THE SAULT COLLEGE OF APPLIED ARTS AND TECHNOLOGY SAULT STE. MARIE, ON

COURSE OUTLINE

Course Title: Calculus II
Code No.: Mth 577-4 Semester: Four
Program: Electrical / Electronics
Author: The Mathematics Department
Date: August 2007 Previous Outline Dated: August 2006
Approved: $\qquad$
Dean
Date

Total Credits: 4
Prerequisite(s): Mth 551
Hours/Week: 4

## I. COURSE DESCRIPTION:

This advanced course in calculus contains some special methods of integration, Maclaurin, Taylor and Fourier series, various types of first and second order differential equations, an introduction to Laplace transforms, and applications to the electrical/electronics area.

## II. LEARNING OUTCOMES:

The basic objectives are that the students develop an understanding of the methods studied, demonstrate knowledge of the facts presented and show an ability to use these in the solution of problems. To accomplish these objectives, exercises are assigned. Test questions will be of near equal difficulty to questions assigned in the exercises. The level of competency demanded is the level required to obtain an overall passing average on the tests. The material to be covered is listed below.

After studying each of the following topics, the student should be able to:

## Topic 1:

1. Integrate any type of algebraic or transcendental function using the general power formula for integration.
2. Find integrals of some types of expressions using a short table of integrals.
3. Find integrals of some expressions leading to a natural logarithm form using integration tables.
4. Evaluate integrals of some exponential expressions using a table of integrals.
5. Evaluate integrals of some trigonometric functions using a table of integrals.
6. Find integrals of some other types of trigonometric functions using integration tables.
7. Find integrals of some algebraic functions leading to inverse trigonometric functions using integration tables.
8. Find integrals of expressions requiring the use of the integration by parts formula. Some of these integrals are also found in integration tables.
9. Find integrals of expressions requiring a trigonometric substitution. Some of these integrals are also found in integration tables.

## Topic 2:

1. Recognize the difference between convergent and divergent series.
2. Expand a function using a Maclaurin series.
3. Find a Maclaurin series for a function using a known Maclaurin series, by substitution, integration or differentiation, multiplication or division.
4. Compute numerical values using a Maclaurin series.
5. Expand a function using a Taylor series and then compute numerical values with this series.
6. Find a Fourier series for some types of periodic waveforms.

## II. LEARNING OUTCOMES (continued):

## Topic 3:

1. Identify a first order differential equation, and check a given solution to a differential equation.
2. Solve a first order differential equation by separating variables before integration.
3. Solve a first order differential equation by rearranging to isolate some form of integrable combination.
4. Find a solution (general or particular) for linear first order differential equations.
5. Solve some types of word problems involving differential equations.

## Topic 4:

1. Identify a higher order differential equation, and solve any type requiring direct integration.
2. Solve homogeneous differential equations where the auxiliary equation has unequal real roots.
3. Solve homogeneous differential equations where the auxiliary equation has equal (repeated) or complex roots.
4. Solve non-homogeneous differential equations combining a complementary and particular solution.
5. Solve some types of word problems involving higher order differential equations.
6. Find Laplace transforms of algebraic and transcendental functions and derivatives.
7. Use Laplace transforms to solve some types of differential equations.

## III. TOPICS TO BE COVERED:

1. Methods of Integration
2. Expansion of Functions in Series
3. Differential Equations

## Approximate Time Frame

29 periods
15 periods

20 periods

Total: 64 hours

| TOPIC <br> NUMBER | TOPIC DESCRIPTION | REFERENCE <br> CHAPTER <br> ASSIGNMENTS |
| :---: | :--- | :--- |
| 1.0 | METHODS OF INTEGRATION | Chapter 28 |
| 1.1 | The general power formula | Exercise 28-1 |
| 1.2 | The basic logarithmic form | Ex. 28-2 |
| 1.3 | The exponential form | Ex. 28-3 |
| 1.4 | Basic trigonometric forms | Ex. 28-4 |
| 1.5 | Other trigonometric forms | Ex. 28-5 |
| 1.6 | Inverse trigonometric forms | Ex. 28-6 |
| 1.7 | Integration by parts | Ex. 28-7 |
| 1.8 | Integration by trigonometric substitution | Ex. 28-8 |
| 1.9 | Integration by partial fractions | Ex. 28-9, 28-10 |
| 1.10 | Integration by use of tables | Ex. 28-11 |
| 1.11 | Review exercise | Chapter 29 |
| 2.0 | EXPANSION OF FUNCTIONS IN <br> SERIES | Ex. 29-1 |
| 2.1 | Infinite series | Ex. 29-2 |
| 2.2 | Maclaurin series | Ex. 29-3 |
| 2.3 | Certain operations with series | Ex. 29-4 |
| 2.4 | Computations by use of series <br> expansions | Ex. 29-5 |
| 2.5 | Taylor's series | Ex. 29-6 |
| 2.6 | Fourier series |  |
| 2.7 | Review exercises |  |

| TOPIC <br> NUMBER | TOPIC DESCRIPTION | REFERENCE <br> CHAPTER <br> ASSIGNMENTS |
| :---: | :--- | :--- |
| 3.0 | FIRST ORDER DIFFERENTIAL <br> EQUATIONS | Chapter 30 |
| 3.1 | Solutions of differential equations. | Ex. 30-1 |
| 3.2 | Separation of variables | Ex. 30-2 |
| 3.3 | Integrable combinations | Ex. 30-3 |
| 3.4 | Linear first order differential equations | Ex. 30-4 |
| 3.5 | Elementary applications | Ex. 30-5 |
| 4.0 | HIGHER ORDER DIFFERENTIAL <br> EQUATIONS | Chapter 30 |
| 4.1 | Homogeneous equations with constant <br> coefficients | Ex. 30-6 |
| 4.2 | Auxiliary equations with repeated or <br> complex roots | Ex. 30-7 |
| 4.3 | Solutions of nonhomogeneous equations | Ex. 30-8 |
| 4.4 | Applications of second-order differential <br> equations | Ex. 30-9 |
| 4.5 | Laplace transforms | Ex. 30-10 |
| 4.6 | Solving differential equations by Laplace <br> transformers. | Ex. 30-11 |
| 4.7 | Review exercise |  |

## IV. REQUIRED RESOURCES / TEXTS / MATERIALS:

1. Text: Washington, "Basic Technical Mathematics With Calculus", $8^{\text {th }}$ Edition, Metric Version. Benjamin/Cummings Pub. Co 2005.
2. Calculator: (Recommended) SHARP Scientific Calculator EL-506L. The use of some kinds of calculators may be restricted during tests.

## V. EVALUATION PROCESS/GRADING SYSTEM:

## MAJOR ASSIGNMENTS AND TESTS

While regular tests will normally be scheduled and announced beforehand, there may be an unannounced test on current work at any time. Such tests, at the discretion of the instructor, may be used for up to $\mathbf{3 0 \%}$ of the overall mark.

The instructor will provide you with a list of test dates and other required evaluation information for your class section. Tests may be scheduled out of regular class time.

## ATTENDANCE

It is your responsibility to attend all classes during the semester. Research indicates there is a high correlation between attendance and student success.

If you are absent from class, it is your responsibility to find out what work was covered and assigned and to complete this work before the next class. Your absence indicates your acceptance of this responsibility.

Unexcused absence from a test may result in a mark of zero ("0"). Absence may be excused on compassionate grounds such as verified illness or bereavement. On return from an excused absence, you should ask your instructor to schedule the writing of a make-up test. Failure to do so will be considered as an unexcused absence.

## METHOD OF ASSESSMENT (GRADING METHOD)

| Grade | Definition | Grade Point Equivalent |
| :---: | :---: | :---: |
| A+ | 90-100\% | 4.00 |
| A | 80-89\% | 4.00 |
| B | 70-79\% | 3.00 |
| C | 60-69\% | 2.00 |
| D | $50-59 \%$ | 1.00 |
| F (Fail) | 49\% and below | 0.00 |
| CR (Credit) | Credit for diploma requirements has been awarded. |  |
| S | Satisfactory achievement in field /clinical placement or non-graded subject area. |  |
| U | Unsatisfactory achievement in field/clinical placement or non-graded subject area. |  |
| X | A temporary grade limited to situations with extenuating circumstances giving a student additional time to complete the requirements for a course. |  |
| NR | Grade not reported to Registrar's office. |  |
| W | Student has withdrawn from the course |  |

without academic penalty.

| Course: MTH 577-4 |  |  |
| :--- | :--- | :--- |
| Evaluation Device | Topics Covered <br> (reference topic numbers <br> from the course outline) | \% weight of Final Average |
| Test 1 | $1.1-1.7$ | $25 \%$ |
| Test 2 | $1.8-1.10,2$ | $25 \%$ |
| Test 3 | 3 | $25 \%$ |
| Test 3 | 4 | $25 \%$ |

The method of calculating your weighted average will be defined by your instructor. Since grades are based upon averages, it follows that good marks in some tests can compensate for a failing mark in another test.

## Make-Up Test (if applicable)

An "X" grade may be assigned at the end of the regular semester if you have met $\underline{A L L}$ of the following criteria for the course:

- an overall average between $40 \%$ and $49 \%$ was achieved
- at least $50 \%$ of the tests were passed
- at least $80 \%$ of the scheduled classes were attended
- at least $80 \%$ of quizzes and assignments were submitted
- all of the topic tests were written

If you are assigned an "X" grade, you may convert it to a "D" grade by writing a make-up test on topics agreed to by the instructor. This test will be available at the time agreed to by your instructor.

At the end of the regular term, it is your responsibility to obtain your results from your instructor and, in the event of an " $X$ " grade, to inquire when the make-up test will be available.

The score you receive on this make-up test will replace your original test score and be used to re-calculate your weighted average. If the re-calculated average is $50 \%$ or greater, a " $D$ " grade will be assigned. If the re-calculated average is 49\% or less, an "F" grade will be assigned.

## "F" and "X" Grades at the end of the Semester

If an " $X$ " grade is not cleared by the specified date, it will become an " $F$ " grade. Except for extenuating circumstances, an " $X$ " grade in Math will not be carried into the next semester.

## VI. SPECIAL NOTES:

## Special Needs:

If you are a student with special needs (e.g. physical limitations, visual impairments, hearing impairments, or learning disabilities), you are encouraged to discuss required accommodations with your professor and/or the Special Needs office. Visit Room E1101 or call Extension 2703 so that support services can be arranged for you.

## Retention of Course Outlines:

It is the responsibility of the student to retain all course outlines for possible future use in acquiring advanced standing at other postsecondary institutions.

Communication:
The College considers WebCT/LMS as the primary channel of communication for each course. Regularly checking this software platform is critical as it will keep you directly connected with faculty and current course information. Success in this course may be directly related to your willingness to take advantage of the Learning Management System communication tool.

Plagiarism:
Students should refer to the definition of "academic dishonesty" in Student Code of Conduct. Students who engage in academic dishonesty will receive an automatic failure for that submission and/or such other penalty, up to and including expulsion from the course/program, as may be decided by the professor/dean. In order to protect students from inadvertent plagiarism, to protect the copyright of the material referenced, and to credit the author of the material, it is the policy of the department to employ a documentation format for referencing source material.

Course Outline Amendments:
The professor reserves the right to change the information contained in this course outline depending on the needs of the learner and the availability of resources.

Substitute course information is available in the Registrar's office.

## VII. PRIOR LEARNING ASSESSMENT:

Students who wish to apply for advanced credit in the course should consult the professor or the Coordinator, Mathematics Department. Credit for prior learning will be given upon successful completion of a challenge exam or portfolio.

## VIII.DIRECT CREDIT TRANSFERS:

Students who wish to apply for direct credit transfer (advanced standing) should obtain a direct credit transfer form from the Dean's secretary. Students will be required to provide a transcript and course outline related to the course in question.
