

COURSE OUTLINE: NRT211 - PROTECT PARK VALUES

Prepared: John Clement

Approved: Sherri Smith, Chair, Natural Environment, Business, Design and Culinary

Course Code: Title	NRT211: PROTECTING PARK VALUES				
Program Number: Name	5212: ADVENTURE RECREATION				
Department:	NATURAL RESOURCES PRG				
Semesters/Terms:	20W				
Course Description:	This course examines the effects of natural and man created disturbances (forest fires, forest insects, tree diseases and recreational stressors) on the ecological health of and their management in, parks and protected areas. Fire ecology, fire suppression and fire use (prescribed burning) concepts, tools and techniques are introduced. Park protection issues will be covered including: assessing and ameliorating the impacts of recreational activities on parks, invasive plant species, restoration concepts, the concept of ecological integrity, and commemorative heritage protection.				
Total Credits:	3				
Hours/Week:	3				
Total Hours:	45				
Prerequisites:	There are no pre-requisites for this course.				
Corequisites:	There are no co-requisites for this course.				
Substitutes:	NRT139, NRT243				
Vocational Learning Outcomes (VLO's) addressed in this course:	5212 - ADVENTURE RECREATION				
	VLO 1 Demonstrate clear, concise and industry appropriate written, spoken and visual communication skills.				
Please refer to program web page for a complete listing of program	VLO 2 Identify, discuss, organize and assess common Flora & Fauna species found throughout ON, including biological and physiological characteristics.				
outcomes where applicable.	Start and manage a career in the Adventure Recreation and Parks field.				
	VLO 7 Describe the scientific method and how it shapes our understanding of the ecology of the natural world.				
	/LO 8 Demonstrate an understanding of sustainable development and apply the foundations in the natural environment.				
	Safely operate and maintain equipment used in Adventure Recreation and Park operations.				
	VLO 11 Analyze, evaluate and apply subjective and objective safety considerations for Adventure Recreation and Parks activities.				
Essential Employability Skills (EES) addressed in this course:	EES 1 Communicate clearly, concisely and correctly in the written, spoken, and visual form that fulfills the purpose and meets the needs of the audience.				
	EES 2 Respond to written, spoken, or visual messages in a manner that ensures effective communication.				
	EES 4 Apply a systematic approach to solve problems.				
	EES 5 Use a variety of thinking skills to anticipate and solve problems.				

SAULT COLLEGE | 443 NORTHERN AVENUE | SAULT STE. MARIE, ON P6B 4J3, CANADA | 705-759-2554

	EES 6 EES 7 EES 8 EES 9 EES 10 EES 11	 and information systems. ES 7 Analyze, evaluate, and apply relevant information from a variety of sources. ES 8 Show respect for the diverse opinions, values, belief systems, and contributions of others. ES 9 Interact with others in groups or teams that contribute to effective working relationships and the achievement of goals. ES 10 Manage the use of time and other resources to complete projects. 					
General Education Themes:							
Course Evaluation:	Passing Grade: 50%, D						
Other Course Evaluation & Assessment Requirements:	Academic success is directly linked to attendance. Missing more than 1/3 of the course hours in a semester shall result in an F grade for the course.						
Books and Required Resources:	Simon and Schuster Guide to Mushrooms by Lincoff Publisher: Touchstone						
Course Outcomes and	Course	Outcome 1	Learning Objectives for Course Outcome 1				
Learning Objectives:		 assess the health of trees in park areas. 1.1 Complete a health assessment of a tree in a park areas. 1.1 Complete a health assessment of a tree in a park areas. 1.2 Recognize and identify signs and symptoms of fore diseases. 1.3 Describe and identify biotic and abiotic stressors o trees in park areas. 1.4 Explain environmental influences on forest tree herincluding temperature, cultural damage, construction of humidity, wind, precipitation, and fire. 1.5 Describe park management strategies to protect tr health. 1.6 Research forest pathogens by species. 					
	Course	Outcome 2	Learning Objectives for Course Outcome 2				
	role, and biotic an of forest	ibe the ecological d management, of id abiotic stressors trees in park areas.	 2.1 Classify forest tree diseases by taxonomic, biotic, abiotic, decline, host, part of tree, parasitic / saprobic, and necrotic / atrophic / hypertrophic methods. 2.2 Recognize and identify signs and symptoms of forest disease. 2.3 Identify and describe abiotic stress factors that affect tree health. 2.4 Identify and describe biotic stress factors as agents of tree disease including fungi, bacteria, viruses and parasitic plants. 2.5 Collect and identify hard body fungus types for interpretive purposes. 2.6 Describe life cycles of mycorrhizae, fungi, rusts and decline diseases. 				
		Outcome 3	Learning Objectives for Course Outcome 3				
•	3. Desci	ibe identification					

SAULT COLLEGE | 443 NORTHERN AVENUE | SAULT STE. MARIE, ON P6B 4J3, CANADA | 705-759-2554

	features and life cycles of six orders of forest insects including Lepidoptera, Coleoptera, Hymenoptera, Diptera, Hemiptera, and Homoptera found in park areas.	 3.1 Potential elements of the performance: 3.2 Recognize and label diagrams of various insect body parts and body regions. 3.3 Describe how forest insects are classified according to taxonomy, feeding location and host species. 3.4 Draw diagrams of the life cycles for the six orders. 				
	Course Outcome 4	rse Outcome 4 Learning Obje		ctives for Course Outcome 4		
	4. Describe the ecological role, and management, of forest insects in park areas.	 4.1 Recognize and identify signs and symptoms of insect damage. 4.2 Explain natural control methods including virus, bacteria, and introduced pests. 4.3 Explain environmental impacts on insect populations including temperature, humidity, wind, precipitation, and fire. 4.4 Describe elements of integrated pest management. 4.5 Discuss the limitations and environmental implications of each type of control method. 				
	Course Outcome 5	Learning Objectives for Course Outcome 5				
	5. Describe the ecological role, and management, of forest fires in park areas.	 5.1 Describe the Canadian Forest Fire Weather Index. 5.2 Explain the role of forest fire in fire dependant ecosystems. 5.3 Operate forest fire suppression equipment (pumps, hand tools, etc.) 5.4 Describe fire use (prescribed burn) objectives and planning procedures. 5.5 Discuss the environmental implications of forest fire suppression vs. fire management in park areas. 				
	Course Outcome 6	Learning Objectives for Course Outcome 6				
	6. Describe commemorative protection measures and other park protection issues.	tection measures and protecting commemorative values.				
Evaluation Process and	Evaluation Ty	pe	Evaluation Weight			
Grading System:	Commemorative Protection Assignment		10%			
	Final Exam		20%			
	Fire Weather Index Assignme	ent	10%			
	Hard Body Fungus ID Quiz		10%			
	Hard Body Fungus Photos		10%			
	Insect ID Quiz		10%			
	Tree Health Assessment		10%			
	Tree Pests by Species Research Assignment		20%			
Date:	June 19, 2019
