

## COURSE OUTLINE: NET316 - APPLIED GIS

Prepared: Heath Bishop Approved: Sherri Smith, Chair, Natural Environment, Business, Design and Culinary

Course Code: Title	NET316: APPLIED GIS				
Program Number: Name	5221: NAT ENVIRONMENT TY				
Department:	NATURAL RESOURCES PRG				
Semesters/Terms:	18F				
Course Description:	This course builds on introductory GIS skills already obtained in previous courses (NET108). Focus is on effective data creation, collection, management and analysis. Topics covered include: efficient data capture methodology, creating & managing geodatabases, performing spatial analysis, performing 3D analysis, image georeferencing, advanced spatial queries, data manipulation, image processing, raster analysis, vector editing & GPS integration.				
Total Credits:	2				
Hours/Week:	2				
Total Hours:	30				
Prerequisites:	There are no pre-requisites for this course.				
Corequisites:	There are no co-requisites for this course.				
Vocational Learning Outcomes (VLO's) addressed in this course:	5221 - NAT ENVIRONMENT TY				
	VLO 2 Utilize natural resources information technology equipment to assemble, analyze and present identified ecosystem components for purposes of conserving and managing natural resources.				
Please refer to program web page for a complete listing of program outcomes where applicable.	<ul> <li>Apply the basic concepts of science to natural resource conservation and management.</li> </ul>				
	LO 4 Plan, design, implement and participate in the maintenance of natural environment assessments.				
	VLO 8 Contribute to the development, implementation and maintenance of environmental management systems.				
	VLO 10 Communicate technical information accurately and effectively in oral, written, visual and electronic forms.				
Essential Employability Skills (EES) addressed in this course:	EES 1 Communicate clearly, concisely and correctly in the written, spoken, and visual form that fulfills the purpose and meets the needs of the audience.				
	EES 2 Respond to written, spoken, or visual messages in a manner that ensures effective communication.				
	EES 3 Execute mathematical operations accurately.				
	ES 4 Apply a systematic approach to solve problems.				
	EES 5 Use a variety of thinking skills to anticipate and solve problems.				
	EES 6 Locate, select, organize, and document information using appropriate technology and information systems.				
	EES 7 Analyze, evaluate, and apply relevant information from a variety of sources.				
	EES 10 Manage the use of time and other resources to complete projects.				
<b>A</b>					

SAULT COLLEGE | 443 NORTHERN AVENUE | SAULT STE. MARIE, ON P6B 4J3, CANADA | 705-759-2554

	EES 11 Take responsibility for ones own actions, decisions, and consequences.						
Course Evaluation:	Passing Grade: 50%, D						
Other Course Evaluation & Assessment Requirements:	Grade Definition Grade Point Equivalent A+ 90 - 100% 4.00 A 80 - 89% B 70 - 79% 3.00 C 60 - 69% 2.00 D 50 - 59% 1.00 F (Fail) 49% and below 0.00						
	CR (Credit) Credit for diploma requirements has been awarded. S Satisfactory achievement in field /clinical placement or non-graded subject area. U Unsatisfactory achievement in field/clinical placement or non-graded subject area. X A temporary grade limited to situations with extenuating circumstances giving a student additional time to complete the requirements for a course. NR Grade not reported to Registrar's office. W Student has withdrawn from the course without academic penalty.						
Course Outcomes and Learning Objectives:	Course Outcome 1	Learning Objectives for Course Outcome 1					
	1. Apply knowledge of Natural Environment practices to plan, create & manage GIS data.	1.1 Demonstrate geodatabase planning & creation. 1.2 Solve natural environment/management problems using GIS.					
	Course Outcome 2	Learning Objectives for Course Outcome 2					
	2. Use the ArcMap interface in an effective manner.	<ul> <li>2.1 Load multiple vector and raster layers.</li> <li>2.2 Maintain existing ArcMap projects used for data update.</li> <li>2.3 Perform geoprocessing operations.</li> <li>2.4 Use ArcCatalog to interchange and convert file formats.</li> <li>2.5 Customize toolbars for efficient usage.</li> </ul>					
	Course Outcome 3	Learning Objectives for Course Outcome 3					
	3. Manipulate attribute tables and perform tabular operations.	<ul><li>3.1 Populate attribute tables.</li><li>3.2 Add, delete and calculate field records.</li><li>3.3 Perform table editing using the Field Calculator.</li></ul>					
	Course Outcome 4	Learning Objectives for Course Outcome 4					
	4. Create effective layouts and digital presentations.	<ul><li>4.1 Manipulate layout properties and operations.</li><li>4.2 Export layouts to .pdf, or .tif formats for digital storage.</li><li>4.3 Demonstrate application of cartographic principles.</li></ul>					
	Course Outcome 5	Learning Objectives for Course Outcome 5					
	5. Use ArcToolbox to perform geoprocessing tasks.	<ul> <li>5.1 Analyze spatial data by buffering features, overlaying data and calculating attribute values.</li> <li>5.2 Merge, dissolve, clip, union, erase, intersect and calculate areas tools to manipulate layers &amp; evaluate results.</li> <li>5.3 Reproject data for use with GPS units, and also to view within different UTM zones.</li> </ul>					
	Course Outcome 6	Learning Objectives for Course Outcome 6					
	6. Integrate GPS field data	6.1 Upload and download waypoints & tracks using DNR					

SAULT COLLEGE | 443 NORTHERN AVENUE | SAULT STE. MARIE, ON P6B 4J3, CANADA | 705-759-2554

	with GIS Analysis.		Garmin. 6.2 Incorporate GPS data into ArcGIS and Google Earth.			
	Course Outcome 7		Learning Objectives for Course Outcome 7			
	7. Demonstrate ability to Georeference Imagery.		<ul><li>7.1 Describe the theory underlying georeferencing.</li><li>7.2 Collect GCPs using appropriate methods.</li><li>7.3 Rectify imagery.</li></ul>			
	Course Outcome 8		Learning Objectives for Course Outcome 8			
	8. Demonstrate the ability to perform Raster Processing.		<ul><li>8.1 Explain theories underlying the raster datatype.</li><li>8.2 Perform geoprocessing tasks using rasters.</li><li>8.3 Perform raster site selection analysis.</li></ul>			
Evaluation Process and Grading System:	Evaluation Type	Evaluation Weight		Course Outcome Assessed		
	Assignments	50%		1-8		
	Quizzes	10%		1-8		
	Tests	40%		1-8		
Date:	June 22, 2018					
	Please refer to the course outline addendum on the Learning Management System for further information.
