INTEGRATIVE SEMINAR III (ED 218)
Instructor: B. Browning

Prerequisite(s): ED 102, ED 104, ED 110, ED 116
Corequisite(s): ED 209, ED 201

COURSE DESCRIPTION

This weekly seminar gives students the opportunity to share ideas and theoretical concerns relative to field practice. Activities completed during field placement will form a basis for discussion. As a result the student will be better prepared for planning for children's learning.

GOALS

1. To consolidate previously learned teaching methods and to incorporate new approaches into a realistic philosophy.
2. To refine observation skills.
3. To successfully integrate the outlined fieldwork competencies for this semester by participation in class discussions.

OBJECTIVES

1. The student will maintain an accurate and on-going record of field work hours (not to include lunch hours). The time sheet and Progress Review Forms are to be signed and delivered to the College file upon completion of the field placement.
2. The student will demonstrate an understanding of appropriate teaching methods and activities for young children by describing relevant examples in class. Confidentiality and professionalism are to be maintained at all times.
3. Assigned observations will be completed in the placement setting and will be used for discussion purposes.

TEXT

Looking at Children, field experiences in child study; Goodman, Peck & Lehane; Humanics Ltd. 1980.
METHODOLOGY

Class discussions, observation assignments, and situational examples will be used to help the students incorporate appropriate teaching methods into practical applications. The student will learn to make relevant inferences from objective observations.

EVALUATION

Attendance and participation in seminar discussions is crucial to the integration of theory and practice. The student’s self-evaluation is an integral part of personal development as a professional.
