's office.	
W	Student has withdrawn from the course without academic penalty.	

Assignments and Examination Policy:
