ENV102

Prepared: Cam Pucci Approved: Corey Meunier

F (Fail) 49% and below 0.00

CR (Credit) Credit for diploma requirements has been awarded.

S Satisfactory achievement in field /clinical placement or non-graded subject area.

U Unsatisfactory achievement in field/clinical placement or non-graded subject area.

X A temporary grade limited to situations with extenuating circumstances giving a student additional time to complete the requirements for a course.

NR Grade not reported to Registrar's office.

W Student has withdrawn from the course without academic penalty.

Evaluation Process and Grading System:

Evaluation Type	Evaluation Weight
Activities and Assignments	20%
Final Exam	20%
Performance, attendance and Attitude	10%
Tests	50%

Books and Required Resources:

Pocket Ontario Health and Safety Act and Regulations by Carswell
 Publisher: Thomsom Reuters
 ISBN: 978-0-7798-6072-2

Course Outcomes and Learning Objectives:

Course Outcome 1.

Upon completion of this course, the students will demonstrate the ability to Integrate health and safety procedures into the work environment.

Learning Objectives 1.

- Differentiate between the terms health and safety
- Differentiate between accidents and injury
- List the functions of the industrial hygienist
- List the elements of a successful health and safety program
- List and explain the causes of accidents and injuries
- Identify the major items on a safety policy
- Review accident reporting and the preparation of an accident report
- Review the safety audit process
- Differentiate between sampling and monitoring

 - List and explain the responsibilities of the supplier, employer and worker under WHMIS

Course Outcome 3.

Upon completion of this course, the students will Understand and demonstrate the ability to deal with hazards.

Learning Objectives 3.

- Explain the steps to deal with hazards
- List the factors to determine the degree of hazard
- Differentiate between the terms hazardous and toxic
- Differentiate between the terms acute and chronic
- Define the terms relates to health hazards
- Identify physical hazards
- Understand noise production, measurement and control
- Understand how to protect from exposure to noise
- Discuss heat stress and cold stress and how to be protected

Prepared: Cam Pucci Approved: Corey Meunier

Course Outcome 4.

Upon completion of this course, the students will be able to Introduce methods of control which will reduce exposure to hazards.

Learning Objectives 4.

- Identify work practices and controls that can reduce exposure levels
- Identify different protective devices to minimize exposure to hazards
- Define general ventilation and exhaust systems to maintain safe work environments
- Differentiate between qualitative and quantitative respirator systems
- Review lock out and isolation systems

Date:

Friday, September 1, 2017
