

COURSE OUTLINE: NET252 - FOREST PRACT & ENV

Prepared: Dave Bronson / Brent Attwell

Approved: Sherri Smith, Chair, Natural Environment, Business, Design and Culinary

Course Code: Title	NET252: FOREST PRACTICES AND THE ENVIRONMENT			
Program Number: Name	5220: NAT ENVIRONMENT TN 5221: NAT ENVIRONMENT TY			
Department:	NATURAL RESOURCES PRG			
Semesters/Terms:	19F			
Course Description:	Students are provided with an overview of the characteristics of the forests of Ontario and forest management processes including planning, access, harvest, maintenance and renewal. The focus of the course will be on environmental considerations of forest practices to mitigate damage to ecosystem function.			
Total Credits:	3			
Hours/Week:	3			
Total Hours:	45			
Prerequisites:	There are no pre-requisites for this course.			
Corequisites:	There are no co-requisites for this course.			
Vocational Learning	5220 - NAT ENVIRONMENT TN			
Outcomes (VLO's) addressed in this course:	VLO 2 Utilize natural resources equipment and technology to accurately identify ecosystem components for purposes of conserving and managing natural resources.			
Please refer to program web page for a complete listing of program	VLO 3 Apply the basic concepts of science to natural resource conservation and management.			
outcomes where applicable.	VLO 4 Conduct natural environment assessments according to standard field survey methods, including the use of appropriate equipment and materials.			
	VLO 7 Work safely in adherence to occupational health and safety standards.			
	VLO 8 Complete all work in compliance with applicable municipal, provincial and federal standards and guidelines.			
	VLO 11 Communicate technical information accurately and effectively in oral, written and visual forms.			
	VLO 12 Travel accurately in a timely manner in the outdoors using appropriate navigation aids and motorized transport equipment.			
	5221 - NAT ENVIRONMENT TY			
	VLO 3 Apply the basic concepts of science to natural resource conservation and management.			
	VLO 10 Communicate technical information accurately and effectively in oral, written, visual and electronic forms.			
Essential Employability Skills (EES) addressed in	EES 1 Communicate clearly, concisely and correctly in the written, spoken, and visual form that fulfills the purpose and meets the needs of the audience.			
this course:	EES 2 Respond to written, spoken, or visual messages in a manner that ensures effective

	EES 6 Locate, select, organism and information systems EES 9 Interact with others relationships and the EES 10 Manage the use of	Apply a systematic approach to solve problems. Locate, select, organize, and document information using appropriate technology and information systems. Interact with others in groups or teams that contribute to effective working relationships and the achievement of goals. Manage the use of time and other resources to complete projects.			
Course Evaluation:	Passing Grade: 50%, D				
Other Course Evaluation & Assessment Requirements:	Academic success is directly linked to attendance. Missing more than 1/3 of course hours in a semester shall result in an F Grade for the course. Attendance during field trips is MANDATORY to obtain any marks associated with the trip. Ten percent (%) will be deducted from the total value of the assignment for every day late. Assignments are due at the beginning of the class and even if handed in later in the day it counts as one day late.				
Books and Required Resources:	Forest Management Guide for Conserving Biodiversity at the Stand and Site Scales by OMNR, 2010 Publisher: Ontario Ministry of Natural Resources				
Course Outcomes and	Course Outcome 1	Learning Objectives for Course Outcome 1			
Learning Objectives:	Have an overall understanding of the management planning process on Crown land.	1.1 Overall characteristics of Ontario forests and the changes in forest structure and composition since forestry practices began. 1.2 Develop a basic understanding of the laws that govern forestry on Crown land in Ontario and the associated guidelines. 1.3 Understand the stages of developing a crown forest management plan. 1.4 Describe the forest values and their associated Crown land user groups. 1.5 Recognize the importance of the L.C.C. (local citizens committee) members and public consultation in the planning process. 1.6 Annual operating plans and their components. 1.7 Compliance monitoring audit programs implemented on Crown land (FOIPS). 1.8 Forest certification types and guiding principles.			
	Course Outcome 2	Learning Objectives for Course Outcome 2			
	Explain the potential effects of forest practices on wildlife and make suggestions of how management activities can be modified to provide adequate wildlife habitat.	 2.1 Understand the concepts of coarse and fine filter and their associated management considerations. 2.2 Compare and describe the differences between the effects that logging and natural disturbances have on wildlife habitat. 2.3 Describe habitat requirements of major Ontario generalist and specialist wildlife species. 2.4 Become familiar with the habitat needs of selected species

	and the forest management guidelines associated. 2.5 Investigate local issues with the endangered wood turtle and threatened woodland caribou and their associated management. 2.6 Describe an old growth forest and explain the values provided by maintaining these ecosystems. 2.7 Understand the importance of the emulation of forest fire.		
Course Outcome 3	Learning Objectives for Course Outcome 3		
Develop the knowledge required for planning forest access roads and water crossings using best management practices.	3.1 Become familiar with the provincial and federal laws that surround access roads and water crossings and their mandatory standards. 3.2 Describe the guidelines and best management practices in road planning-layout along with the appropriate stages of road building. 3.3 Describe the guidelines and best management practices for water crossings, their appropriate location and construction. 3.4 Recognize the principles of sediment and erosion control. 3.5 Learn the mitigation techniques available to prevent sediment and erosion control on forest roads and at water crossings. 3.6 Comprehend a water crossing application required for Crown land and a Forest Operations Inspection Program (FOIPS). 3.7 Measures used to protect fish and fish habitat when removing beaver dams, culvert maintenance, ice bridges and snow fills, maintenance of riparian vegetation and temporary stream crossing and their associated timing windows.		
Course Outcome 4	Learning Objectives for Course Outcome 4		
Explain the potential implications of forest harvesting on the physical environment.	 4.1 Types of forest harvesting and logging methods. 4.2 Define site damage, site productivity, ecosystem resilience sensitive sites and best management practices. 4.3 List and explain the five potential site damages of forestry practices on the physical environment. 4.4 Describe key site characteristics that determine harvesting site impact potential. 4.5 Plan and conduct a forest harvest audit inventory using standard equipment and methodology. 4.6 Develop a professional report that summarizes the impacts a logging operation has had on the forest. 4.7 Develop an understanding of harvesting considerations including both management implications and careful logging practices. 		
Course Outcome 5	Learning Objectives for Course Outcome 5		
Develop a general knowledge of the foundations of silviculture, and the importance of tree marking.	 5.1 Understand the general silvics of tree species found in Ontario. 5.2 Acquire the foundations of silvicultural systems and their appropriate applications for harvesting. 5.3 Be able to understand all of the components required in the development of a silvicutural prescription. 5.4 Recognize the importance of tree marking guidelines and how they promote a healthy forest. Forest raptors habitat management guidelines-identification 		

			and action plan.		
	Course Outcome 6		Learning Objectives for Course Outcome 6		
	Course Outcome 6 Describe the various methods of forest renewal and forest maintenance. Course Outcome 7 Describe the resources available to private forest management in Ontario and the deficiencies that prevent good forestry practices.		6.1 Differentiate between the Forest Renewal Trust Fund an Forestry Futures Trust Fund. 6.2 Be able to comprehend maintenance operations conduct on Crown land including crop tree release, brushing, pre-commercial thinning and aerial spraying and their associated best management practices. 6.3 Develop an understanding of the different methods of sit preparation and their associated best management practices. 6.4 Understand the concepts seed zone, container and bareroot stock. 6.5 Become familiar with proper care and handling of plantin stock. 6.6 List and identify operational tree plant strategies includin microsite selection, spacing, densities, planting technique ar planting faults. 6.7 Develop an operational tree planting prescription typical northern Ontario (assignment). 6.8 Understand why we use prescribed burns and natural regeneration and their application.
