PHILOSOPHY/GOALS

This course will assist the learner to become more skillful in his/her ability to communicate with colleagues and clients in the Developmental Services Worker field. As a professional, it is imperative that one is able to relate and communicate with others in an effective manner.

The art of communication is a skill and the student will practice, as well as explore all facets of communications needed to be a professional in the DSW field. Self-exploration is critical to the learner as he/she can only discover their strengths and areas for improvement by critical self-appraisal of the experiential exercises. The process allows students to look inward as well as outward for the personal experiences that affect their communications with others.
