I. COURSE DESCRIPTION:

This course traces the development of philosophical thought through eastern and western roots and focuses upon "wisdom" as its key concept; wisdom concerns what is true and important and makes the gaining of knowledge not so much an objective but rather a means to applying what we have learned in a worthwhile manner in our lives. Thus, while you explore the likes of Plato, Aristotle, Kant, Marx in the terms of their historical context and philosophical differences, the subject matter will always be topical, accessible and relevant. While the course necessarily introduces such concepts as the language of logic, metaphysics, dialectic technique, ethics etc. and uses them in the analysis of different philosophies, all subjects are approached in a down-to-earth manner that in no way trivialises them, but rather demands student participation and the forging of connection between thought and action.

Plan to be challenged. Plan to be unsettled! ... and bear in mind a few quotations that set the pace for the course:

'I do not know how to teach philosophy without becoming a disturber of the peace' (Spinoza)

'Faith means not wanting to know' (Nietzsche)

'I think ... therefore I am' (Descartes)

*'The meaning of life is the most urgent of questions'
(Camus)*

*'The recipe for perpetual ignorance is ... be satisfied
with your opinions and content with your knowledge'
(Hubbard)*

'To be .. or not to be. That is the question' (Shakespeare)

II. LEARNING OUTCOMES:

Upon successful completion of the course each student will be able to do the following:

1. Define basic philosophical concepts and terminology;
2. Identify the key movements in philosophy and link individual philosophers with these movements;

3. Paraphrase and summarize the key elements of these philosophers' views;
4. Apply these elements to current life situations;
5. Analyse philosophical views by discussing and debating the issues;
