I. COURSE DESCRIPTION:

This nursing practice course will provide the opportunity to develop caring relationships with people experiencing *episodic health challenges*. Experiences will include the care of individuals and families in a variety of acute care settings as well as in the transition from hospital to home.

Class: 3 hours

Laboratory: 2 hours + 1 hour practice lab (mandatory)

Practice Labs: You are required to attend practice labs each week. Practice labs are mandatory. This is scheduled as the third hour of lab each week. If you do not attend these labs, you will not be able to pass the course.

Clinical: 108 hours, Groups posted on Year II board. Schedule to be determined in collaboration with clinical teachers.

II. LEARNING OUTCOMES AND ELEMENTS OF THE PERFORMANCE:

ENDS-IN-VIEW

This course will provide the learners opportunities to practice professionally, promote a safe and supportive environment, and develop caring relationships as they engage with individuals experiencing an acute health challenge. Within the classroom laboratory setting and health care setting, learners will have an opportunity to develop beginning nursing therapeutics including: medication administration (i.e. oral, topical, and parenteral); oxygen therapy; sterile technique (i.e. dressing changes), urinary catheterization and enteral feedings.

PROCESS

It is the intention that caring relationships develop between faculty and learners, modeling the type of relationships learners will develop with clients. It is intended that learners will derive knowledge from critically reflecting on both practical experience and theoretical learning. It is the faculty's intent to explore with the learner the role of the nurse working with individuals experiencing acute health challenges
