

COURSE OUTLINE: OPA130 - CLINICAL PATHO I

Prepared: Joanna MacDougall

Approved: Bob Chapman, Chair, Health

Program Number: Name 3022: OCCUP/PHYSIO/ASSIST					
Department: OTA/PTA ASSISTANT Semesters/Terms: 21W Course Description: The purpose of this course is to introduce the student to the clinical presentation of common disabling conditions emphasized will be mainly neurological, cardiorespiratory and/or endocrine in nature. Relevant nantomy/physiology will be reviewed and/or taught prior to the student gaining familiarity with the clinical presentation of the conditions, the associated relevant pathology, and the general goals of intervention of Physiotherapy and/or Occupational Therapy. Total Credits: 3 Hours/Week: 3 Total Hours: OPA103, OPA104, OPA118 Corequisites: OPA106 OPA203, OPA204, OPA214, OPA216, OPA228 This course is a pre-requisite for: Vocational Learning Outcomes (NLO's) addressed in this course: Please refer to program web page for a complete listing of program outcomes where applicable. VLO 2 Participate in the effective functioning of interprofessional health care teams within the role of the therapist assistant. VLO 8 Perform effectively within the roles and responsibilities of the therapist assistant thrrough the application of relevant knowledge of health sciences, psychosociological sciences, and health conditions. VLO 9 Perform functions common to both physiotherapy and occupational therapy practices that contribute to the development, implementation and modification of intervention/treatment plans, under the supervision of and in collaboration with the occupational therapist and/or physiotherapist. Essential Employability Skills (EES) addressed in this course: ESS 1 Communicate clearly, concisely and correctly in the written, spoken, and visual form that fulfills the purpose and meets the needs of the audience. EES 2 Respond to written, spoken, or visual messages in a manner that ensures effective communication.	Course Code: Title	OPA130: CLINICAL PATHOLOGY I			
Course Description: The purpose of this course is to introduce the student to the clinical presentation of common disabling conditions which are managed by Occupational Therapy and Physiotherapy. The conditions emphasized will be mainly neurological, cardiorespiratory and/or endocrine in nature. Relevant anatomy/physiology will be reviewed and/or taught prior to the student gaining familiarity with the clinical presentation of the conditions, the associated relevant pathology, and the general goals of intervention of Physiotherapy and/or Occupational Therapy. Total Credits:	Program Number: Name	3022: OCCUP/PHYSIO/ASSIST

	EES 5	Use a variety of thinking skills to anticipate and solve problems.			
	EES 6	Locate, select, organize, and document information using appropriate technology and information systems.			
	EES 7	Analyze, evaluate, and apply relevant information from a variety of sources.			
	EES 8	Show respect for the diverse opinions, values, belief systems, and contributions of others.			
	EES 9	Interact with others in groups or teams that contribute to effective working relationships and the achievement of goals.			
	EES 10	Manage the use of time and other resources to complete projects.			
	EES 11	Take responsibility for ones own actions, decisions, and consequences.			
Course Evaluation:	Passing Grade: 60%, C				
	A minimum program GPA of 2.0 or higher where program specific standards exist is required for graduation.				
Books and Required Resources:	Essentials of Human Diseases and Conditions by Frazier Publisher: Elsevier - Health Sciences Division Edition: 6th ISBN: 9780323228367				
	This text is also used in OPA216. by Additional texts from year one may be used.				
Course Outcomes and Learning Objectives:	Course	Outcome 1	Learning Objectives for Course Outcome 1		
	knowled anatomy	onstrate general ge of relevant r, physiology and velopment.	1.1 Identify the physiology of normal cell function. 1.2 Identify and state normal function of the major parts of the Central Nervous System, Peripheral Nervous System, Immunologic System, Endocrine System, Cardiac System and Respiratory System. 1.3 Identify the stages of normal development of the central nervous system.		
	Course	Outcome 2	Learning Objectives for Course Outcome 2		
		ibe the general role ndocrine system.	2.1 Define the following: hormone, target organ/tissue, endocrine gland, exocrine gland. 2.2 Explain how endocrine glands are regulated. 2.3 Identify specified endocrine glands on a diagram, chart or model. 2.4 Explain the function of key hormones as they relate to other systems in the body (neurological, cardiac, respiratory, musculoskeletal)		
	Course	Outcome 3	Learning Objectives for Course Outcome 3		
	understa etiology, and clini	enstrate an anding of the pathophysiology, cal presentation of injury and	3.1 Describe the general principles of disease and injury (alterations in normal cell function, structure, growth and differentiation, inflammation, wound healing and neoplasia) related to pathophysiology. 3.2 Describe the etiology, pathophysiology and clinical presentation of common conditions in the following categories: -Endocrine Disorders
