

COURSE OUTLINE: GIS424 - INDEPENDENT GIS PROJ

Prepared: Heath Bishop

Approved: Corey Meunier, Chair, Technology and Skilled Trades

| Course Code: Title | GIS424: INDEPENDENT GIS PROJECT | | | | |
|---|--|--|--|--|--|
| Program Number: Name | 4018: GIS-APPLICATION SPEC | | | | |
| Department: | GEOGRAPHIC INFORMATION SYSTEMS | | | | |
| Semesters/Terms: | 20W | | | | |
| Course Description: | This course is designed to continue the development of students skills in project development/management as well as their GIS and cartographic abilities. Each student will come up with their own project idea (or in some cases be given one by the instructor), gather the necessary data, manipulate/edit the data, perform necessary spatial analysis and produce a final GIS report and poster/layout which clearly and aesthetically shows their project findings. ArcGIS will be the primary software used for the project, although supplemental software packages may be used as necessary. The students will hone their GIS skills, as well as perform peer-editing on the final cartographic products. | | | | |
| Total Credits: | 2 | | | | |
| Hours/Week: | 2 | | | | |
| Total Hours: | 24 | | | | |
| Prerequisites: | There are no pre-requisites for this course. | | | | |
| Corequisites: | There are no co-requisites for this course. | | | | |
| Vocational Learning | 4018 - GIS-APPLICATION SPEC | | | | |
| Outcomes (VLO's) addressed in this course: Please refer to program web page for a complete listing of program outcomes where applicable. | VLO 1 Understand the general concepts of spatial information and the current methodologies used to input, store, manipulate, and retrieve this type of data in a computer based environment; VLO 2 Understand the typical data structures, algorithms, and computational problems that are encountered in various GIS technologies; VLO 3 Be aware of the variety of sources of spatial data, such as surveying and remote | | | | |

| | EES 6 | Locate, select, organize, and document information using appropriate technology and information systems. | | | |
|--------------------|-----------------------|--|--|--|--|
| | EES 7 | Analyze, evaluate, and apply relevant information from a variety of sources. | | | |
| | EES 8 | Show respect for the diverse opinions, values, belief systems, and contributions of others. | | | |
| | EES 9 | Interact with others in groups or teams that contribute to effective working relationships and the achievement of goals. | | | |
| | EES 10 | Manage the use of time and other resources to complete projects. | | | |
| | EES 11 | Take responsibility for ones own actions, decisions, and consequences. | | | |
| Course Evaluation: | Passing Grade: 50%, D | | | | |

Other Course Evaluation & Assessment Requirements:

Grade

Definition Grade Point Equivalent

A+ 90 - 100% 4.00 A 80 - 89% B 70 - 79% 3.00

C 60 - 69% 2.00 D 50 - 59% 1.00

F (Fail) 49% and below 0.00

CR (Credit) Credit for diploma requirements has been awarded.

S Satisfactory achievement in field /clinical placement or non-graded subject area.

U Unsatisfactory achievement in field/clinical placement or non-graded subject area. X A temporary grade limited to situations with extenuating circumstances giving a student

additional time to complete the requirements for a course.

NR Grade not reported to Registrar's office.

W Student has withdrawn from the course without academic penalty.

Course Outcomes and Learning Objectives:

| Course Outcome 1 | Learning Objectives for Course Outcome 1 | | |
|--|--|--|--|
| 1. Demonstrate the ability to locate and collect spatial data pertinent to specific GIS projects. | Search out and identify open and proprietary spatial data sources in order to access data necessary for use in GIS projects. | | |
| Course Outcome 2 | Learning Objectives for Course Outcome 2 | | |
| 2. Demonstrate the ability to create, manipulate and edit spatial and aspatial data for project purposes. | Utilize editing tools and various software packages in order to prepare data for entry and use in a GIS system. | | |
| Course Outcome 3 | Learning Objectives for Course Outcome 3 | | |
| 3. Demonstrate problem solving skills by working through a GIS project and performing necessary methodologies and analyses throughout the project. | 3.1 Identify and perform necessary project steps in order to determine accurate results. | | |
| Course Outcome 4 | Learning Objectives for Course Outcome 4 | | |
| 4. Demonstrate the ability to recognize and create aesthetically pleasing map | 4.1 Use various cartographic techniques to optimize the | | |
