

I. COURSE DESCRIPTION:

This is the second level mathematics course for the pre-health program. Building on the concepts explored in the first course, the focus is on quadratic, exponential, and logarithmic functions. Also explored are a variety of data analysis techniques.

II. LEARNING OUTCOMES AND ELEMENTS OF THE PERFORMANCE:

Upon successful completion of this course, the student will demonstrate the ability to:

1. Solve quadratic equation by factoring, using quadratic formula, and graphically.
2. Graph exponential and logarithmic equations.
3. Solve exponential and logarithmic equations.
4. Interpret, analyse, and summarize data graphically and numerically using a variety of tools and strategies.
5. Solve applied problems involving quadratic, exponential, and logarithmic functions as well as scenarios involving normal distribution.
