

COURSE OUTLINE: ARL204 - WLDRNSS ADV FIRS AID

Prepared: L. Foster

Approved: Karen Hudson, Dean, Community Services and Interdisciplinary Studies

Course Code: Title	ARL204: WILDERNESS ADVANCED FIRST AID					
Program Number: Name	5212: ADVENTURE RECREATION					
Department:	NATURAL RESOURCES PRG					
Academic Year:	2024-2025					
Course Description:	Wilderness Advanced First Aid is comprehensive medical training designed for remote professionals or wilderness leaders who venture into remote and challenging environments. Wilderness Medicine differs significantly from standard first aid courses and other training that are oriented toward urban environments. This course teaches how to manage medical emergencies when hospitals and rescue services may not be available for an extensive time period. We prepare students for emergency situations that involve prolonged patient care, severe environments, and improvised equipment. This course is delivered in partnership with Wilderness Medical Associates.					
Total Credits:	3					
Hours/Week:	43					
Total Hours:	43					
Prerequisites:	There are no pre-requisites for this course.					
Corequisites:	There are no co-requisites for this course.					
Vocational Learning Outcomes (VLO's) addressed in this course:	5212 - ADVENTURE RECREATION VLO 1 Demonstrate clear, concise and industry appropriate written, spoken and visual communication skills.					
Please refer to program web page for a complete listing of program outcomes where applicable.	VLO 2 Identify, discuss, organize and assess common Flora & Fauna species found throughout ON, including biological and physiological characteristics.					
	4 Identify and evaluate the requirements for leading and participating in expeditions or field exercises using a variety of Adventure Recreation activities.					
	LO 7 Describe the scientific method and how it shapes our understanding of the ecology of the natural world.					
	VLO 9 Safely operate and maintain equipment used in Adventure Recreation and Park operations.					
	VLO 10 Evaluate and apply current technologies and mathematical concepts used to collect, manage and analyze data.					
	LO 11 Analyze, evaluate and apply subjective and objective safety considerations for Adventure Recreation and Parks activities.					
Essential Employability Skills (EES) addressed in	EES 1 Communicate clearly, concisely and correctly in the written, spoken, and visual form that fulfills the purpose and meets the needs of the audience.					
this course:	EES 2 Respond to written, spoken, or visual messages in a manner that ensures effective communication.					

SAULT COLLEGE | 443 NORTHERN AVENUE | SAULT STE. MARIE, ON P6B 4J3, CANADA | 705-759-2554

ARL204: WILDERNESS ADVANCED FIRST AID

EES 3 Execute mathematical operations accurately. EES 4 Apply a systematic approach to solve problems. EES 5 Use a variety of thinking skills to anticipate and solve problems. EES 6 Locate, select, organize, and document information using appropriate technology and information systems. EES 7 Analyze, evaluate, and apply relevant information from a variety of sources. EES 8 Show respect for the diverse opinions, values, belief systems, and contributions of others. EES 9 Interact with others in groups or teams that contribute to effective working relationships and the achievement of goals. EES 11 Take responsibility for ones own actions, decisions, and consequences. Course Evaluation: Satisfactory/Unsatisfactory & A minimum program GPA of 2.0 or higher where program specific standards exist is required for graduation. Interviews Exams Assignments Demonstration of skills Course Outcomes and Learning Objectives for Course Outcome 1 1. Determine the general principals of wilderness first aid Course Outcome 2 2. Understanding of critical body systems 2.2 Describe the circulatory systems 2.3 Describe the respiratory systems 2.4 Describe the Nervous systems 2.5 Diagnose anticipated problems associated with the critical body systems and treatment of critical systems 3. Recognizing problems and treatment of critical systems 3. Identify for common allitude and water related injuries and associated treatment 3. A Assess Lightning, toxin, envenomation and disease vectors and and sasociated treatment 3. A Assess Lightning, toxin, envenomation and disease vectors and and secondary and associated treatment 3. A Assess Lightning, toxin, envenomation and disease vectors and associated treatment 3. A Assess Lightning, toxin, envenomation and disease vectors and associated treatment 3. A Sassociated treatment 3. A Sassociated treatment 3. A Sassociated treatment 3. A Sassociated treatment							
EES 5 Use a variety of thinking skills to anticipate and solve problems. EES 6 Locate, select, organize, and document information using appropriate technology and information systems. EES 7 Analyze, evaluate, and apply relevant information from a variety of sources. EES 8 Show respect for the diverse opinions, values, belief systems, and contributions of others. EES 9 Interact with others in groups or teams that contribute to effective working relationships and the achievement of goals. EES 10 Manage the use of time and other resources to complete projects. EES 11 Take responsibility for ones own actions, decisions, and consequences. Course Evaluation: Satisfactory/Unsatisfactory & A minimum program GPA of 2.0 or higher where program specific standards exist is required for graduation. Interviews Exams Assessment Requirements: Course Outcomes and Learning Objectives: Course Outcome 1 1. Determine the general principals of wilderness first aid 1. Determine the general principals of wilderness rescue 1.3 Patient assessment 1.4 Prepare SOAP notes 2. Understanding of critical body systems 2.2 Describe the respiratory systems 2.3 Describe the respiratory systems 2.4 Describe the respiratory systems 2.5 Diagnose anticipated problems associated with the critical body systems Course Outcome 3 3. Recognizing problems and treatment of critical systems 3. A lidentify common environmental injuries and associated treatment 3. A Explain common altitude and water related injuries and associated treatment 3. Seplain common altitude and water related injuries and associated treatment 3. A Resposs Lighthing, toxin, envenomation and disease vectors		EES 3	Execute mathematical operations accurately.				
EES 6 Locate, select, organize, and document information using appropriate technology and information systems. EES 7 Analyze, evaluate, and apply relevant information from a variety of sources. EES 8 Show respect for the diverse opinions, values, belief systems, and contributions of others. EES 9 Interact with others in groups or teams that contribute to effective working relationships and the achievement of goals. EES 10 Manage the use of time and other resources to complete projects. EES 11 Take responsibility for ones own actions, decisions, and consequences. Course Evaluation: Satisfactory/Unsatisfactory A minimum program GPA of 2.0 or higher where program specific standards exist is required for graduation. Interviews Exams Assignments Demonstration of skills Course Outcomes and Learning Objectives: Course Outcome 1 1. Determine the general principals of wilderness first aid 1.1 Determine the general principals of wilderness rescue 1.3 Patient assessment 1.4 Prepare SOAP notes Course Outcome 2 2. Understanding of critical body systems 2.2 Describe the respiratory system 2.4 Describe the respiratory system 2.5 Diagnose anticipated problems associated with the critical body systems Course Outcome 3 3. Recognizing problems and treatment of critical systems 2. Describe to rourse Outcome 3 3. Recognizing problems and treatment of critical systems 3.1 Identify common environmental injuries and resament associated treatment 3.2 Anticipate common thermoregulation and cold injuries and associated treatment 3.3 Explain common altitude and water related injuries and associated treatment 3.3 Explain common altitude and water related injuries and associated treatment 3.4 Assess Lighthing, toxin, envenomation and disease vectors.		EES 4					
and information systems. EES 7 Analyze, evaluate, and apply relevant information from a variety of sources. EES 8 Show respect for the diverse opinions, values, belief systems, and contributions of others. EES 9 Interact with others in groups or teams that contribute to effective working relationships and the achievement of goals. EES 10 Manage the use of time and other resources to complete projects. EES 11 Take responsibility for ones own actions, decisions, and consequences. Satisfactory/Unsatisfactory & A minimum program GPA of 2.0 or higher where program specific standards exist is required for graduation. Interviews Exams Assignments Demonstration of skills Course Outcomes and Learning Objectives: Course Outcomes and Learning Objectives: Course Outcome 1 1. Determine the general principals of wilderness first aid 1. Determine the general principals of wilderness rescue 1.3 Patient assessment 1.4 Prepare SOAP notes Course Outcome 2 2. Understanding of critical body systems 2.2 Describe the respiratory system 2.5 Diagnose anticipated problems associated with the critical body systems Course Outcome 3 3. Recognizing problems and treatment of critical systems 2.3 Assess Lighting, toxin, envenomation and disease vectors 3.4 Assess Lighting, toxin, envenomation and disease vectors.
