

COURSE OUTLINE: MCH121 - MS THEORY/MEASURE

Prepared: Neal Moss

Approved: Corey Meunier, Chair, Technology and Skilled Trades

Course Code: Title	MCH121: MACHINE SHOP THEORY AND MEASUREMENT
Program Number: Name	4039: MECH. ENG. TN-MANUFA 4040: MACHINE SHOP 5082: MECH.TECH.IND.MAINT.
Department:	MECHANICAL TECHNIQUES PS
Semesters/Terms:	18F, 19W
Course Description:	This course is designed to give the students an understanding of the theoretical aspects of machining and manufacturing including feeds, speeds, threading and gear cutting formulas. This course is also designed to strengthen the student's ability to measure and inspect to precise tolerances. Tools using micrometer and vernier scales for linear and angular measurement will be used. There will be a basic introduction to Statistical Process Control (SPC), including interpretation and recording of data.
Total Credits:	3
Hours/Week:	3
Total Hours:	45
Prerequisites:	There are no pre-requisites for this course.
Corequisites:	There are no co-requisites for this course.
This course is a pre-requisite for:	MCH145, MCH259, MCH607
Essential Employability Skills (EES) addressed in this course:	EES 1 Communicate clearly, concisely and correctly in the written, spoken, and visual form that fulfills the purpose and meets the needs of the audience. EES 2 Respond to written, spoken, or visual messages in a manner that ensures effective communication. EES 3 Execute mathematical operations accurately. EES 4 Apply a systematic approach to solve problems. EES 5 Use a variety of thinking skills to anticipate and solve problems. EES 10 Manage the use of time and other resources to complete projects.
General Education Themes:	Science and Technology
Course Evaluation:	Passing Grade: 50%, D
Other Course Evaluation & Assessment Requirements:	Due to the safety concerns of this course, students who do not attend a minimum of ten (10) of the scheduled classes will be given an F grade for this course. After 3 missed classes students lose the full 10% for the Attendance/housekeeping portion of marks. Grade Definition Grade Point Equivalent A+ 90 -100% 4.00 A 80 -89%

SAULT COLLEGE | 443 NORTHERN AVENUE | SAULT STE. MARIE, ON P6B 4J3, CANADA | 705-759-2554

B 70 - 79% 3.00
 C 60 - 69% 2.00
 D 50 -59% 1.00
 F (Fail) 49% and below 0.00

CR (Credit) Credit for diploma requirements has been awarded.
 S Satisfactory achievement in field /clinical placement or non-graded subject area.
 U Unsatisfactory achievement in field/clinical placement or non-graded subject area.
 X A temporary grade limited to situations with extenuating circumstances giving a student additional time to complete the requirements for a course.
 NR Grade not reported to Registrar's office.
 W Student has withdrawn from the course without academic penalty.

Books and Required Resources:

Machining Fundamentals by John R Walker / Bob Dixon
 Publisher: Good heart- Willcox Edition: ninth
 ISBN: 987-1-61960-209-0

Machining Fundamentals (Workbook) by John R Walker
 Publisher: Good heart- Willcox Edition: ninth
 ISBN: 987-1-61960-214-4

Course Outcomes and Learning Objectives:

Course Outcome 1	Learning Objectives for Course Outcome 1
1. Show an awareness of safety in the operation of machines and tools used in the mechanical trades.	Potential Elements of the Performance: 1.1 Gain an understanding of shop safety. 1.2 Develop safe work habits. 1.3 Recognize and correct unsafe work conditions. 1.4 Identify hazards when operating machine shop equipment. 1.5 Identify hazards while working with hand, electric and air powered hand tools.
Course Outcome 2	Learning Objectives for Course Outcome 2
2. Recognize the importance of precise measurement and how it affects product and workmanship in industry.	Potential Elements of the Performance: 2.1 Describe the role of the technician in measurement 2.2 Use of standards and the need for standards 2.3 Recognize the importance of maintaining accuracy 2.4 Show how non precise measurement techniques affect companies
Course Outcome 3	Learning Objectives for Course Outcome 3
3. Accurately layout using drawings and sketches.	Potential Elements of the Performance: 3.1 Explain importance of layouts. 3.2 Identify common layout tools. 3.3 Safe use of layout tools while performing layouts.
Course Outcome 4	Learning Objectives for Course Outcome 4
4. Understand safety features all the auxiliary equipment used in the Machine Shop.	Potential Elements of the Performance: 4.1 Explain the safety features of various types of grinders. 4.2 Explain the safety features of various types of drills. 4.3 Explain the safety features of various types of Saws.
Course Outcome 5	Learning Objectives for Course Outcome 5
5. Use of measuring tools	Potential Elements of the Performance: 5.1 Discuss the use and care of measurement tools 5.2 Identify comparative measuring equipment such as:

	<p>5.3 Telescopic gauges 5.4 Inside and Outside calipers 5.5 Fillet and radius gauges 5.6 Screw pitch gauge 5.7 Thickness/ feeler gauge 5.8 Be able to interpret imperial and metric readings on: 5.9 Inside and Outside Micrometers, 5.10 Depth Micrometers 5.11 Pi Tapes 5.12 Vernier Calipers 5.13 Vernier height gauge 5.14 Vernier protractor 5.15 Recognize sources of error in the measuring process 5.16 Correctly adjust, maintain and store measuring to</p>
Course Outcome 6	Learning Objectives for Course Outcome 6
6. Be knowledgeable in various modern measuring equipment	<p>Potential Elements of the Performance: 6.1 Discuss modern computerized measuring equipment available today that enhance precise measurement 6.2 Demonstrate the basic use of laser equipment 6.3 Discuss measuring equipment available today that is used in vibration analysis, hydraulic testing.</p>
Course Outcome 7	Learning Objectives for Course Outcome 7
7. Select and use proper hand tools based on application	<p>Potential Elements of the Performance: 7.1 Hand tool safety. 7.2 Identify the correct sized wrenches. 7.3 Identify the correct screwdriver style 7.4 Identify different types of files. 7.5 Identify hand tools used in Mechanical trades. 7.6 Care and maintenance of hand tools.</p>
Course Outcome 8	Learning Objectives for Course Outcome 8
8. The lathe, determine speeds, feeds and calculate thread parameters and tapers using formulas.	<p>Potential Elements of the Performance: 8.1 Lathe safety & operation. 8.2 Identify parts of the lathe. 8.3 Identify various work holding devices on a lathe. 8.4 Calculate speeds and feeds. 8.5 Calculate thread parameters using formulas. 8.6 Calculate information required to cut tapers.</p>
Course Outcome 9	Learning Objectives for Course Outcome 9
9. The Milling machine, determine speeds, feeds and type of cutting tool to suit the application.	<p>Potential Elements of the Performance: 9.1 Milling machine safety. 9.2 Milling machine operation. 9.3 Identify parts of the Milling machine. 9.4 Identify various work holding devices on a Milling machine. 9.5 Calculate speeds and feeds. 9.6 Identify various cutting tools for the correct application. 9.7 Explain the principle of a dividing head.</p>
Course Outcome 10	Learning Objectives for Course Outcome 10
10. Understand the types, properties and applications of lubricants	<p>Potential Elements of the Performance: 10.1 Identify lubricants used in different machines. 10.2 Identify the different types of lubricants.</p>

	10.3 Importance of viscosity in lubricants. 10.4 Identify lubricants used in machining operations 10.5 Practice safe handling of lubricants.
Course Outcome 11	Learning Objectives for Course Outcome 11
11. Discuss the use of Statistical Process Control in industry	Potential Elements of the Performance: 11.1 Discuss Statistical Process Control 11.2 Discuss the advantages of using Statistical Processes 11.3 Perform assignments in Statistical Process Control

Evaluation Process and Grading System:

Evaluation Type	Evaluation Weight	Course Outcome Assessed
Attendance/participation	10%	
Homework/assignments	30%	
Tests	60%	

Date:

August 28, 2018

Please refer to the course outline addendum on the Learning Management System for further information.
