Nursing Practical Clinical

NOR 206 AND NUR 226

Course Name

Course Number

CALENDAR DESCRIPTION:

Clinical experience provides the opportunity for the students to apply the knowledge and skills necessary to assist clients who require nursing intervention to regain adaptation. The experience takes place in mental health, medical, surgical, paediatric and maternity facilities in hospitals and community health care agencies.

Clients selected range in age from newborn to elderly, and illustrate common physiological and psychosocial health problems.

COMPONENTS OF NURSING PRACTICE COURSE:

1. Community visits
2. Nursing Skills Labs
3. Practice in Health Care Settings (hospitals, community agencies)

PHILOSOPHY/GOALS:

COURSE OBJECTIVES:

1. Demonstrate the use of the nursing process for selected clients who require intervention to regain adaptation.
2. Use adaptation theory as a conceptual basis for nursing practice in assisting clients who require intervention to regain adaptation.
3. Interact in a therapeutic manner with selected clients.
4. Respond to an individual or group in a manner reflecting their worth and dignity.
5. Examine willingly own nursing practice in terms of professional standards.
6. Apply criteria for quality health care in current practice situation.
7. Seek opportunities for own personal and professional development
