COURSE DESCRIPTION

This course provides the student with a comprehensive overview of the field of special education. Major emphasis is placed on the range of individual differences and on strategies for adapting educational programs to educationally different children.

COURSE PHILOSOPHY

"The person first, the handicap second". Foremost is conveyed the idea that each child is seen as a unique individual possessing both skills and needs which will affect his learning potential.

COURSE GOALS

This course is designed to help students develop an understanding of the abilities, disabilities and handicaps of the groups of children who are commonly classified as exceptional. The content encompasses many areas of exceptionality: physical, social, emotional and intellectual deviations. Prevalence statistics, etiologies, behavioural characteristics and educational needs of the individual child are presented.

COURSE OBJECTIVES

The student will demonstrate:

1. an understanding of the scope and history of the education of the handicapped, including current trends.

2. an understanding of the inter- and intra-individual differences found in children who are classified as exceptional.

3. a facility in expressing the appropriate terminology pertinent to the field of special education.

4. an ability to incorporate the behavioural and learning characteristics of the atypical child into an educational program.
5. a knowledge of the legal aspects of special education and local community services.

6. a knowledge of atypical growth patterns as compared to those of the "average" child.

7. an understanding of how to develop IPP's for the individual child.

ASSIGNMENTS:

Students will maintain a binder in which designated study questions at the end of each chapter in the text will be answered. Students will then exchange binders with an assigned partner to be marked. Following correction of the questions, partners will return each other's binder and discuss problems and solutions. The instructor will collect the binders from time to time in order to monitor student progress and to record marks received.
