

COURSE OUTLINE: ELN229 - INST/PROCESS CONTROL

Prepared: Frank Musso

Approved: Corey Meunier, Chair, Technology and Skilled Trades

Course Code: Title	ELN229: INSTRUMENTATION/PROCESS CONTROL		
Program Number: Name	4026: ELECTRICAL TN-PROC 4029: ELECTRICAL TY-PROCES 4127: ELECTRICAL TN-TRADES		
Department:	ELECT./INSTRUMENTATION PS		
Semesters/Terms:	21F		
Course Description:	This course introduces the student to the principles of Instrumentation and Process Control. The measurement and control of process variables such as temperature, pressure, level and flow will be studied in detail and applied in the practical component of the course.		
Total Credits:	4		
Hours/Week:	5		
Total Hours:	75		
Prerequisites:	ELN100, ELR109		
Corequisites:	There are no co-requisites for this course.		
This course is a pre-requisite for:	ELR212, ELR320		
Vocational Learning	4026 - ELECTRICAL TN-PROC		
Outcomes (VLO's) addressed in this course:	VLO 1 Interpret and produce electrical and electronics drawings including other related documents and graphics.		
Please refer to program web page for a complete listing of program	VLO 2 Analyze and solve routine technical problems related to electrical systems by applying mathematics and science principles.		
outcomes where applicable.	VLO 3 Use, verify, and maintain instrumentation equipment and systems.		
	VLO 4 Assemble, test, modify and maintain electrical circuits and equipment to fulfill requirements and specifications under the supervision of a qualified person.		
	LO 6 Verify acceptable functionality and apply troubleshooting techniques for electrical and electronic circuits, components, equipment, and systems under the supervision of a qualified person.		
	VLO 7 Analyze, assemble and troubleshoot control systems under the supervision of a qualified person.		
	VLO 8 Use computer skills and tools to solve routine electrical related problems.		
	VLO 9 Assist in creating and conducting quality assurance procedures under the supervision of a qualified person.		
	VLO 10 Prepare and maintain records and documentation systems.		
	VLO 12 Apply health and safety standards and best practices to workplaces.		
	VLO 15 Assist in commissioning, testing and troubleshooting electrical power systems under		

In response to public health requirements pertaining to the COVID19 pandemic, course delivery and assessment traditionally delivered in-class, may occur remotely either in whole or in part in the 2021-2022 academic year.

ELN229: INSTRUMENTATION/PROCESS CONTROL

- the supervision of a qualified person.
- VLO 16 Select electrical equipment, systems and components to fulfill the requirements and specifications under the supervision of a qualified person.
- VLO 17 Apply project management principles to assist in the implementation of projects.

4029 - ELECTRICAL TY-PROCES

- VLO 1 Analyze, interpret, and produce electrical and electronics drawings, technical reports including other related documents and graphics.
- VLO 2 Analyze and solve complex technical problems related to electrical systems by applying mathematics and science principles.
- VLO 3 Design, use, verify, and maintain instrumentation equipment and systems.
- VLO 4 Design, assemble, test, modify, maintain and commission electrical equipment and systems to fulfill requirements and specifications under the supervision of a qualified person.
- VLO 6 Design, assemble, analyze, and troubleshoot electrical and electronic circuits, components, equipment and systems under the supervision of a qualified person.
- VLO₇ Design, install, analyze, assemble and troubleshoot control systems under the supervision of a qualified person.
- VLO 8 Use computer skills and tools to solve a range of electrical related problems.
- VLO9 Create, conduct and recommend modifications to quality assurance procedures under the supervision of a qualified person.
- VLO 10 Prepare reports and maintain records and documentation systems.
- VLO 12 Apply and monitor health and safety standards and best practices to workplaces.
- VLO 15 Design, commission, test and troubleshoot electrical power systems under the supervision of a qualified person.
- VLO 16 Select and recommend electrical equipment, systems and components to fulfill the requirements and specifications under the supervision of a qualified person.
- VLO 17 Apply project management principles to contribute to the planning, implementation. and evaluation of projects.

4127 - ELECTRICAL TN-TRADES

- VLO 1 Interpret and produce electrical and electronic drawings including other related documents and graphics.
- VLO 2 Analyze and solve routine technical problems related to electrical systems by applying mathematics and science principles.
- VLO 3 Use, verify, and maintain instrumentation equipment and systems.
- VLO 4 Assemble, test, modify and maintain electrical circuits and equipment to fulfill requirements and specifications under the supervision of a qualified person.
- Verify acceptable functionality and apply troubleshooting techniques for electrical VLO₆ and electronic circuits, components, equipment, and systems under the supervision of a qualified person.
- VLO 7 Analyze, assemble and troubleshoot control systems under the supervision of a qualified person.
- VLO 8 Use computer skills and tools to solve routine electrical related problems.

In response to public health requirements pertaining to the COVID19 pandemic, course delivery and assessment traditionally delivered in-class, may occur remotely either in whole or in part in the 2021-2022 academic year.

SAULT COLLEGE | 443 NORTHERN AVENUE | SAULT STE. MARIE, ON P6B 4J3, CANADA | 705-759-2554

ELN229: INSTRUMENTATION/PROCESS CONTROL

	VLO 9	Assist in creating and conducting quality assurance procedures under the supervision of a qualified person.			
	VLO 10	Prepare and maintain records and documentation systems.			
	VLO 12	Apply health and safety standards and best practices to workplaces.			
	VLO 15	Assist in commissioning, testing and troubleshooting electrical power systems under the supervision of a qualified person.			
	VLO 16	Select electrical equipment, systems and components to fulfill the requirements and specifications under the supervision of a qualified person.			
	VLO 17	Apply project management principles to assist in the implementation of projects.			
Essential Employability Skills (EES) addressed in	EES 1	Communicate clearly, concisely and correctly in the written, spoken, and visual form that fulfills the purpose and meets the needs of the audience.			
this course:	EES 2	Respond to written, spoken, or visual messages in a manner that ensures effective communication.			
	EES 3	3 Execute mathematical operations accurately.			
	EES 4	Apply a systematic approach to solve problems.			
	EES 5	Use a variety of thinking skills to anticipate and solve problems.			
	EES 6	Locate, select, organize, and document information using appropriate technology and information systems.			
	EES 7	Analyze, evaluate, and apply relevant information from a variety of sources.			
	EES 8	Show respect for the diverse opinions, values, belief systems, and contributions of others.			
	EES 9	Interact with others in groups or teams that contribute to effective working relationships and the achievement of goals.			
	EES 10	Manage the use of time and other resources to complete projects.			
	EES 11	Take responsibility for ones own actions, decisions, and consequences.			
Course Evaluation:	Passing Grade: 50%, D				
	A minimum program GPA of 2.0 or higher where program specific standards exist is required for graduation.				
Other Course Evaluation & Assessment Requirements:	· · · · · · · · · · · · · · · · · · ·				
	CR (Credit) Credit for diploma requirements has been awarded. S Satisfactory achievement in field /clinical placement or non-graded subject area. U Unsatisfactory achievement in field/clinical placement or non-graded subject area. X A temporary grade limited to situations with extenuating circumstances giving a stude

additional time to complete the requirements for a course. NR Grade not reported to Registrar's office. W Student has withdrawn from the course without academic penalty.

Books and Required Resources:

Lab Volt by Sault College Publisher: AK Graphics

Course Outcomes and Learning Objectives:

Course Outcome 1	Learning Objectives for Course Outcome 1		
Describe Instrumentation and Process Control and understand related terminology	1.1 Explain what Instrumentation is. 1.2 Explain what Process Control is. 1.3 Describe the major components of a process control loop. 1.4 Draw the block diagram of a process control loop. 1.5 Understand instrumentation units, symbols and terminology.(I.S.A.)		
Course Outcome 2	Learning Objectives for Course Outcome 2		
2. Understand temperature measurement, devices and applications	 2.1 Understand the difference between temperature and heat. 2.2 Convert from one temperature scale to another. 2.3 Describe the physical and operating characteristics of filled system thermometers, thermocouples, resistance temperature detectors and thermistors. 2.4 Calibrate and explain the operation of thermocouple and RTD transmitters 2.5 Describe methods of measuring temperature. 2.6 Select, install and calibrate temperature measurement devices 		
Course Outcome 3	Learning Objectives for Course Outcome 3		
3. Understand pressure measurement, devices and applications	3.1 Define the term fluids and fluid mechanics 3.2 Derive units of force, energy and pressure in SI and Englis units 3.3 Perform unit conversions and calculations 3.4 Define the term density, weight and specific gravity 3.5 Derive the relationship between mass density and weight density 3.6 Express pressure as equivalent liquid column 3.7 Differentiate between gauge pressure and absolute pressure 3.8 Describe methods of measuring pressure 3.9 Select install and calibrate pressure measurement devices		
Course Outcome 4	Learning Objectives for Course Outcome 4		
Understand level measurement, devices and applications	4.1 Describe the behaviour of fluids at rest 4.2 Express the fluid energy as head 4.3 Derive the relationships between pressure and elevation 4.4 Measure fluid pressure using manometers and gauges 4.5 Describe methods of measuring level 4.6 Select, install and calibrate level measurement device		
Course Outcome 5	Learning Objectives for Course Outcome 5		
5. Understand flow	5.1 Derive and apply continuity equation to size the pipes		

In response to public health requirements pertaining to the COVID19 pandemic, course delivery and assessment traditionally delivered in-class, may occur remotely either in whole or in part in the 2021-2022 academic year.

	measurement, devices an applications	5.2 Apply the concept of energy conversation to write Bernoulli's equation 5.3 Describe the working principles of variable head meters 5.4 Describe general flow equation for variable head meters 5.5 Calculate the flow rate of various fluids 5.6 Describe methods of measuring flow 5.7 Select, install and calibrate flow measurement devices		
	Course Outcome 6	Learning Object	Learning Objectives for Course Outcome 6	
	6. Understand characteristics of commo automatic control loops	n 6.2 Describe us closed loop con 6.3 Explain the 6.4 Apply patter 6.5 Determine p 6.6 Understand control modes	criteria for feedback control n recognition to analyze process responses proper methods to stabilize various processes on-off, proportional, integral and derivative ure, flow, level and temperature loops for	
Evaluation Process and Grading System:	Evaluation Type	Evaluation Weight		
	Assignments and guizes	10%		

Evaluation Type	Evaluation Weight
Assignments and quizes	10%
Labs	20%
Practical tests	20%
Written tests	50%

Date:

July 30, 2021

Addendum:

Please refer to the course outline addendum on the Learning Management System for further information.
