

SAULT COLLEGE OF APPLIED ARTS & TECHNOLOGY

SAULT STE. MARIE, ONTARIO

COURSE OUTLINE

Course Title: CALCULUS

Code No.: MIH 208-4

Program: WATER RESOURCES - PULP AND PAPER TECHNOLOGY

Semester: FOURTH - WATER RESOURCES FOURTH - puLP & PAPER

Date: OCTOBER, 1985

Author: K. CLARKE

New

Revision: X

APPROVED

Chairperson

Date

CALENDAR DESCRIPTION

MATHEMATICS (Calculus)

MTH 208-4

Course Name

Course Number

PHILOSOPHY/GOALS:

When the student has successfully completed this course, he will have demonstrated an acceptable ability to pass tests based upon the course topics as listed elsewhere. If, after completing the course, the student takes further courses (or employment) in which he is required to apply this material, he should then, through practice be able to develop a good command in this subject matter.

METHOD OF ASSESSMENT (GRADING METHOD);

The students will be assessed by written tests, including major periodic tests based upon large blocks of the subject matter and some unannounced short quizzes on current work, the latter being given at the discretion of the instructor. A final test on the whole course may also be included. A letter grade will be based upon a student's weighted average of all his test results. See also the mathematics department's annual publication "TO THE MATHEMATICS STUDENT" for further details. This publication is made available to the students early in each academic year.

TEXTBOOK(S):

"Basic Technical Mathematics with Calculus" - Washington

OBJECTIVES:

The basic objective is for the student to develop an understanding of the methods studied, knowledge of the facts presented and an ability to use these in the solution of problems. For this purpose exercises are assigned. Tests will reflect the sort of work contained in the assignments. The level of competency demanded is the level required to obtain an overall passing average on the tests. The material to be covered is listed on the following page.

MTH208-4

TOPIC NUMBER	PERIODS	TOPIC DESCRIPTION	REFERENCE
	18	The Derivative Limits, slope, derivative. Delta Method, derivatives of polynomials. Product Rule, Quotient Rule, Chain Rule	Text, Ch, 2 Exercises 22-1 to 22-9 (part)
	10	<u>Applications of the Derivative</u> Tangents and normals Curve sketching Maximum and minimum	Text, Ch. 2 Exercises 23-1, 23-4 23-6, 23-7 (part)
	16	<u>Integration</u> Differentials, antiderivatives, indefinite integral, area under a curve, definite integral	Text, Ch. 2 Exercises 24-1 to 24-7 (part)
	20	<u>Applications of Integration</u> Applications of indefinite integral, area, volumes Pressure on a submerged plate, work, flow over a weir	Text, Ch, 2 Exercises 25-1 to 25-6 (part) 25-7 (part) Printed She
