Prepared: General Arts and Science Department

Approved: Martha Irwin, Chair, Community Services and Interdisciplinary Studies

<b>Course Code: Title</b>	LIB210: THE GREAT THINKERS (INTRO TO PHILOSOPHY)
<b>Program Number: Name</b>	1105: GAS - ONE-YEAR 1115: GAS-UNIV TRANSFER
<b>Department:</b>	GENERAL ARTS & SCIENCE
<b>Semesters/Terms:</b>	21F
<b>Course Description:</b>	This course traces the development of philosophical thought through eastern and western roots and focuses upon wisdom as its key concept. Wisdom concerns what is true and important and makes the gaining of knowledge not so much an objective but rather a means to applying what we have learned in a worthwhile manner in our lives. Thus, while you explore the likes of Plato, Aristotle, Kant, and Marx in terms of their historical context and philosophical differences, the subject matter will always be topical, accessible, and relevant. While the course necessarily introduces such concepts as the language of logic, metaphysics, dialectic technique, ethics, etc. and uses them in the analysis of different philosophical positions, all subjects are approached in a down-to-earth manner that in no way trivializes them, but rather demands student participation and the forging of connection between thought and action.
