

COURSE OUTLINE: BIO191 - BIOLOGY II

Prepared: Ashley Bernardo

Approved: Bob Chapman, Dean, Health

Course Code: Title	BIO191: BIOLOGY II FOR PADD				
Program Number: Name	3065: PRE-HEALTH DIP DGR				
Department:	PRE-HEALTH				
Academic Year:	2023-2024				
Course Description:	This course will enable the learner to continue to develop a foundation in the fundamental concepts of Biological Sciences and application to the systematic study of the human body. The learner will study and explore the following areas: molecular genetics, human anatomy & physiology for a variety of systems, including the nervous, endocrine, cardiovascular, respiratory, digestive, urinary, reproductive, lymphatic and immune systems, and an introduction to infectious organisms and the processes of infectious diseases. The learner will apply these concepts with a systemic approach to the study of the human body. In the context of the study of the various organ systems, the learner will be introduced to common pathologies with examples taken from current scientific research. The emphasis will be on understanding the underlying concepts and principles, and applying them to a diversity of body systems.				
Total Credits:	4				
Hours/Week:	4				
Total Hours:	56				
Prerequisites:	BIO190				
Corequisites:	There are no co-requisites for this course.				
Vocational Learning Outcomes (VLO's) addressed in this course: Please refer to program web page for a complete listing of program outcomes where applicable.	 WLO 1 Examine biological concepts, processes and systems of the human body, including genetics and epigenetics, as well as the structure, function and properties of the molecules of life, cells, tissues and organ systems in relation to homeostasis, physical development and health. WLO 3 Solve numeric problems and interpret data related to health sciences and other science-related fields using mathematical concepts, including algebra and probability, along with descriptive and inferential statistics. WLO 4 Use health sciences and other science-related language and terminology appropriately to communicate clearly, concisely, and correctly in written, spoken, and visual forms. WLO 6 Investigate health sciences and science-related questions, problems and evidence using the scientific method. 				
Essential Employability Skills (EES) addressed in this course:	 Communicate clearly, concisely and correctly in the written, spoken, and visual form that fulfills the purpose and meets the needs of the audience. Respond to written, spoken, or visual messages in a manner that ensures effective communication.

	3. The Digestive System.		Learning Objectives for Course Outcome 3 3.1 Explain the functions of the digestive system.			
			2.1 Describe the structure and function of the organs of respiration. 2.2 Describe the role of the respiratory system in maintaining homeostasis. 2.3 Define pulmonary ventilation and lung volumes. 2.4 Explain gas exchange using physical laws.			
	Course O	utcome 2	Learning Objectives for Course Outcome 2			
Course Outcomes and Learning Objectives:			Learning Objectives for Course Outcome 1 1.1 Describe the functions of the cardiovascular system. 1.2 Describe the structure and function of the wall of the heart. 1.3 Explain the initation and conduction of electrical impulses through the heart. 1.4 Follow the sequence of blood flow in the heart. 1.5 Define cardiac output. 1.6 Differentiate between different blood vessels. 1.7 Define blood pressure and the factors that can affect BP. 1.8 Identify major arteries and veins. 1.9 Describe the composition of whole blood and describe the function of the various components.			
Books and Required Resources:	Human Biology by Johnson Publisher: Pearson Lifetime eBooks Edition: 9th ISBN: 978013484085 eBook 9780135847435					
Course Evaluation:	Passing Grade: 50%, D A minimum program GPA of 2.0 or higher where program specific standards exist is required for graduation.					
	Science and Technology					
General Education Themes:			tor office own desirate, decisions, and consequences.			
	r	relationships and the achievement of goals.				
		EES 8 Show respect for the diverse opinions, values, belief systems, and contributions of others.				
	EES 7	EES 7 Analyze, evaluate, and apply relevant information from a variety of sources.				
		EES 6 Locate, select, organize, and document information using appropriate technology and information systems.				
	EES 5	Jse a variety of thir	nking skills to anticipate and solve problems.			
	EES 4 Apply a systematic approach to solve problems.

BIO191: BIOLOGY II FOR PADD Page 2

9. Genetic Inheritance	9.1 Describe Mendel's Theory of Inheritance. 9.2 Discuss probability and perform Punnett squares.			
Course Outcome 9	Learning Objectives for Course Outcome 9			
8. The Nervous System	 8.1 Name the divisions of the nervous system and describe their function. 8.2 Identify the types of neurons. 8.3 Identify neuroglia of the PNS and CNS. 8.4 Describe nervous tissue. 8.5 Explain the electrical nerve impulse and synapse. 8.6 Identify the anatomy of the spinal cord. 			
Course Outcome 8	Learning Objectives for Course Outcome 8			
7. Infectious Organisms.	7.1 Describe the basic characteristics of bacteria and identify common examples. 7.2 Describe the basic characteristics of viruses and identify common examples. 7.3 Describe the basic characteristics of parasites and identify common examples. 7.4 Describe the basic characteristics of fungi and identify common examples. 7.5 Discuss the role of infectious organisms in infectious diseases.			
Course Outcome 7	Learning Objectives for Course Outcome 7			
6. The Reproductive System.	6.1 Identify and describe the function of the organs of the male reproductive system. 6.2 Explain spermatogenesis. 6.3 Identify and describe the function of the organs of the female reproductive system. 6.4 Explain oogenesis and hormonal control. 6.5 Describe the female reproductive cycle and birth control.			
Course Outcome 6	Learning Objectives for Course Outcome 6			
5. The Immune System.	 5.1 Explain the functions of the lymphatic system. 5.2 Identify the normal flora of the human body. 5.3 Explain immune cell functions. 5.4 Explain innate and adaptive immune responses. 5.5 Discuss antigen presentation. 			
Course Outcome 5	Learning Objectives for Course Outcome 5			
4. The Urinary System.	 4.1 Explain the functions of the urinary system. 4.2 Identify the structures of the urinary system. 4.3 Describe the general processes of filtration, reabsorption, and secretion. 4.4 Discuss the regulation of the urinary system. 			
Course Outcome 4	Learning Objectives for Course Outcome 4			
	3.2 Identify the organs and the accessory organs of the gastrointestinal tract.3.3 Describe the histology of the wall of the GI tract.3.4 Identify the digestive enzymes and explain their action.3.5 Explain the regulation of digestion.			

SAULT COLLEGE | 443 NORTHERN AVENUE | SAULT STE. MARIE, ON P6B 4J3, CANADA | 705-759-2554

BIO191: BIOLOGY II FOR PADD Page 3

	9.3 Utilize dihybrid crosses. 9.4 Explain Non-Mendelian Inheritance. 9.5 Identify various genetic disorders.				
Evaluation Process and Grading System:	Evaluation Type	Evaluation Weight			
	Final Exam	20%			
	Midterm Exam	20%			
	Tests (4)	60%			
Date:	May 9, 2024				
Addendum:	Please refer to the course outline addendum on the Learning Management System for further information.
