

COURSE OUTLINE: MTF142 - SEMIAUTOMATIC WELD

Prepared: Dave Holley

Approved: Corey Meunier, Chair, Technology and Skilled Trades

Course Code: Title	MTF142: SEMIAUTOMATIC WELDING
Program Number: Name	4051: METAL FABRICATION 4053: WELDING TECHNIQUES
Department:	IRONWKR APPR./WELDING RELATED
Semesters/Terms:	20W
Course Description:	This course will cover the continuation of Gas Metal Arc Welding, equipment, set-up and a variation of gases as well as completing the two remaining positions: vertical and overhead welding. It will also cover the skills involved with welding Metal Core and Flux Core Arc Welding.
Total Credits:	3
Hours/Week:	3
Total Hours:	45
Prerequisites:	MTF105
Corequisites:	There are no co-requisites for this course.
Vocational Learning Outcomes (VLO's) addressed in this course:	4051 - METAL FABRICATION
Please refer to program web page for a complete listing of program outcomes where applicable.	VLO 2 Apply knowledge of various welding and metal cutting techniques and theories to produce components and sub-assemblies.
	VLO 3 Prepare materials by utilizing fabrication machinery and equipment.
	VLO 5 Understand and use a variety of destructive and non-destructive methods to test welds.
	VLO 7 Complete all work in compliance with health and safety legislation and prescribed organizational practices and procedures to ensure safety of self and others.
	VLO 8 Work responsibly and effectively in accordance with government safety regulations, manufacturer's recommendations and approved industry standards.
Essential Employability Skills (EES) addressed in this course:	EES 5 Use a variety of thinking skills to anticipate and solve problems. EES 10 Manage the use of time and other resources to complete projects. EES 11 Take responsibility for ones own actions, decisions, and consequences.
Course Evaluation:	Passing Grade: 50%, D
Other Course Evaluation & Assessment Requirements:	1. Late hand in penalties will be 10% per day. Assignments will not be accepted past one week late unless there are extenuating and legitimate circumstances. 2. If a student misses a test/lab he/she must have a valid reason (i.e. medical or family emergency documentation shall be required). In addition, the instructor MUST be notified PRIOR to the test or lab sitting. If this procedure is not followed the student will receive a mark of zero on the test/lab with no make-up option. 3. Re-writes are NOT allowed for any written assignment, quiz or test. 4. Repeats are NOT allowed for any shop test 5. Course attendance is mandatory. One percent (1 %) per hour will be

SAULT COLLEGE | 443 NORTHERN AVENUE | SAULT STE. MARIE, ON P6B 4J3, CANADA | 705-759-2554

Deducted from the final course grade for apprentices with more than 4 hours of unexcused* absence.

[Any absence without a written, valid reason will be deemed unexcused.]

Valid reasons would include:

Doctors note

Family Death or Serious Illness supported by a written note.

Course Outcomes and Learning Objectives:

Course Outcome 1	Learning Objectives for Course Outcome 1
<p>A curriculum that has been designed to: Provide a combination of theoretical knowledge and practical (hands on) skill in the safe use and operation of typical Semiautomatic Welding equipment (wire feed). To develop the clients welding skill to the point where he/she can pass the pre-qualified CWB plate test in the specified position.</p>	<p>1. Demonstrate by means of practical shop assignments, a sound working knowledge of both Personal and Shop Safety. - Potential Elements of the Performance: - identify proper work boots, gloves and eye protection - identify recommended fabrics and materials for personal protective clothing - identify and select proper shades of welding lenses - identify, select and adjust welding helmets for proper fit and vision - locate and identify shop lighting and ventilation switches - locate and identify emergency exits - understand procedures for evacuation of shop areas in the case of emergencies</p> <p>2. Demonstrate the ability to set up and operate a typical GMAW and MCAW/FCAW workstation. Potential Elements of the Performance: - identify proper eye, hand and face protection - identify proper footwear and clothing - identify potential fire, fume and explosion hazards associated with the Gas Metal Arc Welding process - briefly describe the differences between a constant current and a constant voltage welding machine - explain why a constant voltage machine is used for the GMAW process - identify electrode types, sizes according to CSA / AWS specification - identify various shielding gases and their potential use(s) - perform a routine inspection of assigned workstations to determine the - condition of wire feeder, cables, torch body, hoses and regulators - report / correct deficiencies prior to the commencement of work - describe procedures for setting shielding gas flow rate, voltage, wire feed speed and visible (electrode) stick-out distance. - describe techniques for arc ignition, setting gun angle and travel speeds</p> <p>3. Demonstrate the ability to perform GMAW and MCAW/FCAW procedures as well Identify and Correct Weld Defects. Potential Elements of the Performance: - produce fillet and groove welds on both thin gauge and thick</p>

metals in the Vertical and Over-head positions.

- perform adjustments to voltage and wire feed speed in accordance with the demands of base metal thickness and joint design
- change / replace rolls of electrode wire
- perform in-service adjustments to wire drive rolls, contact tip and nozzle

4. Demonstrate the level of skill required to pass a pre-qualified CWB Plate Test Assembly in the specified position

Potential Elements of the Performance:

- prepare test plate assemblies as per W47.1 specifications relating to:

- thickness, width and length dimensions
- root opening
- bevel angle
- number and location of bend test coupons
- class vs. class qualification
- weld the test plate assemblies as per W47.1 specifications relating to:

- number and location of stop / restarts

- weld bead sequence

- dimensions of completed weld

- acceptable vs. unacceptable visual defects

- prepare bend test coupons as per W47.1 specifications relating to:

- minimum coupon width

- minimum coupon thickness

- shape of flame cut edges and corners

- acceptable vs. unacceptable dimensions for test defects

- understand W47.1 specifications relating to:

- period of welder qualification

- conditions of welder qualification

- qualified welding process

5. Observe and understand the SAW process and equipment.

-Types of power sources

-Types of filler wires

-Shielding flux uses and types

Evaluation Process and Grading System:

Evaluation Type	Evaluation Weight
FCAW 1F	10%
FCAW 2F	10%
FCAW 3F	10%
FCAW 4F	10%
GMAW 3F Lap	10%
GMAW 3GF CWB	10%
GMAW 4F Lap	10%
GMAW 4GF CWB	10%

	MCAW 1F	7%
	MCAW 2F	7%
	SAW Quiz	6%

Date: July 25, 2019

Addendum: Please refer to the course outline addendum on the Learning Management System for further information.
