Course Outcomes and Learning Objectives:

Course Outcome 1	Learning Objectives for Course Outcome 1
Upon successful completion of this course, the student will demonstrate the ability to: Interpret and revise specifications and drawings for a small commercial construction project.	Determine utility location and site features that affect electrical installations through the use of site drawings. Use architectural and structural drawings to determine methods of construction as they affect electrical installation. Use architectural and structural drawings to determine dimensions and elevations as they affect electrical installation. Use mechanical drawings to determine the electrical characteristics of mechanical equipment and systems. Use mechanical drawings to determine the layout of mechanical equipment and systems as they affect electrical installation. Select the correct wiring methods and electrical equipment for a commercial installation. Use a complete set of drawings and specifications to lay out commercial distribution and service equipment and wiring. Describe common lighting systems and their applications. Lay out commercial branch circuit wiring, lighting, and equipment using drawings and specifications. Use a complete set of drawings, specifications, manufacturers' drawings, ULC Standards, the National Building Code and the CEC to lay out a fire alarm system. Lay out a control system or a communication system as per drawings and specifications. Use a complete set of drawings, specifications, manufacturers' drawings, and the CEC to prepare a material take off. Prepare sketches to solve and document construction problems and solutions. Prepare as-built drawings to document electrical construction. Read and develop basic single line, schematic, and wiring diagrams

Evaluation Process and Grading System:
