

COURSE OUTLINE: MTH190 - MATH I

Prepared: Mathematics Department Approved: Sherri Smith, Chair, Natural Environment, Business, Design and Culinary

Course Code: Title	MTH190: MATH I FOR PADD			
Program Number: Name	3065: PRE-HEALTH DIP DGR			
Department:	PRE-HEALTH			
Semesters/Terms:	19F, 20W			
Course Description:	By the end of this course, students will have demonstrated the ability to evaluate a variety of arithmetic and algebraic expressions and apply these principles to typical situations that arise in health care fields. Concepts studied include numeracy fundamentals, systems of measurement and dimensional analysis, and algebra, with an emphasis on analytical techniques. Linear functions will be studied and students will demonstrate the ability to graph, describe, and evaluate linear functions. Students will develop essential critical thinking and problem-solving skills through exposure to application problems.			
Total Credits:	4			
Hours/Week:	4			
Total Hours:	60			
Prerequisites:	There are no pre-requisites for this course.			
Corequisites:	There are no co-requisites for this course.			
This course is a pre-requisite for:	MTH191			
Vocational Learning Outcomes (VLO's) addressed in this course: Please refer to program web page for a complete listing of program	 3065 - PRE-HEALTH DIP DGR VLO 3 Solve numeric problems and interpret data related to health sciences and other science-related fields using mathematical concepts, including algebra and probability, along with descriptive and inferential statistics. 			
outcomes where applicable.				
Essential Employability Skills (EES) addressed in this course:	 EES 3 Execute mathematical operations accurately. EES 4 Apply a systematic approach to solve problems. EES 5 Use a variety of thinking skills to anticipate and solve problems. EES 10 Manage the use of time and other resources to complete projects. 			
Course Evaluation:	Passing Grade: 50%, D			
Books and Required Resources:	Mathematics for Health Sciences by Lee Publisher: Vretta Inc. ISBN: 9781927737095 Statistics for Health Sciences by Lee Publisher: Vretta Inc. ISBN: 9781927737248

Course Outcomes and	Course Outcome 1	Learning Objectives for Course Outcome 1
Learning Objectives:	1. Numeracy Fundamentals.	 1.1 Identify numbers in their various forms: whole number, integers, and rational numbers (fractions and decimals). 1.2 Identify and correctly use inequality symbols, absolute values, and exact numbers. 1.3 Add, subtract, multiply, and divide whole numbers, integers, and rational numbers without a calculator. 1.4 Evaluate multi-step mathematical expressions, including exponential and square root expressions, with number in their various forms: whole, integers, and rational numbers. 1.5 Solve applied problems with numbers in their various forms by applying problem solving strategies and arithmetic skills. 1.6 Define and differentiate between accuracy and precision. 1.7 Determine the number of significant digits in a measurement, and apply the rules of addition/subtraction and multiplication/division to determine the appropriate number of significant digits in an answer. 1.8 Convert numbers between decimal form and scientific notation. 1.9 Perform arithmetic operations on numbers in scientific notation. 1.12 Solve application problems involving ratios, proportion. 1.13 Convert between ratios, fractions, decimals, and percents. 1.14 Solve application problems involving ratios, proportion. 1.15 Utilize metric system prefix names and symbols. 1.16 Perform metric system conversions without the use of a conversion chart. 1.17 Perform dimensional analysis for US Customary and metric measurement system conversions. 1.18 Solve application problems involving perimeter, area, we have a spin application problems involving perimeter, area, we have a spin application problems involving perimeter, area, we have a spin application problems involving perimeter, area, we have a spin application problems involving perimeter, area, we have a spin application problems involving perimeter, area, we have a spin application problems involving perimeter, area, we have a spin application problems
	Course Outcome 2	Learning Objectives for Course Outcome 2
	2. Algebra.	 2.1 Simplify algebraic expressions using the laws of exponents, commutative, associative, and distributive properties. 2.2 Evaluate algebraic expressions by substituting known values for the variables. 2.3 Divide polynomials by monomials. 2.4 Solve linear equations, including rational equations containing constant denominators, for one variable. 2.5 Solve word problems by translating verbal phrases into algebraic expressions.
