

SAULT COLLEGE OF APPLIED ARTS AND TECHNOLOGY

SAULT STE. MARIE, ONTARIO

Sault College

COURSE OUTLINE

COURSE TITLE:	Java Programming		
CODE NO. :	ELN 321	SEMESTER:	6
PROGRAM:	Electrical/Electronics Engineering Technology		
AUTHOR:	Fred Carella		
DATE:	Jan 2009	PREVIOUS OUTLINE DATED:	Jan 2008
APPROVED:		“Corey Meunier” CHAIR	<hr/> DATE
TOTAL CREDITS:	3		
PREREQUISITE(S):	ELN331		
HOURS/WEEK:	3

I. COURSE DESCRIPTION:

This course covers the fundamentals of object-oriented programming using Java. Students will learn to develop Java programs utilizing classes, polymorphism and inheritance. Internet applications such as Applets and Java Script will be introduced. Programming assignments will be related to solving problems in the Electronics and Electrical Technology fields.

1. *Write structured code in the Java programming environment.*Potential Elements of the Performance:

- Describe the history of the Java programming environment.
- Compare and contrast Java and C++.
- Describe the components of a Java program.
- Describe the Java programming environment and the process of Java program development/execution.
- Describe primitive Java data types.
- Write and debug simple Java applications in command line and IDE environments.
- Perform I/O using keyboard, screen and files.

2. *Utilize the various control structures available with Java.*Potential Elements of the Performance:

- Define algorithm.
- Describe the concepts of sequential execution and transfer of control.
- List and describe the control structures available with Java.
- Write programs utilizing the control structures available with Java.

3. *Write Java programs using object oriented programming techniques.*Potential Elements of the Performance:

- Describe Java methods and classes and how they are used to modularize Java programs.
- Utilize Java's predefined classes and methods.
- Write and utilize recursive methods.
- Describe the concepts of encapsulation and data hiding.
- Describe data abstraction and abstract data types.
- Create, use and destroy objects.
- Describe the scope of identifiers for variables, references and methods.

4. Utilize HTML, Applets and Java Script to develop basic Internet applications.

Potential Elements of the Performance:

- Create a basic web page using HTML.
- Utilize Java Script to enhance a web page.
- Differentiate between applets and applications.
- Write simple Java applets.
- Write simple HTML files to load an applet into an applet viewer or a browser.

III. TOPICS:

1. The Java programming environment.
2. Structured programming using Java.
3. Object oriented programming with Java.
4. Internet applications.

IV. REQUIRED RESOURCES/TEXTS/MATERIALS:

Fundamentals First Introduction to Java Programming, Seventh Edition, by Y. Daniel Liang - Published by Prentice Hall ISBN: 0-13-223738-5

V. EVALUATION PROCESS/GRADING SYSTEM:

Theory Tests and Quizzes*	50%
<u>Laboratory Work and Tests*</u>	<u>50%</u>
Total	100%

*Refer to last two items of SPECIAL NOTES.

Some minor modifications to the above percentages may be necessary. The professor reserves the right to adjust the mark up or down 5% based on attendance, participation, leadership, creativity and whether there is an improving trend.

A minimum of **80% attendance** required in the labs and lectures.

- Students must complete and pass both the theory and lab portion of the course in order to pass the entire course.
- All Assignments must be completed satisfactorily to complete the course.
- Late hand in penalties will be 10% per day. Assignments will not be accepted past one week late unless there are extenuating and legitimate circumstances.
- Makeup Tests are at the discretion of the instructor and will be assigned a maximum grade of 50%.
- The professor reserves the right to adjust the number of tests, practical tests and quizzes based on unforeseen circumstances. The students will be given sufficient notice to any changes and the reasons thereof.
- A student who is absent for 3 or more times without any valid reason or effort to resolve the problem will result in action taken.

NOTE:

If action is to be taken, it will range from marks being deducted to a maximum of removal from the course.

The following semester grades will be assigned to students:

Grade	<u>Definition</u>	<i>Grade Point Equivalent</i>
A+	90 – 100%	4.00
A	80 – 89%	3.00
B	70 - 79%	2.00
C	60 - 69%	1.00
D	50 – 59%	0.00
F (Fail)	49% and below	
CR (Credit)	Credit for diploma requirements has been awarded.	
S	Satisfactory achievement in field /clinical placement or non-graded subject area.	
U	Unsatisfactory achievement in field/clinical placement or non-graded subject area.	
X	A temporary grade limited to situations with extenuating circumstances giving a student additional time to complete the requirements for a course.	
NR	Grade not reported to Registrar's office.	
W	Student has withdrawn from the course without academic penalty.	

VI. SPECIAL NOTES:

Disability Services:

If you are a student with a disability (e.g. physical limitations, visual impairments, hearing impairments, or learning disabilities), you are encouraged to discuss required accommodations with your professor and/or the Disability Services office. Visit Room E1101 or call Extension 2703 so that support services can be arranged for you.

Retention of Course Outlines:

It is the responsibility of the student to retain all course outlines for possible future use in acquiring advanced standing at other postsecondary institutions.

Communication:

The College considers **WebCT/LMS** as the primary channel of communication for each course. Regularly checking this software platform is critical as it will keep you directly connected with faculty and current course information. Success in this course may be directly related to your willingness to take advantage of the **Learning Management System** communication tool.

Plagiarism:

Students should refer to the definition of “academic dishonesty” in *Student Code of Conduct*. Students who engage in academic dishonesty will receive an automatic failure for that submission and/or such other penalty, up to and including expulsion from the course/program, as may be decided by the professor/dean. In order to protect students from inadvertent plagiarism, to protect the copyright of the material referenced, and to credit the author of the material, it is the policy of the department to employ a documentation format for referencing source material.

Course Outline Amendments:

The professor reserves the right to change the information contained in this course outline depending on the needs of the learner and the availability of resources.

Substitute course information is available in the Registrar's office.

VII. PRIOR LEARNING ASSESSMENT:

Students who wish to apply for advance credit transfer (advanced standing) should obtain an Application for Advance Credit from the program coordinator (or the course coordinator regarding a general education transfer request) or academic assistant. Students will be required to provide an unofficial transcript and course outline related to the course in question.

Credit for prior learning will also be given upon successful completion of a challenge exam or portfolio.
