

I. COURSE DESCRIPTION:

An introductory course designed to give an overview of terms, devices, symbols and analysis techniques used in DC circuits. Topics include series, parallel and series-parallel DC circuit analysis. Other topics include an introduction to magnetism and magnetic devices, inductors and capacitors and their principle operation in DC circuits. An introduction to AC circuits, phasor diagrams and RLC circuit analysis basics completes the course.

II. LEARNING OUTCOMES AND ELEMENTS OF THE PERFORMANCE:

Upon successful completion of this course, the student will demonstrate the ability to:

1. *Analyse Series, Parallel and Series-Parallel DC circuits containing voltage and current sources and resistors, to determine individual voltage, current and power values.*

Potential Elements of the Performance:

- Complete mathematical questions from text and assignments
- Choice and use of network Theorems to aid in analysis
- Completion of test

2. *Analyse magnetic properties of circuits and devices.*

Potential Elements of the Performance:

- Determine the direction of magnetic flux present as a result of DC current flow in a conductor. Determine the direction of magnetic flux present as a result of DC current flow in a coil
- Determine the direction of rotation of a simple dc motor
- Determine the direction of current flow in a simple dc generator
- Completion of dc machine diagrams showing flux fields, main fields and rotation
- Complete test questions

3. *Analyse a DC circuit containing inductors or capacitors and resistors, to determine charge and discharge characteristic values.*

Potential Elements of the Performance:

- Completion of RL and RC circuit questions regarding time constants
- Completion of RL and RC circuit questions requiring the solution of the time for threshold voltage or current achievement
- Completion of test

4. Analyse an AC circuit containing inductors and capacitors, to determine total impedance, current, phase angles and power factor.

Potential Elements of the Performance:

- Completion of AC sine wave characteristics questions
- Completion of impedance calculations in AC circuits
- Current and voltage phase angle calculations
- Power factor correction questions in parallel AC circuits

III. TOPICS:

1. Definition of voltage, current, resistance, sources, symbols
2. Ohm's Law
3. Series Circuits, Kirchhoff's Laws, Real vs. Ideal Circuits
4. Energy and Power, Efficiency
5. Parallel Circuits, Conductance
6. Series-Parallel Circuits
7. Circuit Theorems, Thevenin's, Max Power Transfer, Superposition
8. Magnetic materials and circuits, Right Hand Rule, Motor/Generator Action
9. Inductors, Series and Parallel, Mutual Inductance, energy storage, Transformer Introduction
10. Capacitors, Series and Parallel, energy stored
11. Inductor-Resistor Circuits, Time Constants, Instantaneous Values of Current and Voltage, Back emf
12. Capacitor-Resistor Circuits, Time Constants, Instantaneous Values of Current and Voltage, Back emf
13. AC fundamentals
14. RLC circuits, phasors and power factor correction

IV. REQUIRED RESOURCES/TEXTS/MATERIALS:

Electronics: A Complete Course; 2nd ed.; by Nigel P. Cook; Prentice Hall; ISBN: 0-13-111066-7

Scientific Calculator, similar to **Sharp EL-520W**

V. EVALUATION PROCESS/GRADING SYSTEM:

Final grade will be awarded based on the composite score of assignments, quizzes, and tests as follows:

Three Tests	75%
Quizzes	10%
Assignments	10%
Attendance	5%

(The percentages shown above may have to be adjusted to accurately evaluate student skills. Students will be notified of any changes made.)

The professor reserves the right to adjust the mark up or down 5% based on attendance, participation, leadership, creativity and whether there is an improving trend.

NOTES: If a student misses a test or surprise quiz without contacting the instructor, the Dean's office or the switchboard prior to the test or quiz, a mark of zero will be granted without a re-write option.

A minimum of 80% attendance required in the lectures.

- Makeup Tests are at the discretion of the instructor and will be assigned a maximum grade of 50%.
- The professor reserves the right to adjust the number of tests, practical tests and quizzes based on unforeseen circumstances. The students will be given sufficient notice to any changes and the reasons thereof.
- A student who is absent for 3 or more times without any valid reason or effort to resolve the problem will result in action taken.

NOTE: If action is to be taken, it will range from marks being deducted to a maximum of removal from the course.

The following semester grades will be assigned to students:

<u>Grade</u>	<u>Definition</u>	<u>Grade Point Equivalent</u>
A+	90 – 100%	4.00
A	80 – 89%	3.00
B	70 - 79%	2.00
C	60 - 69%	1.00
D	50 – 59%	0.00
F (Fail)	49% and below	0.00

CR (Credit)	Credit for diploma requirements has been awarded.
S	Satisfactory achievement in field /clinical placement or non-graded subject area.
U	Unsatisfactory achievement in field/clinical placement or non-graded subject area.
X	A temporary grade limited to situations with extenuating circumstances giving a student additional time to complete the requirements for a course.
NR	Grade not reported to Registrar's office.
W	Student has withdrawn from the course without academic penalty.

VI. SPECIAL NOTES:

Attendance:

Sault College is committed to student success. There is a direct correlation between academic performance and class attendance; therefore, for the benefit of all its constituents, all students are encouraged to attend all of their scheduled learning and evaluation sessions. This implies arriving on time and remaining for the duration of the scheduled session.

It is the departmental policy that once the classroom door has been closed, the learning process has begun. Late arrivers will not be granted admission to the room.

VII. COURSE OUTLINE ADDENDUM:

The provisions contained in the addendum located on the portal form part of this course outline.
