I. COURSE DESCRIPTION:

This course concentrates on management strategies for the conservation and sustainability of Ontario's fisheries resource. Emphasis will be placed on management tools such as harvest control; habitat conservation, restoration and development as well as fish stocking. In addition, hatchery requirements and operation for the culture of cold-water fish such as trout and salmon will be featured. There will be onsite visits to area hatcheries.

II. LEARNING OUTCOMES AND ELEMENTS OF THE PERFORMANCE:

1. Outline the history and importance of Canada's / Ontario's fisheries resource

Potential Elements of the Performance:

- discuss the state of Canada's commercial seafishery, freshwater fishery and aquaculture production
- summarizes the commercial fishing industry in the Great Lakes since the early 1900's
- detail the importance of Ontario's fisheries resource
- discuss the economics of recreational fishing in Ontario

This learning outcome will constitute approximately 15% of the course

2. Discuss the factors threatening Ontario's fisheries resource

Potential Elements of the Performance:

- list and describe the factors resulting in declining aquatic ecosystem health
- outline issues regarding the loss of fish habitat
- detail the history of fisheries exploitation in the Great Lakes and the resulting changes in fisheries communities
- list the various invasive species in the Great Lakes and their impact on indigenous fish stocks

This learning outcome will constitute approximately 15% of the

course.

3. **Outline the general principles of fisheries conservation and management**

Potential Elements of the Performance:

- outline and discuss the three (3) general approaches to fisheries conservation and management
- list and briefly discuss methods of fisheries habitat conservation, restoration, protection and development
- list and explain various management prescriptions to manage the sustainable harvest of a recreation fishery
- outline the quota system for the sustainable management of a commercial fishery
- describe the various shareholders in a fisheries resource and issues with resource allocation

This learning outcome will constitute approximately 20% of the course.

4. **Critique Ontario's Strategic Plan for Fisheries Management**

Potential Elements of the Performance:

- discuss some of the important milestones in the management of the Great Lakes including the formation of the Great Lakes Fishery Commission (GLFC), the International Joint Commission (IJC) as well as notable international symposia focusing on key environmental and conservation issues
- state the goals and strategic management actions to resolve Ontario's important fisheries management issues (SPOF II)
- outline the highlights of "A New Ecological Framework for Recreational Fisheries Management in Ontario" (EFFM)
- review the province's regulatory guidelines for managing major sport fish through the use of Species Tool Kits.
- summarize federal initiatives to conserve, restore and develop fish habitat
- outline the province's strategy to develop and implement a national invasive species response plan and an accord for the management of invasive aquatic species
- discuss an example of a local enhanced fisheries stewardship

- initiative (sturgeon protection plan)
- summarize the highlights of Ontario's Great Lakes Conservation Blueprint for Aquatic Biodiversity

This learning outcome will constitute approximately 25% of the course.

5. **Fish Culture in Ontario**

Potential Elements of the Performance:

- summarize basic concepts of aquaculture
- describe extensive/intensive systems
- outline hatchery operations
- discuss guidelines for stocking fish
- explain the role of hatcheries in the restoration of unique genetic fish stocks
- research stocking records in Ontario's water bodies
- discuss ecological impacts of fish introductions
- argue the pro's and con's of fish stocking as a management tool

This learning outcome will constitute approximately 25% of the course.

III. **TOPICS:**

1. The Importance of Ontario's fisheries
2. Factors Threatening Ontario's fisheries
3. General Principles of Fisheries Conservation and Management
4. Ontario's Strategic Plan for Fisheries Management
5. Fish Culture in Ontario

V. EVALUATION PROCESS/GRADING SYSTEM:

Tests	50%
Assignments	<u>50%</u>
	100%

Assignments and report values will be reduced at a rate of 10% per day for late submissions for a period of 5 days after the due date. After 5 days lab assignment/report value will be zero.

Labs and/or tests missed without documented health or personal reasons will be valued at zero.

The following semester grades will be assigned to students:

Grade	Definition	<i>Grade Point Equivalent</i>
A+	90 – 100%	4.00
A	80 – 89%	3.00
B	70 - 79%	2.00
C	60 - 69%	1.00
D	50 – 59%	0.00
F (Fail)	49% and below	
CR (Credit)	Credit for diploma requirements has been awarded.	
S	Satisfactory achievement in field /clinical placement or non-graded subject area.	
U	Unsatisfactory achievement in field/clinical placement or non-graded subject area.	
X	A temporary grade limited to situations with extenuating circumstances giving a student additional time to complete the requirements for a course.	
NR	Grade not reported to Registrar's office.	
W	Student has withdrawn from the course without academic penalty.	

VI. SPECIAL NOTES:

Attendance:

Sault College is committed to student success. There is a direct correlation between academic performance and class attendance; therefore, for the benefit of all its constituents, all students are encouraged to attend all of their scheduled learning and evaluation sessions. This implies arriving on time and remaining for the duration of the scheduled session.

VII. COURSE OUTLINE ADDENDUM:

The provisions contained in the addendum located on the portal form part of this course outline
