I. COURSE DESCRIPTION:

This course is designed as a corequisite to Fieldwork II. The focus will be on the articulation of the prevention and intervention strategies utilized in the field and on the issues of youth at risk. The principles that will be learned will apply to both the behaviour of others and to one's own behavioural responses as a helping professional. Reference will be made to material drawn from other CYW courses.

The field work and seminar format enables students to gain self-confidence in their abilities, become aware of their motivations and share their problems, anxieties and feelings. This class also assists the students with understanding the broader social context and that is involved in an individual child's life i.e., family, peer group, community. The holistic approach is emphasized as students learn to become competent workers in this profession.

This will be explained in class, in order that everyone is aware of the expectations. If this cannot be done for any reason, the student's grade will reflect this. Assignments that are consistently late will also be reflected in the grading system.

Evaluation of the final grade will be based not merely on quantity of work but on quality of work as well, for example, an "A" can be earned only if "A" reports are written.
