The importance of the early childhood years is currently recognized by most professionals. The infant is seen as an individual with strengths and needs which are to be interpreted and promoted by the sensitive caregiver.

COURSE OBJECTIVES

1. To give the student an understanding of the physical and emotional needs of the individual infant and/or toddler in both their home and a group setting.

2. To enable the students to compare and evaluate some of the current theories in research in the field.

3. To develop a personal philosophy toward infant/toddler care and learning.

COURSE GOALS

The student will:

1. Demonstrate the ability to recognize and meet the physical and emotional needs of an individual infant and/or toddler, in both the home and the group setting.

2. Carry out a child study assignment involving observations and individual program plans.

In-depth study of accessible material will provide the basis for a discussion of the pros and cons of the chosen issue. A summary will emphasize the student's conclusions based on impartial judgements of research material. Students can collaborate on the debate material but must submit a separate paper elaborating on their own views for the summary.
