SAULT COLLEGE OF APPLIED ARTS AND TECHNOLOGY			
SAULT STE. MARIE, ONTARIO			
Collaborative Nursing Prop			
COURSE OUTLINE			
COURSE TITLE:	Principles of Microbiology		
CODE NO. :	Biol. 2111 SEMESTER: Fall 2002		
PROGRAM:	Collaborative B.Sc.N.		
AUTHOR:	L. Uhlig leslie.uhlig@saultc.on.ca 759-2554 ext. 630		
DATE:	August PREVIOUS OUTLINE DATED: NA		
APPROVED:	2002		
TOTAL CREDITS:	DEAN DATE		
PREREQUISITE(S):	OAC/U level biology or equivalent		
HOURS/WEEK:	3 hours of lecture per week plus 3 hours of laboratory per week		
Copyright © 2002 The Sault College of Applied Arts & Technology Reproduction of this document by any means, in whole or in part, without prior written permission of Sault College of Applied Arts & Technology is prohibited. For additional information, please contact Judi Maundrell, Dean School of Health and Human Services (705) 759-2554, Ext. 603/689			

I. COURSE DESCRIPTION:

This course is an introduction to microbiology and is offered to students in the nursing science program. The topics covered include morphology and structure, classification, microbiology techniques, microbial nutrition, growth, environmental effects on microbes, mutation and genetic recombination, sterilization and disinfection, and antimicrobial chemotherapeutic agents. Students cannot retain credit for both BIOL 2111 and BIOL 2110.

II. LEARNING OUTCOMES AND ELEMENTS OF THE PERFORMANCE:

Upon successful completion of this course, the student will demonstrate the ability to:

- 1. Define the essential differences in structure and function between prokaryotes and eukaryotes.
- **2.** Acquire and utilize the appropriate terminology related to microbiology as a scientific discipline.
- **3.** Acquire the ability to practice asceptic technique both in the laboratory and as it would apply to clinical settings.
- 4. Describe the various types of microbes from a morphological perspective and be able to discuss aspects of their nutritional and growth requirements, reproductive styles, techniques utilized to control their growth, and pathological conditions caused by representative organisms.
- 5. Successfully produce pure cultures of microbes in a variety of media, through experience in the laboratory setting.
- **6.** Demonstrate a facility for the observation of microbes using microscopic, staining and isolation techniques.

III. TOPICS:

- **1.** Introduction to Microbiology
- 2. Prokaryotes and Eukaryotes
- **3.** Nutritional Types of Bacteria
- 4. The Protists
- **5.** The Light Microscope and its Use in Visualizing Microbes Alone or in Combination with Staining Techniques
- 6. How to Cultivate Microbes
- 7. What Microbes Need to Eat; Nutritional Requirements

- 8. How to Isolate a Pure Culture of Microbes
- 9. The Morphology and Structure of Bacteria
- 10. The Naming and Classification of Bacteria; Bergey's Manual
- **11.** The Viruses
- **12.** Microbial Growth
- **13.** The Environment and its Effects on Microbes
- 14. Microbial Genetics: How Microbes Reproduce, Recombine and Mutate
- **15.** How to Kill a Microbe: or, if you can't kill it, at least inhibit its growth
- 16. What to Use for Sterilizing and Disinfection I: Chemical Agents
- **17.** What to Use for Sterilizing and Disinfection II: Physical Agents
- **18.** Disinfection with Chemical and Physical Agents
- **19.** Antimicrobial Chemotherapeutic Agents

IV. REQUIRED RESOURCES/TEXTS/MATERIALS:

I. Edward Alcamo. (2001). Fundamentals of Microbiology (6th ed.). Mississauga: Jones and Bartlett Publishers.

I. Edward Alcamo. (2001). Laboratory Fundamentals of Microbiology (6th ed). Mississauga: Jones and Bartlett Publishers.

I. Edward Alcamo. (2001). Student Study Guide to Accompany "Fundamentals of Microbiology", 6th edition. Mississauga: Jones and Bartlett Publishers.

Note: As a service to students, all three of the above REQUIRED texts are packaged together for a discounted price compared to the separate price for all three.

V. EVALUATION PROCESS/GRADING SYSTEM:

The final grade will be determined based on the following:

Midterm Exam (full lecture period):	30%
Final Exam (3 hour)	50%
Laboratory Quizzes (12; count best 10)	20%

Laboratory quizzes will be based on work covered in the PREVIOUS week's laboratory AND on the background material leading up to the CURRENT week's laboratory.

Note: Students who miss either the midterm or the final exam without notifying the instructor (759-2554 ext. 630) BEFORE the exam will receive a zero (0) grade for that exam. It is STRONGLY recommended that students who miss the exam for an emergency reason contact the instructor (via phone or email) before the exam to alert the instructor of the absence; on the first day back to classes IT IS THE STUDENT'S RESPONSIBILITY to contact the instructor to arrange an alternate exam date. Missed laboratory quizzes will receive a zero (0) grade.

The following semester grades will be assigned to students in postsecondary courses:

		Grade Point
<u>Grade</u>	Definition	<u>Equivalent</u>
A+	90 - 100%	4.00
А	80 - 89%	3.75
В	70 - 79%	3.00
С	60 - 69%	2.00
R (Repeat)	59% or below	0.00
CR (Credit)	Credit for diploma requirements has been	
	awarded.	
S	Satisfactory achievement in field placement	
	or non-graded subject areas.	
U	Unsatisfactory achievement in field	
	placement or non-graded subject areas.	
Х	A temporary grade. This is used in limited	
	situations with extenuating circumstances	
	giving a student additional time to complete	
	the requirements for a course (see Policies &	
	Procedures Manual – Deferred Grades and	
	Make-up).	
NR	Grade not reported to Registrar's office. This	
	is used to facilitate transcript preparation	
	when, for extenuating circumstances, it has	
	not been possible for the faculty member to	
	report grades.	

VI. SPECIAL NOTES:

Special Needs:

If you are a student with special needs (e.g. physical limitations, visual impairments, hearing impairments, or learning disabilities), you are encouraged to discuss required accommodations with your instructor and/or the Special Needs office. Visit Room E1204 or call Extension 493, 717, or 491 so that support services can be arranged for you.

Retention of course outlines:

It is the responsibility of the student to retain all course outlines for possible future use in acquiring advanced standing at other postsecondary institutions.

Plagiarism:

Students should refer to the definition of "academic dishonesty" in *Student Rights and Responsibilities*. Students who engage in "academic dishonesty" will receive an automatic failure for that submission and/or such other penalty, up to and including expulsion from the course/program, as may be decided by the professor/dean. In order to protect students from inadvertent plagiarism, to protect the copyright of the material referenced, and to credit the author of the material, it is the policy of the department to employ a documentation format for referencing source material.

Course outline amendments:

The Professor reserves the right to change the information contained in this course outline depending on the needs of the learner and the availability of resources.

Substitute course information is available in the Registrar's office.

VII. PRIOR LEARNING ASSESSMENT:

Students who wish to apply for advanced credit in the course should consult the professor. Credit for prior learning will be given upon successful completion of a challenge exam or portfolio.

VIII. DIRECT CREDIT TRANSFERS:

Students who wish to apply for direct credit transfer (advanced standing) should obtain a direct credit transfer form from the Dean's secretary. Students will be required to provide a transcript and course outline related to the course in question.
