Instructor: G. Page

PREREQUISITE: PSY 100-6 – DEVELOPMENTAL PSYCHOLOGY (CCW)

COURSE DESCRIPTION

This course is designed to introduce the students to the principles of learning and conditioning which underlie most human behaviour. The principles of learning and conditioning are examined as a process for changing human behaviour in a variety of environments. The student will examine classical and operant conditioning, behavioural assessment and techniques for measuring behaviour, positive and negative reinforcement, schedules of reinforcement, extinction, differential reinforcement, stimulus control, fading techniques, and chaining techniques. In addition the student will review the limitations of behaviour modification and discuss the ethical implications of utilizing various behavioural procedures.

COURSE OBJECTIVES

After completing this course the student will be able to:

1. identify the five major schools of psychology.
2. define what behaviour is and list the components of behaviour.
3. define and explain what is meant by applied behaviour analysis.
4. differentiate and explain how respondent and operant conditioning theories function in changing behaviour.
5. identify the factors necessary in performing a behavioural assessment.
6. identify and demonstrate how to utilize various behavioural recording procedures.
7. evaluate and interpret data.
8. define and explain what positive and negative reinforcement are, including primary and secondary reinforcers.
9. list the factors which affect reinforcement.
10. define and explain what extinction, shaping, differential reinforcement, stimulus control and discrimination training and chaining are, and how they can be applied to bring about behavioural change.
11. identify various schedules of reinforcement and review the advantages and disadvantages of each schedule.
12. analyze an article from a behavioural sciences journal and summarize and evaluate the usefulness of the journal in the treatment of human behaviour.
13. examine a case study and design strategies for managing the client's behaviour using an applied behaviour analysis approach.
14. discuss and assess legal and ethical issues surrounding the use of applied behavioural analysis.

REQUIREMENTS FOR GRADING:

1. Journal Presentation:

Each student will be required to present a summary of an article from a behavioral sciences journal. A description of the problem (target behavior), the programme, results and conclusions will be expected. This is to be a summary, not a re-telling of the article. The student will be expected to state their own opinions and to lead a class discussion about the article. An emphasis on programmes dealing with children and adolescents is preferred, but not mandatory.

A one or two page neatly **typed**, double-spaced summary will be expected. (25 points)

Due Date: October 1, 1993 by 3:00 p.m. Late journal assignments will result in a loss of 5 points per day (not including Saturday or Sunday)

2. Quizzes:

There will be 4 quizzes each worth 50 points. They will cover material covered to date in the course. They will be multiple choice and/or short answer. Students are responsible for all material in the text(s), video, lectures, etc.

3. Case Study:

A case study will be provided to the students by the first week of October. The case will require, from each student, a written report including an analysis of the problem and a programme proposal.
(75 points)

Due Date: Friday, November 12, 1993 by 3:00 p.m. Late Case Studies will be subject to a "response cost" of 10 points per day, not including Saturdays or Sundays.

An outline for doing this will be provided on the day the case is handed out.

4. Participation

This includes class involvement*, commitment, completion of readings, and miscellaneous assignments other than those listed above, etc. With your involvement this can be a dynamic, fulfilling course!
