Assignment 3

This assignment relates the information on learning disorders and the brain (chapters 1, 2, 3) to how this affects language, reading, writing/spelling, and mathematics. In pairs/groups, we will present a booklet on strategies for a TA to use or be aware of, in order to work more efficiently with LD students or clients. The group will prepare a list of learning/teaching methods in booklet format. I will assist in photocopying the booklet for the class. The group will present the information in the booklet in a role-modelling format to the class for a hands-on experience. I am expecting to allow 2 hours for each topic (language, reading, writing/spelling, math). The information gathered from these sessions will be the resource material or information required for the TAKE HOME EXAM which will also be tied in with any relevant content acquired from the other sessions (more to come on the TAKE HOME EXAM).

Research on strategies may begin immediately. I have many texts and references on strategies and I am sure your placement teachers/resource teachers, etc., will have much to share with you. Since these presentations will take place to coincide with chapters 4-9, I expect that we will be presenting in November and early December.
