

I. COURSE DESCRIPTION:

This course will cover Hydraulics and Pneumatics. On completion of the course, the student will understand basic hydraulic/pneumatic theory. Discussion will include advantages, design, safety, servicing, replacing parts, conducting lines, proper installation, functions of fluids, and troubleshooting. Reservoirs, filters, pumps, valves, motors, actuators, accumulators and various other pieces of equipment will be discussed. The student will be able to design, draw and assemble schematic circuits using Vickers' trainers and the Lab-Volt computerized simulators. Modern testing equipment will be used to test circuits and valves.

II. LEARNING OUTCOMES AND ELEMENTS OF THE PERFORMANCE:

Upon successful completion of this course, the student will demonstrate the ability to:

1. *Discuss the physical laws and concepts dealing with hydraulics and pneumatics.*Potential Elements of the Performance:

- Pascal's Law - force / area / pressure
- Conservation of Energy Law
- Boyle's Law
- Bernoulli's Law
- Bramah's design
- Laminar / turbulent flows
- Gauge / atmospheric pressures
- Basic design calculations
- Velocity characteristics
- Discuss aeration, cavitation, pump flow

2. *Outline the advantages of hydraulics*Potential Elements of the Performance:

- Compare hydraulics to other sources
- Understand why hydraulics is used today

3. *Be knowledgeable in the safety measures used in hydraulics*Potential Elements of the Performance:

- List proper safety measures to be used when servicing hydraulics/pneumatics systems
- Understand how to adjust valves using safe practices
- Be able to safely replace components on a any system using safe work practices
- Understand safe lock out practices for systems
- Understand the dangers involved in various types of high

pressure hydraulics

4. ***Types of hydraulic and pneumatic conductors used today***

Potential Elements of the Performance:

- Discuss various types of steel piping and fittings used in hydraulics
- Discuss various types of tubing and fittings used today
- Discuss hydraulic hoses used
- Discuss sizing, grade, strength, and safety rating of each type of conductor
- Discuss proper installation techniques for each type of conductor

5. ***Hydraulic Fluids***

Potential Elements of the Performance:

- Understand the functions of fluids in hydraulic systems
- Be knowledgeable of the various types of hydraulic fluids used and why
- Understand basic fluid conditioning monitoring needed
- Discuss proper filtering methods and ratings used today
- Discuss proper testing methods available today

6. ***Hydraulic and Pneumatic Components / Accessories***

Potential Elements of the Performance:

Discuss various hydraulic components, and their purpose in hydraulic systems such as:

- Reservoirs
- Pumps/Compressors
- Filters
- Directional valves
- Relief valves
- Pressure valves
- Actuators
- Accumulators and other system accessories

7. ***Systems***

Potential Elements of the Performance:

- Be able to draw, and hook up various circuits on the Vickers's trainers in the Lab as assigned.
- Simulate circuits using Lab-Volt computerized programs
- Perform basic troubleshooting on the Trainers as assigned
- Be able to perform basic preventative maintenance measures

III. TOPICS:

1. Physical laws and concepts dealing with hydraulics/pneumatics
2. Advantages of hydraulics/comparing pneumatics
3. Safety measures used in hydraulics/pneumatics
4. Conducting lines and fittings
5. Hydraulic fluids
6. Components and accessories/Lab-Volt/Vickers Trainers
7. Systems and troubleshooting/Lab-Volt/Vickers Trainers

IV. REQUIRED RESOURCES/TEXTS/MATERIALS:

Millwright manual, handouts, safety glasses, lab coat, calculator
(student must access Lab-Volt simulators on school computers)

V. EVALUATION PROCESS/GRADING SYSTEM:

Tests 40%

Assignments 40%

Final Exam 10%

Student personal performance 10% (Will be explained in detail in class)

Note: 1% of final mark deducted for every inexcusable missed hour of class.

The following semester grades will be assigned to students in postsecondary courses:

Grade	Definition	Grade Point Equivalent
A+	90 – 100%	4.00
A	80 – 89%	3.00
B	70 - 79%	2.00
C	60 - 69%	1.00
D	50 – 59%	0.00
F (Fail)	49% and below	
CR (Credit)	Credit for diploma requirements has been awarded.	
S	Satisfactory achievement in field /clinical placement or non-graded subject area.	
U	Unsatisfactory achievement in field/clinical placement or non-graded subject area.	
X	A temporary grade limited to situations with extenuating circumstances giving a student additional time to complete the	

	requirements for a course.
NR	Grade not reported to Registrar's office.
W	Student has withdrawn from the course without academic penalty.

VI. SPECIAL NOTES:

Course Outline Amendments:

The professor reserves the right to change the information contained in this course outline depending on the needs of the learner and the availability of resources.

Retention of Course Outlines:

It is the responsibility of the student to retain all course outlines for possible future use in acquiring advanced standing at other postsecondary institutions.

Prior Learning Assessment:

Students who wish to apply for advance credit transfer (advanced standing) should obtain an Application for Advance Credit from the program coordinator (or the course coordinator regarding a general education transfer request) or academic assistant. Students will be required to provide an unofficial transcript and course outline related to the course in question. Please refer to the Student Academic Calendar of Events for the deadline date by which application must be made for advance standing.

Credit for prior learning will also be given upon successful completion of a challenge exam or portfolio.

Substitute course information is available in the Registrar's office.

Disability Services:

If you are a student with a disability (e.g. physical limitations, visual impairments, hearing impairments, or learning disabilities), you are encouraged to discuss required accommodations with your professor and/or the Disability Services office. Visit Room E1101 or call Extension 2703 so that support services can be arranged for you.

Communication:

The College considers **WebCT/LMS** as the primary channel of communication for each course. Regularly checking this software platform is critical as it will keep you directly connected with faculty and current course information. Success in this course may be directly related to your willingness to take advantage of the **Learning Management System** communication tool.

Plagiarism:

Students should refer to the definition of “academic dishonesty” in *Student Code of Conduct*. A professor/instructor may assign a sanction as defined below, or make recommendations to the Academic Chair for disposition of the matter. The professor/instructor may (i) issue a verbal reprimand, (ii) make an assignment of a lower grade with explanation, (iii) require additional academic assignments and issue a lower grade upon completion to the maximum grade “C”, (iv) make an automatic assignment of a failing grade, (v) recommend to the Chair dismissal from the course with the assignment of a failing grade. In order to protect students from inadvertent plagiarism, to protect the copyright of the material referenced, and to credit the author of the material, it is the policy of the department to employ a documentation format for referencing source material.

Student Portal:

The Sault College portal allows you to view all your student information in one place. **mysaultcollege** gives you personalized access to online resources seven days a week from your home or school computer. Single log-in access allows you to see your personal and financial information, timetable, grades, records of achievement, unofficial transcript, and outstanding obligations, in addition to announcements, news, academic calendar of events, class cancellations, your learning management system (LMS), and much more. Go to <https://my.saultcollege.ca>.

Electronic Devices in the Classroom:

Students who wish to use electronic devices in the classroom will seek permission of the faculty member before proceeding to record instruction. With the exception of issues related to accommodations of disability, the decision to approve or refuse the request is the responsibility of the faculty member. Recorded classroom instruction will be used only for personal use and will not be used for any other purpose. Recorded classroom instruction will be destroyed at the end of the course. To ensure this, the student is required to return all copies of recorded material to the faculty member by the last day of class in the semester. Where the use of an electronic device has been approved, the student agrees that materials recorded are for his/her use only, are not for distribution, and are the sole property of the College.

Attendance:

Sault College is committed to student success. There is a direct correlation between academic performance and class attendance; therefore, for the benefit of all its constituents, all students are encouraged to attend all of their scheduled learning and evaluation sessions. This implies arriving on time and remaining for the duration of the scheduled session.

Note: It is the departmental policy that once the classroom door has enclosed, the learning process has begun. Late arrivers will not be granted admission to the room.
