The learner is expected to be prepared for class and to actively engage in the ideas expressed in class. Attendance in GPA seminar is mandatory.					

to reflect on their application in practice as a means to becoming a nurse.

GPA previously obtained will help with assignment number one. To facilitate learning, and your assignment number two, practice times will be provided for recording for assignment number two. This can be done in the apartment lab with equipment borrowed from the library or your own equipment during open lab hours and in the classroom weekly at the scheduled practice times. Respecting that recording may not initially be a comfortable learning style for some, it is important for students to remain in the learning groups assigned by the professor (ongoing feedback with familiar peers over time will help to facilitate student learning). Practicing outside of lab/classroom time is viewed as a success strategy and is highly recommended.

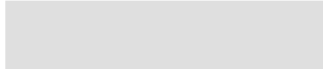

Students who successfully complete the online learning modules provided will receive the certificate of the online course if provided. In addition, this course is supported by the Colleges Learning Management System (LMS).

Evaluation Process and Grading System:

Evaluation Type	Evaluation Weight	Course Outcome Assessed
Analysis Paper	30%	
Quiz 1	10%	
Quiz 2	10%	
Video and Essay	50%	

Date:

October 22, 2018

Please refer to the course outline addendum on the Learning Management System for further information.
