SAULT COLLEGE OF APPLIED ARTS AND TECHNOLOGY

SAULT STE. MARIE, ONTARIO

COURSE OUTLINE

COURSE TITLE:	Fluids & Com	nbustions				
CODE NO. :	ELR 211		SEMESTER:	3		
PROGRAM:	Instrumentation Technician					
AUTHOR:	Randy Clouth	nier				
DATE:	September	PREVIOUS OUT	LINE DATED:	January 2009		
APPROVED:	2009	"Corey Meunie	H 33	2009		
TOTAL CREDITS:	5	CHAIR				
PREREQUISITE(S):						
HOURS/WEEK:	4

I. COURSE DESCRIPTION:

This course introduces the basic principles of fluid mechanics and the application of these principles to practical and applied problems. After completing this course the student should have a firm foundation in the field to continue learning. This course will provide the understanding of basic concepts of fluid mechanics and application of these concepts to solve real world problems in the area of Instrumentation and Process Control.

II. LEARNING OUTCOMES AND ELEMENTS OF THE PERFORMANCE:

Upon successful completion of this course, the student will demonstrate the ability to:

1. Perform unit conversions using the procedure of unit cancellation.

Potential Elements of the Performance:

- Define the terms fluids and fluid mechanics
- Derive units of force, energy and pressure in SI and English systems of units
- Perform unit conversions and cancellations
- Select the appropriate significant figures

2. Define, express and relate the properties of fluids <u>Potential Elements of the Performance</u>:

- Define the tem density, weight density and specific gravity
- Derive the relationship between mass density and weight density
- Express pressure as equivalent liquid column
- Differentiate between gauge pressure and absolute pressure
- Explain the role of viscosity in fluid flow

3. Describe the behavior of fluids at rest

Potential Elements of the Performance:

- Discuss the three forms of fluid energy
- Express the fluid energy as head
- Derive the relationships between pressure and elevation
- Measure fluid pressure using manometers and gauges
- Calculate the forces acting on retaining walls and buoyant forces on bodies immersed in fluids

Apply the principles of mass conservation and energy conservation to fluids in motion. Potential Elements of the Performance:

- Derive and apply continuity equation to size the pipes
- Apply the concept of energy conversation to write Bernoulli's equation
- Recognize the limitations of Bernoulli's equation
- Define Toricelli's theorem
- Describe the working principles of variable head meters
- 5. Modify Bernoulli's equation to general energy equation. Potential Elements of the Performance:
 - Identify hydraulic mechanics like pumps and turbines
 - Expand Bernoulli's equation to include the terms head added and head lost apply energy equation to solve practical problems
 - Calculate the power required to drive pumps
 - Draw hydraulic and energy grade line for a fluid system
- 6. Apply the principles of fluid mechanics to flow measurement. Potential Elements of the Performance:
 - Derive general flow equation for variable head meter
 - Study a venturi meter in the laboratory
 - Derive the equation relating coefficients of discharge, velocity and contraction
 - Calculate the velocity of flow using Pitot-static tube
 - Apply weirs formula to estimate flow in open channel

7. Identify factors affecting fluid flow and compute the head loss in a fluid flow system.

Potential Elements of the Performance:

- Characterize laminar flow and turbulent flow
- Use Moody's chart to determine friction factor
- Compute frictional head loss by applying Darcy Weisbach flow equation
- Calculate minor losses due to expansion, contraction and fittings
- Calculate total losses and use this in the general energy equation

8. Perform related lab activities

III. TOPICS:

- 1. Systems of Units
- 2. Fluid Properties

- 3. Fluid Statics
- 4. Fluid Kimematics
- 5. General Energy Equation
- 6. Flow Measurement
- 7. Energy Losses
- 8. Application of Bernoulli

IV. REQUIRED RESOURCES/TEXTS/MATERIALS:

Handouts will be provided by the instructor.

V. EVALUATION PROCESS/GRADING SYSTEM:

Two Tests	-	60%
Lab Work & Assignments	-	30%
Attendance & Attitude	-	10%

The following semester grades will be assigned to students:

Grade	Definition	Grade Point Equivalent
A+ A	90 – 100% 80 – 89%	4.00
В	70 - 79%	3.00
С	60 - 69%	2.00
D	50 – 59%	1.00
F (Fail)	49% and below	0.00
CR (Credit)	Credit for diploma requirements has been awarded.	
S	Satisfactory achievement in field /clinical placement or non-graded subject area.	
U	Unsatisfactory achievement in	
	field/clinical placement or non-graded subject area.	
Х	A temporary grade limited to situations with extenuating circumstances giving a	
	student additional time to complete the	
	requirements for a course.	
NR	Grade not reported to Registrar's office.	
W	Student has withdrawn from the course	
	without academic penalty.	

UPGRADING OF INCOMPLETES

When a student's course work is incomplete or final grade is below 60%, there is the possibility of upgrading to a pass when a student meets all of the following criteria:

- 1. The students attendance has been satisfactory.
- 2. An overall average of at least 50% has been achieved.
- 3. The student has not had a failing grade in all of the theory tests taken.
- 4. The student has made reasonable efforts to participate in class and complete assignments.

The nature of the upgrading requirements will be determined by the instructor and may involve one or more of the following: completion of existing labs and assignments, completion of additional assignments, re-testing on individual parts of the course or a comprehensive test on the entire course.

VI. SPECIAL NOTES:

Course Outline Amendments:

The professor reserves the right to change the information contained in this course outline depending on the needs of the learner and the availability of resources.

Retention of Course Outlines:

It is the responsibility of the student to retain all course outlines for possible future use in acquiring advanced standing at other postsecondary institutions.

Prior Learning Assessment:

Students who wish to apply for advance credit transfer (advanced standing) should obtain an Application for Advance Credit from the program coordinator (or the course coordinator regarding a general education transfer request) or academic assistant. Students will be required to provide an unofficial transcript and course outline related to the course in question. Please refer to the Student Academic Calendar of Events for the deadline date by which application must be made for advance standing.

Credit for prior learning will also be given upon successful completion of a challenge exam or portfolio.

Substitute course information is available in the Registrar's office.

Disability Services:

If you are a student with a disability (e.g. physical limitations, visual impairments, hearing impairments, or learning disabilities), you are encouraged to discuss required accommodations with your professor and/or the Disability Services office. Visit Room E1101 or call Extension 2703 so that support services can be arranged for you.

Communication:

The College considers **WebCT/LMS** as the primary channel of communication for each course. Regularly checking this software platform is critical as it will keep you directly connected with faculty and current course information. Success in this course may be directly related to your willingness to take advantage of the **Learning Management System** communication tool.

Plagiarism:

Students should refer to the definition of "academic dishonesty" in *Student Code* of *Conduct.* A professor/instructor may assign a sanction as defined below, or make recommendations to the Academic Chair for disposition of the matter. The professor/instructor may (i) issue a verbal reprimand, (ii) make an assignment of a lower grade with explanation, (iii) require additional academic assignments and issue a lower grade upon completion to the maximum grade "C", (iv) make an automatic assignment of a failing grade, (v) recommend to the Chair dismissal from the course with the assignment of a failing grade. In order to protect students from inadvertent plagiarism, to protect the copyright of the material referenced, and to credit the author of the material, it is the policy of the department to employ a documentation format for referencing source material.

Student Portal:

The Sault College portal allows you to view all your student information in one place. **mysaultcollege** gives you personalized access to online resources seven days a week from your home or school computer. Single log-in access allows you to see your personal and financial information, timetable, grades, records of achievement, unofficial transcript, and outstanding obligations. Announcements, news, the academic calendar of events, class cancellations, your learning management system (LMS), and much more are also accessible through the student portal. Go to <u>https://my.saultcollege.ca</u>.

Electronic Devices in the Classroom:

Students who wish to use electronic devices in the classroom will seek permission of the faculty member before proceeding to record instruction. With the exception of issues related to accommodations of disability, the decision to approve or refuse the request is the responsibility of the faculty member. Recorded classroom instruction will be used only for personal use and will not be used for any other purpose. Recorded classroom instruction will be destroyed at the end of the course. To ensure this, the student is required to return all copies of recorded material to the faculty member by the last day of class in the semester. Where the use of an electronic device has been approved, the student agrees that materials recorded are for his/her use only, are not for distribution, and are the sole property of the College.

Attendance:

Sault College is committed to student success. There is a direct correlation between academic performance and class attendance; therefore, for the benefit of all its constituents, all students are encouraged to attend all of their scheduled learning and evaluation sessions. This implies arriving on time and remaining for the duration of the scheduled session.

LABS:

Lab activities represent a very important component of this course. Because of this, **attendance is mandatory** and the evaluation of all lab work will be done in class. It is the student's responsibility to discuss absences from regularly scheduled labs with the instructor so that alternate arrangements (where possible) can be made to complete the lab requirements.
