

COURSE OUTLINE: ELR216 - INTRO TO ROBOTICS

Prepared: Chris Beauchamp

Approved: Corey Meunier, Chair, Technology and Skilled Trades

Course Code: Title	ELR216: INTRODUCTION TO ROBOTICS
Program Number: Name	4026: ELECTRICAL TN-PROC 4029: ELECTRICAL TY-PROCES 4127: ELECTRICAL TN-TRADES
Department:	ELECT./INSTRUMENTATION PS
Semesters/Terms:	21F
Course Description:	This is an introductory course in industrial robotics fundamentals. Topics covered will include types of robots and their applications, cell design, safety and utilization of simulation/programming software. This course covers robotics and industrial automation fundamentals, including system configurations, applications, methods of power transmission, types of control, tooling and interfacing with peripherals. If time permits, students will develop and demonstrate basic programs for control of 6 axis robots developed in ABB RoboStudio Simulation program.
Total Credits:	2
Hours/Week:	2
Total Hours:	30
Prerequisites:	ELN210
Corequisites:	ELR232
Vocational Learning Outcomes (VLO's) addressed in this course:	<p>4026 - ELECTRICAL TN-PROC</p> <p>VLO 1 Interpret and produce electrical and electronics drawings including other related documents and graphics.</p> <p>VLO 8 Use computer skills and tools to solve routine electrical related problems.</p> <p>VLO 12 Apply health and safety standards and best practices to workplaces.</p> <p>VLO 13 Perform tasks in accordance with relevant legislation, policies, procedures, standards, regulations, and ethical principles.</p> <p>VLO 16 Select electrical equipment, systems and components to fulfill the requirements and specifications under the supervision of a qualified person.</p> <p>4029 - ELECTRICAL TY-PROCES</p> <p>VLO 1 Analyze, interpret, and produce electrical and electronics drawings, technical reports including other related documents and graphics.</p> <p>VLO 8 Use computer skills and tools to solve a range of electrical related problems.</p> <p>VLO 12 Apply and monitor health and safety standards and best practices to workplaces.</p> <p>VLO 13 Perform and monitor tasks in accordance with relevant legislation, policies, procedures, standards, regulations, and ethical principles.</p> <p>VLO 16 Select and recommend electrical equipment, systems and components to fulfill the</p>

Please refer to program web page for a complete listing of program outcomes where applicable.

In response to public health requirements pertaining to the COVID19 pandemic, course delivery and assessment traditionally delivered in-class, may occur remotely either in whole or in part in the 2021-2022 academic year.

requirements and specifications under the supervision of a qualified person.

4127 - ELECTRICAL TN-TRADES

- VLO 1 Interpret and produce electrical and electronic drawings including other related documents and graphics.
- VLO 8 Use computer skills and tools to solve routine electrical related problems.
- VLO 12 Apply health and safety standards and best practices to workplaces.
- VLO 13 Perform tasks in accordance with relevant legislation, policies, procedures, standards, regulations, and ethical principles.
- VLO 16 Select electrical equipment, systems and components to fulfill the requirements and specifications under the supervision of a qualified person.

Essential Employability Skills (EES) addressed in this course:

- EES 1 Communicate clearly, concisely and correctly in the written, spoken, and visual form that fulfills the purpose and meets the needs of the audience.
- EES 2 Respond to written, spoken, or visual messages in a manner that ensures effective communication.
- EES 4 Apply a systematic approach to solve problems.
- EES 5 Use a variety of thinking skills to anticipate and solve problems.
- EES 6 Locate, select, organize, and document information using appropriate technology and information systems.
- EES 7 Analyze, evaluate, and apply relevant information from a variety of sources.
- EES 8 Show respect for the diverse opinions, values, belief systems, and contributions of others.
- EES 9 Interact with others in groups or teams that contribute to effective working relationships and the achievement of goals.
- EES 10 Manage the use of time and other resources to complete projects.
- EES 11 Take responsibility for ones own actions, decisions, and consequences.

Course Evaluation:

Passing Grade: 50%, D

A minimum program GPA of 2.0 or higher where program specific standards exist is required for graduation.

Other Course Evaluation & Assessment Requirements:

Smart watches, smart phones and similar devices are not allowed during tests or quizzes and must be removed. Smart phones are not acceptable for use as a calculator during a test or quiz.

Grade
Definition Grade Point Equivalent
A+ 90 - 100% 4.00
A 80 - 89%
B 70 - 79% 3.00
C 60 - 69% 2.00
D 50 - 59% 1.00
F (Fail) 49% and below 0.00

CR (Credit) Credit for diploma requirements has been awarded.

In response to public health requirements pertaining to the COVID19 pandemic, course delivery and assessment traditionally delivered in-class, may occur remotely either in whole or in part in the 2021-2022 academic year.

SAULT COLLEGE | 443 NORTHERN AVENUE | SAULT STE. MARIE, ON P6B 4J3, CANADA | 705-759-2554

S Satisfactory achievement in field /clinical placement or non-graded subject area.
 U Unsatisfactory achievement in field/clinical placement or non-graded subject area.
 X A temporary grade limited to situations with extenuating circumstances giving a student additional time to complete the requirements for a course.
 NR Grade not reported to Registrar's office.
 W Student has withdrawn from the course without academic penalty.

Books and Required Resources:

Industrial Robotics Fundamentals by Larry Ross, Stephen Fardo, Michael Walach
 Publisher: G-W
 ISBN: 978-1-63126-941-7

Course Outcomes and Learning Objectives:

Course Outcome 1	Learning Objectives for Course Outcome 1
1. Understand various basic terminology and the concepts of robots.	1.1 Describe early robots and their role. 1.2 State the important developments in the evolution of robots. 1.3 List and explain the classifications of industrial robots. 1.4 Define two types of automation. 1.5 Discuss the role of robots in the workforce.
Course Outcome 2	Learning Objectives for Course Outcome 2
2. Understand the fundamentals of a robots and related equipment and their industrial applications.	2.1 Identify the five major parts of a robot. 2.2 Explain degrees of freedom as applied to robots. 2.3 Classify robots according to type of control systems and type of actuator drives. 2.4 Discuss the four basic configurations for robots. 2.5 Describe how robots are integrated into manufacturing process. 2.6 Discuss factors to consider in selecting the proper robot for a given task. 2.7 Identify applications where robots are used in industry. 2.8 Discuss the types of movements an end effector can perform. 2.9 Describe the types of end effector grippers and end effector tools. 2.10 Identify the benefits of changeable end effectors. 2.11 List important factors and desirable characteristics to be considered in the design of end effectors.
Course Outcome 3	Learning Objectives for Course Outcome 3
3. Understand the fundamentals of a robots and related equipment safety.	3.1 Discuss general safety practices for the student lab and work area. 3.2 Discuss safety practices related to robots and related equipment. 3.3 Describe guidelines, barriers, sensors, and overload protection for robotic safety as related to industry and the student lab environment.
Course Outcome 4	Learning Objectives for Course Outcome 4
4. Understand the fundamentals of robot programming.	4.1 Discuss the three generations in the evolution of programming for robots. 4.2 Identify classifications of robots according to the pattern of motion they use.

In response to public health requirements pertaining to the COVID19 pandemic, course delivery and assessment traditionally delivered in-class, may occur remotely either in whole or in part in the 2021-2022 academic year.

	<p>4.3 List the four programming methods for robots.</p> <p>4.4 Describe the use of high level programming languages for robots.</p> <p>4.5 Discuss the differences between hierarchical control and task level programming.</p> <p>4.6 Describe how voice recognition systems can be used with robots.</p> <p>4.7 Discuss ABB RobotStudio software as it applies to programming robots.</p>
Course Outcome 5	Learning Objectives for Course Outcome 5
5. Understand the fundamentals of robot electromechanical systems.	<p>5.1 Explain how sensing, timing, and control systems are used in the operation of robots.</p> <p>5.2 Discuss rotary motion systems used for robotics.</p> <p>5.3 Describe the characteristics of hydraulic and pneumatic systems.</p> <p>5.4 Discuss the characteristics of fluid flow.</p> <p>5.5 Discuss uses for hybrid power systems.</p>
Course Outcome 6	Learning Objectives for Course Outcome 6
6. Understand the fundamentals of maintaining a robotic system.	<p>6.1 Describe successful troubleshooting methods for robotic systems.</p> <p>6.2 Follow the proper techniques for general servicing of equipment.</p> <p>6.3 List the steps in developing a preventive maintenance plan.</p>

Evaluation Process and Grading System:

Evaluation Type	Evaluation Weight
Assignment 1	10%
Assignment 2	10%
Attendance and Quizzes	10%
Test 1	35%
Test 2	35%

Date: July 30, 2021

Addendum: Please refer to the course outline addendum on the Learning Management System for further information.

In response to public health requirements pertaining to the COVID19 pandemic, course delivery and assessment traditionally delivered in-class, may occur remotely either in whole or in part in the 2021-2022 academic year.
