

I. COURSE DESCRIPTION:

This course continues application development in Java with an emphasis in web application development. Various technologies and application frameworks will be introduced. Traditional form based web applications will be built using servlets, java server pages and struts while applications that feature newer Ajax functionality will be written using the Google Web Toolkit (GWT). Students will develop the ability to write form based CRUD (Create, Read, Update and Delete) applications, persisting data to a database backend using each of the aforementioned technologies. Applications will be written using the Eclipse IDE and the MySql database.

II. LEARNING OUTCOMES AND ELEMENTS OF THE PERFORMANCE:

Upon successful completion of this course, the student will demonstrate the ability to:

1. Create databases.

Potential Elements of the Performance:

This section builds on, and applies skills developed in previous courses to...

- Create database schemas using various tools.
- Manage database schema using various tools.
- Understand the relational database model and apply that understanding to the creation of various related tables.
- Create tables related through primary and foreign keys.
- Create one to one, one to many and many to many relationships between tables.
- Perform queries and data manipulation through the use of appropriate sql statements.
- Understand the role of java ee in the programmed access of data.
- Create entity classes that model database data.
- Create data access objects.
- Write java code that retrieves data from databases.

2. Develop Servlet based applications.

Potential Elements of the Performance:

- Identify the various components of a generic web application including the client, the server, the http request, the http response, server side components and databases.
- Identify the role of the servlet in a web application.
- Identify the various parts of the Web Application Life cycle

including code development, management of deployment descriptors, project compile, application packaging and application deployment.

- Identify the various parts of the servlet life cycle including servlet loading and initialization (`init()`), the invocation of its service methods and servlet unload (`destroy`).
- Identify various life cycle events.
- Write context listeners.
- Identify the four scope objects and understand and apply their use in the sharing of data. The objects include the web context, the session, the request and the page objects.
- Write a servlet based web application that demonstrates knowledge of the servlet life cycle and can respond to servlet initialization, context listener events, client side requests, and provide responses back to the client.
- Write a servlet based application that can access, modify and persist data in a database (perform CRUD operations).
- Write client side code to create a form based interface to the application.
- Understand sessions and write code that applies knowledge of sessions to provide application authentication and per user data management.

3. Develop Java Server Pages based applications.

Potential Elements of the Performance:

- Identify the role of a jsp page in a web application and its relationship to servlets.
- Identify the main features of jsp technology including its ability to process requests, create responses, to access server side objects and its extensibility.
- Identify the structure of a jsp page.
- Identify and apply various jsp tags in the writing of a jsp page.
- Write jsp pages that access and display server side data.

4. Develop Struts based applications

Potential Elements of the Performance:

- Identify the limitations of servlet and jsp based web applications and identify the role of struts in addressing those limitations.
- Understand the Model View Controller architecture and identify components of a struts based web application that apply to that architecture.
- Understand the role of a struts controller.

- Write jsp based views.
- Write action classes to respond to client requests.
- Write action form beans that transfer data between views and actions.
- Write a struts based application that demonstrates the ability to access, modify and persist data in a database (perform CRUD operations).

5. Develop Ajax based applications using Google Web Toolkit.

Potential Elements of the Performance:

- Define the term Web 1.0 and be able to identify the characteristics of a Web 1.0 application.
- Define the term Web 2.0 and be able to identify the characteristics of a Web 2.0 application.
- Define the term AJAX and understand its role in Web 2.0 applications.
- Identify the components of a client side AJAX application.
- Download and install the google web toolkit (GWT).
- Identify the role of GWT in the writing of AJAX applications.
- Write a simple application using GWT that demonstrate and incorporate the following
 - The structure of a GWT project.
 - GWT layout widgets including vertical and horizontal panels.
 - GWT widgets including Labels and Buttons.
 - Write event handlers for various widgets including buttons.
 - Communicate and transfer data with a server using RPC.
- Write a GWT based application that demonstrates the ability to access, modify and persist data in a database (perform CRUD operations).

III. TOPICS:

1. Create databases.
2. Develop Servlet based applications.
3. Develop Java Server Pages based applications.
4. Develop Struts based applications
5. Develop Ajax based applications using Google Web Toolkit.

IV. REQUIRED RESOURCES/TEXTS/MATERIALS:

Java EE 5 Tutorial in PDF format:
download from

<http://java.sun.com/javase/5/docs/tutorial/doc/JavaEETutorial.pdf>

- Instructor supplied notes.

V. EVALUATION PROCESS/GRADING SYSTEM:

	<i>Weight</i>
Tests	
Topic 1 and 2	20%
Topic 3 and 4	20%
Topic 5	10%
Labs	
Exercise 1	2.5%
Exercise 2	2.5%
Exercise 3	2.5%
Exercise 4	2.5%
Exercise 5	2.5%
Exercise 6	2.5%
Assignment 1	10%
Assignment 2	10%
Assignment 3	10%
Assignment 4	5%
Totals:	100%

The following semester grades will be assigned to students:

Grade	Definition	<i>Grade Point Equivalent</i>
A+	90 – 100%	4.00
A	80 – 89%	
B	70 - 79%	3.00
C	60 - 69%	2.00
D	50 – 59%	1.00
F (Fail)	49% and below	0.00
CR (Credit)	Credit for diploma requirements has been awarded.	
S	Satisfactory achievement in field /clinical placement or non-graded subject area.	
U	Unsatisfactory achievement in field/clinical placement or non-graded subject area.	
X	A temporary grade limited to situations with extenuating circumstances giving a	

	student additional time to complete the requirements for a course.
NR	Grade not reported to Registrar's office.
W	Student has withdrawn from the course without academic penalty.

VI. SPECIAL NOTES:

Attendance:

Sault College is committed to student success. There is a direct correlation between academic performance and class attendance; therefore, for the benefit of all its constituents, all students are encouraged to attend all of their scheduled learning and evaluation sessions. This implies arriving on time and remaining for the duration of the scheduled session.

Absenteeism will affect a student's ability to succeed in this course.

Absences due to medical or other unavoidable circumstances should be discussed with the professor. Students are required to be in class on time and attendance will be taken within the first five minutes of class. A missed class will result in a penalty in your marks unless you have discussed your absence with the professor as described above. The penalty depends on course hours and will be applied as follows:

Course Hours	Deduction
5 hrs/week (75 hrs)	1% / hr
4 hrs/week (60 hrs)	1.5% /hr
3 hrs/week (45 hrs)	2% /hr
2 hrs/week (30 hrs)	3%/hr

Absentee reports will be discussed with each student during regular meetings with Faculty Mentors. Final penalties will be reviewed by the professor and will be at the discretion of the professor.

VII. COURSE OUTLINE ADDENDUM:

1. Course Outline Amendments:

The professor reserves the right to change the information contained in this course outline depending on the needs of the learner and the availability of resources.

2. Retention of Course Outlines:
It is the responsibility of the student to retain all course outlines for possible future use in acquiring advanced standing at other postsecondary institutions.
3. Prior Learning Assessment:
Students who wish to apply for advance credit transfer (advanced standing) should obtain an Application for Advance Credit from the program coordinator (or the course coordinator regarding a general education transfer request) or academic assistant. Students will be required to provide an unofficial transcript and course outline related to the course in question. Please refer to the Student Academic Calendar of Events for the deadline date by which application must be made for advance standing.

Credit for prior learning will also be given upon successful completion of a challenge exam or portfolio.

Substitute course information is available in the Registrar's office.

4. Accessibility Services:
If you are a student with a disability (e.g. physical limitations, visual impairments, hearing impairments, or learning disabilities), you are encouraged to discuss required accommodations with your professor and/or the Accessibility Services office. Visit Room E1101 or call Extension 2703 so that support services can be arranged for you.
5. Communication:
The College considers ***Desire2Learn (D2L)*** as the primary channel of communication for each course. Regularly checking this software platform is critical as it will keep you directly connected with faculty and current course information. Success in this course may be directly related to your willingness to take advantage of this Learning Management System (LMS) communication tool.
6. Plagiarism:
Students should refer to the definition of “academic dishonesty” in *Student Code of Conduct*. Students who engage in academic dishonesty will receive an automatic failure for that submission and/or such other penalty, up to and including expulsion from the course/program, as may be decided by the professor/dean. In order to protect students from inadvertent plagiarism, to protect the copyright of the material referenced, and to credit the author of the material, it is the policy of the department to employ a documentation format for referencing source material.

7. Tuition Default:

Students who have defaulted on the payment of tuition (tuition has not been paid in full, payments were not deferred or payment plan not honoured) as of the first week of November will be removed from placement and clinical activities due to liability issues. This may result in loss of mandatory hours or incomplete course work. Sault College will not be responsible for incomplete hours or outcomes that are not achieved or any other academic requirement not met as of the result of tuition default. Students are encouraged to communicate with Financial Services with regard to the status of their tuition prior to this deadline to ensure that their financial status does not interfere with academic progress.
8. Student Portal:

The Sault College portal allows you to view all your student information in one place. **mysaultcollege** gives you personalized access to online resources seven days a week from your home or school computer. Single log-in access allows you to see your personal and financial information, timetable, grades, records of achievement, unofficial transcript, and outstanding obligations, in addition to announcements, news, academic calendar of events, class cancellations, your learning management system (LMS), and much more. Go to <https://my.saultcollege.ca>.
9. Electronic Devices in the Classroom: Students who wish to use electronic devices in the classroom will seek permission of the faculty member before proceeding to record instruction. With the exception of issues related to accommodations of disability, the decision to approve or refuse the request is the responsibility of the faculty member. Recorded classroom instruction will be used only for personal use and will not be used for any other purpose. Recorded classroom instruction will be destroyed at the end of the course. To ensure this, the student is required to return all copies of recorded material to the faculty member by the last day of class in the semester. Where the use of an electronic device has been approved, the student agrees that materials recorded are for his/her use only, are not for distribution, and are the sole property of the College.
