## I. COURSE DESCRIPTION:

The objectives of this course are to develop the student's skill in performing algebraic operations including exponents, radicals, fractional equations, and variation and in solving and graphing linear and quadratic equations.

### **Technical Option:**

A survey of geometry will enable the student to identify a variety of basic plan and solid figures encountered and to determine their perimeters, areas, and volumes appropriately in both British and metric units.

The student will use trigonometry to find both sides and angles in right and oblique triangles.

### **Business Option:**

The student's skill in solving problems involving percent will be developed.

An introduction will be made to the mathematics of buying and selling.

The student will solve for the unknown quantity in simple interest, bank discount, compound interest, and present value questions.

## II. STUDENT PERFORMANCE OBJECTIVES:

The basic objectives are that the student will develop an understanding of the method studied, demonstrate a knowledge of the facts presented and show an ability to use them in the solution of problems. To accomplish these objectives, exercises are assigned. The questions will be of near equal difficulty to questions assigned in the exercises. The level of competency demanded is the level required to obtain an overall passing average on tests. The material to be covered is listed below.

**III. TOPICS TO BE COVERED:****Approximate Time Frame**

1. Basic Concepts	5 hours
2. Exponents and Radicals	5 hours
3. Fractional Equations	5 hours
4. Variation	5 hours
5. Graphing Linear Equations	10 hours
6. Quadratics and Circles	10 hours
	<hr/>
	40 HOURS

**Technical Option:**

7. Units of Measurement	10 hours
8. Geometry	15 hours
9. Trigonometry	10 hours
10. Statistics	5 hours
	<hr/>
	40 HOURS

**Business Option:**

11. Percent	5 hours
12. Mathematics of Buying and Selling	15 hours
13. Simple Interest	10 hours
14. Bank Discount, Compound Interest, and Present Value	5 hours
	<hr/>
	40 HOURS

**IV. LEARNING ACTIVITIES:**

TOPIC DESCRIPTION	REQUIRED STUDENT TEXTBOOK	REFERENCE CHAPTER ASSIGNMENTS
<b>BASIC CONCEPTS</b>		
Order of Operations	Ewen	Ex. 1.2 pages 10-13
Addition of Signed Numbers	Ewen	Ex. 1.6 pages 28-32
Subtraction of Signed Numbers	Ewen	Ex. 1.7 pages 32-34
Multiplication and Division of Signed Numbers	Ewen	Ex. 1.8 pages 34-36
Addition of Real Numbers	Keedy	Ex. 3.3 pages 177-182
Subtraction of Real Numbers	Keedy	Ex. 3.4 pages 183-190
Multiplication of Real Numbers	Keedy	Ex. 3.5 pages 191-196
Division of Real Numbers	Keedy	Ex. 3.6 pages 197-202
Properties of Real Numbers	Keedy	Ex. 3.7 pages 203-214
<b>EXPONENTS AND RADICALS</b>		
Multiplication of Monomials	Ewen	Ex. 6.4 pages 210-212
Division by a Monomial	Ewen	Ex. 6.6 pages 215-217
Radicals	Ewen	Handout
Exponential Notation and Order of Operations	Keedy	Ex. 3.8 pages 215-222
Properties of Exponents and Scientific Notation	Keedy	Ex. 3.9 pages 223-232
Introduction to Roots and Radical Expressions	Keedy	Ex. 10.1 pages 609-614
Multiplying and Simplifying Radical Expressions	Keedy	Ex. 10.2 pages 615-620
Operations with Radical Expressions	Keedy	Ex. 10.4 pages 625-630
Rational Numbers as Exponents	Keedy	Ex. 10.6 pages 639-644
<b>FRACTIONAL EQUATIONS</b>		
Equations with Fractions	Ewen	Ex. 7.4 pages 233-237
Formulas	Ewen	Ex. 7.7 pages 244-247
Substituting Data into Formulas	Ewen	Ex. 7.8 pages 247-251
Solving Rational Equations	Keedy	Ex. 9.3 pages 567-572
Formulas	Keedy	Ex. 9.5 pages 583-586
<b>VARIATION</b>		
Direct Variation	Ewen	Ex. 8.4 pages 268-275
Inverse Variation	Ewen	Ex. 8.5 pages 275-279
Variation	Keedy	Ex. 9.7 pages 593-602

## V. REQUIRED RESOURCES / TEXTS / MATERIALS:

1. Textbook: Ewen, D. and Nelson, R. (1994), "Elementary Technical Mathematics", Sixth Edition, Toronto: PWS Publishing Company.

The Business Option section requires the textbook: "Mathematics for Business Careers", Second Edition, by Cain and Carman. This textbook may be available from the Learning Assistance Centre.

During the 1997/98 school year, those students who have already purchased the textbook, "Essential Mathematics", by Keedy, Bittinger, and Rudolph may continue to use their textbook.

2. Calculator: (Recommended) SHARP Scientific Calculator EL-531G. The use of some kinds of calculators may be restricted during tests.

## VI. EVALUATION PROCESS/GRADING SYSTEM:

### Pretest

There is a pretest for each module of MTH 93. You can choose to do the pretest for a particular module when you reach it during the course. If you score 80% or better on a pretest, you will be exempted from the module. You can complete modules that you have been exempted from; however, no test marks will be recorded for those modules. You will receive credit (CR) only.

Should pretesting indicate that you need to complete two or less modules, you will be granted a credit for the course after you have completed some supplemental work and further assessment. The professor of the course for which credit is being granted will arrange for your supplemental work and assessment.

### Attendance

It is your responsibility to attend all classes during the semester. Research indicates there is a high correlation between attendance and student success.

### Assignments and Tests

The MTH 93 course is delivered in a student-paced mode. You work through the module at your own pace. You decide when you are ready to be evaluated on each module.

The Module topics and the text book references, including assignment pages, are listed in the "Learning Activities" section of this course outline.

**VI. EVALUATION PROCESS/GRADING SYSTEM (cont'd):**

You may find the method outlined below helpful as you begin to work on your course:

**A. Complete the Module**

1. Read through each teaching section.
2. Take notes on all main points and give examples.
3. Practise the skill using questions in the exercises provided. Complete all work showing the steps required to solve.
4. Determine whether you are ready to proceed by checking your answers in the answer keys.
5. Discuss any questions with your professor before going ahead to the next skill.
6. Complete enough questions to ensure understanding of the skill.
7. Proceed to the next skill and repeat the above instructions.

**B. Complete the Review**

1. Review your notes and examples as well as any appropriate "Summary of Chapters" from the text.
2. Answer all questions on appropriate Self-Tests without checking back to instructional modules.
3. Check your answers in the answer keys.
4. Review any problems from the Self-Tests with your professor to ensure understanding.

**C. Write the Test**

1. Let your professor know you are ready to write the test so that the testing form can be completed.
2. Arrange to write your test at the Testing Centre.
3. Write the test at the arranged time. Bring all necessary supplies.
4. Obtain results from your professor.
5. Review your test noting any areas that require further work.
6. Proceed to next module once minimum pass grade has been reached.

You will need a 60%\* or better to pass a module. If you score below 60%\*, you will be allowed to write a second test after further study. If you score below 60%\* on the second test, you will meet with the professor to discuss the matter. The marks of all tests required to pass a module will be averaged to determine the module grade.

**VI. EVALUATION PROCESS/GRADING SYSTEM (cont'd):**

College Preparatory Mathematics

MTH 93-5

**Course Name****Code No.**

All module grades will be averaged to determine the final grade. If your average is below 60%\* you will still pass the course provided you have passed all the modules. The College grading system\* will be used to assign letter grades.

**METHOD OF ASSESSMENT (GRADING METHOD):**

A+	Consistently outstanding	(90% - 100%)
A	Outstanding Achievement	(80% - 89%)
B	Consistently above average achievement	(70% - 79%)
C	Satisfactory or acceptable achievement in all areas subject to assessment	(60% - 69%)
X or R	A temporary grade, limited to situations with extenuating circumstances, giving a student additional time to complete course requirements <b>(See below)</b>	
R	Repeat - The student has not achieved the objectives of the course, and the course must be repeated	(0% - 59%)
CR	Credit exemption	

An "X" grade will be issued to a student who has not completed all the required course modules in a semester, provided the student has attended 80% of the classes, has shown regular progress and will be able to complete the course within a limited amount of time.

If an "X" grade is not cleared by the specified date, it will become an "R" grade.

**VII. SPECIAL NOTES:****Special Needs**

If you are a student with special needs (e.g. physical limitations, visual impairments, hearing impairments, learning disabilities), you are encouraged to discuss required accommodations with the instructor and/or contact the Special Needs Office, Room E1204, Ext. 493, 717, 491 so that support services can be arranged for you.

**Advanced Standing**

Students who have completed an equivalent post-secondary course must bring relevant documents to the Coordinator, Mathematics Department.

College Preparatory Mathematics  
**Course Name**

MTH 93-5  
**Code No.**

## **VII. SPECIAL NOTES:**

### **Retention of Course Outlines**

It is the responsibility of the student to retain all course outlines for possible future use in gaining advanced standing at other post-secondary institutions.

Substitute course information is available at the Registrar's office.

The instructor reserves the right to alter the course as he/she deems necessary to meet the needs of the students.

## **VIII. PRIOR LEARNING ASSESSMENT:**

Students who wish to apply for advanced credit in the course should consult the instructor or the Prior Learning Assessment Office (E2203).
