

I. COURSE DESCRIPTION:

This course provides the student with a practical understanding of the classification, structure and functioning of plants in general with special consideration for woody plants. The concepts presented in this course will have direct application in a number of courses in the Forest Technician Program

II. LEARNING OUTCOMES AND ELEMENTS OF THE PERFORMANCE:

Upon successful completion of this course, the student will demonstrate the ability to:

1. Describe what a species is and how all species relate in their evolutionary history.

Potential Elements of the Performance:

- apply the classification List various characteristics used to practically distinguish different species
- Describe and use the binomial system of classification
- Explain phylogeny and system

- 2.

Describe the structure and functioning of a plant cell

Potential Elements of the Performance:

- List and describe the function and interactions of the following cell components: cell wall, cell membrane, nucleus, nucleolus, chloroplast, mitochondria, ribosomes, golgi apparatus, vacuoles and endoplasmic reticulum
- Describe the structural roles of carbohydrates, lipids, amino acids and nucleic acids in cells

3. Describe the anatomy, function and inter-relationships of specified structures of a plant.

Potential Elements of the Performance:

- Describe cells and tissues of leaves, stems, and roots
- Distinguish by anatomical features between flowering plants and gymnosperms and between monocots and dicots
- Recognize cells and tissues of leaves, stems and roots from microscopic slides

4. Describe metabolic processes in plants.

- Potential Elements of the Performance

- Describe the processes involved in photosynthesis
- Describe the processes involved in respiration
- Describe the processes involved in transpiration
- Describe the processes involved in water and nutrient uptake

5. Describe plant growth process

Potential Elements of the Performance:

- Describe the various meristematic regions in plant including vascular cambium, cork cambium and apical meristems
- Describe the roles of auxins and gibberellins in plant growth
- Distinguish between primary and secondary growth
- Describe the process of annual growth in woody plants

6. Describe reproductive processes in plants

Potential Elements of the Performance:

- differentiate between sexual and asexual reproduction
- list and give examples of 6 different vegetative methods of reproduction
- distinguish between haploid and diploid conditions, gametophyte and sporophyte generations, spores and seeds

7. Describe life cycles of various plant groups

Potential Elements of the Performance:

- distinguish between different stages in the life cycles of ferns, mosses, club mosses, conifers and flowering plants
- draw from microscope slides specified life stages

III. TOPICS:

1. Classification of Plants
2. The Plant Cell
3. Plant Structure
4. Metabolic Processes
5. Plant Growth
6. Plant Reproduction
7. Plant Life Cycles

IV. REQUIRED RESOURCES/TEXTS/MATERIALS:

Stern, K.A.. Introductory Plant Biology. Wm. C. Brown Publishers. 537pp

V. EVALUATION PROCESS/GRADING SYSTEM:

Mid-term Test	20%
Final Test	20%
<u>Lab Assignments</u>	<u>60%</u>
TOTAL	100%

The following semester grades will be assigned to students:

Grade	<u>Definition</u>	<i>Grade Point Equivalent</i>
A+	90 – 100%	4.00
A	80 – 89%	3.00
B	70 - 79%	3.00
C	60 - 69%	2.00
D	50 – 59%	1.00
F (Fail)	49% and below	0.00
CR (Credit)	Credit for diploma requirements has been awarded.	
S	Satisfactory achievement in field /clinical placement or non-graded subject area.	
U	Unsatisfactory achievement in field/clinical placement or non-graded subject area.	
X	A temporary grade limited to situations with extenuating circumstances giving a student additional time to complete the requirements for a course.	
NR	Grade not reported to Registrar's office.	
W	Student has withdrawn from the course without academic penalty.	

VI. SPECIAL NOTES:Special Needs:

If you are a student with special needs (e.g. physical limitations, visual impairments, hearing impairments, or learning disabilities), you are encouraged to discuss required accommodations with your professor and/or the Special Needs office. Visit Room E1101 or call Extension 2703 so that support services can be arranged for you.

Retention of Course Outlines:

It is the responsibility of the student to retain all course outlines for possible future use in acquiring advanced standing at other postsecondary institutions.

Communication:

The College considers **WebCT/LMS** as the primary channel of communication for each course. Regularly checking this software platform is critical as it will keep you directly connected with faculty and current course information. Success in this course may be directly related to your willingness to take advantage of the **Learning Management System** communication tool.

Plagiarism:

Students should refer to the definition of “academic dishonesty” in *Student Code of Conduct*. Students who engage in academic dishonesty will receive an automatic failure for that submission and/or such other penalty, up to and including expulsion from the course/program, as may be decided by the professor/dean. In order to protect students from inadvertent plagiarism, to protect the copyright of the material referenced, and to credit the author of the material, it is the policy of the department to employ a documentation format for referencing source material.

Course Outline Amendments:

The professor reserves the right to change the information contained in this course outline depending on the needs of the learner and the availability of resources.

Substitute course information is available in the Registrar's office.

VII. PRIOR LEARNING ASSESSMENT:

Students who wish to apply for advance credit transfer (advanced standing) should obtain an Application for Advance Credit from the program coordinator (or the course coordinator regarding a general education transfer request) or academic assistant. Students will be required to provide an unofficial transcript and course outline related to the course in question.

Credit for prior learning will also be given upon successful completion of a challenge exam or portfolio.
