

## COURSE OUTLINE: MPT200 - AUTO FUEL/EMISSIONS

Prepared: Stephen Kent

Approved: Corey Meunier, Dean, Technology, Trades, and Apprenticeship

Course Code: Title	MPT200: AUTO ALTERNATE/CONVENT.FUEL & EMISSIONS		
Program Number: Name	4044: MOT POWER ADV REPAIR		
Department:	MOTIVE POWER		
Academic Year:	2024-2025		
Course Description:	This course will compare ethanol flex fuel systems to conventional gasoline fuel injection and other alternate hydrocarbon fuel systems. Emission testing will be performed, analyzed and compared to current legislated standards. Students will use industry standard electronic and mechanical test equipment. You will have a sound understanding of fuel injection and emission systems operation, diagnosis and repair.		
Total Credits:	3		
Hours/Week:	6		
Total Hours:	42		
Prerequisites:	MPF103, MPF124		
Corequisites:	There are no co-requisites for this course.		
Vocational Learning Outcomes (VLO's) addressed in this course:  Please refer to program web page for a complete listing of program outcomes where applicable.	<ul> <li>4044 - MOT POWER ADV REPAIR</li> <li>VLO 1 Analyse, diagnose, and solve various motive power system problems by using problem-solving and critical thinking skills and strategies and by applying fundamental knowledge of motor vehicle operation, components, and their interrelationships.</li> <li>VLO 4 Diagnose and repair electrical, electronic, personal safety, and emission components and systems in compliance with manufacturer's recommendations.</li> <li>VLO 7 Disassemble and assemble components to required specifications by applying workshop skills and knowledge of basic shop practices.</li> <li>VLO 8 Select and use a variety of troubleshooting techniques and test equipment to assess electronic circuits, vehicle systems, and subsystems.</li> <li>VLO 10 Communicate information effectively, credibly, and accurately by producing supporting documentation to appropriate standards.</li> <li>VLO 11 Use information technology and computer skills to support work in a motive power environment.</li> <li>VLO 16 Complete all assigned work in compliance with occupational, health, safety, and environmental law; established policies and procedures; codes and regulations; and in accordance with ethical principles.</li> </ul>		
Essential Employability Skills (EES) addressed in this course:	<ul> <li>EES 1 Communicate clearly, concisely and correctly in the written, spoken, and visual form that fulfills the purpose and meets the needs of the audience.</li> <li>EES 2 Respond to written, spoken, or visual messages in a manner that ensures effective communication.</li> </ul>		

SAULT COLLEGE | 443 NORTHERN AVENUE | SAULT STE. MARIE, ON P6B 4J3, CANADA | 705-759-2554

MPT200: AUTO ALTERNATE/CONVENT.FUEL & EMISSIONS

	EES 4 App	Apply a systematic approach to solve problems.				
	EES 5 Use	a variety of thin	nking skills to anticipate and solve problems.			
	EES 7 Analyze, evaluate, and apply relevant information from a variety of sources.					
	EES 8 Show respect for the diverse opinions, values, belief systems, and contributions of others.					
			in groups or teams that contribute to effective working e achievement of goals.			
	EES 10 Mar	nage the use of	age the use of time and other resources to complete projects.			
	EES 11 Tak	e responsibility	for ones own actions, decisions, and consequences.			
Course Evaluation:	Passing Grade: 50%, D					
	A minimum program GPA of 2.0 or higher where program specific standards exist is required for graduation.					
Other Course Evaluation &	The following semester grades will be assigned to students:					
Assessment Requirements:	Grade Definition Grade Point Equivalent A+ 90 - 100% 4.00 A 80 - 89% B 70 - 79% 3.00 C 60 - 69% 2.00 D 50 59% 1.00 F (Fail)49% and below 0.00					
	S Satisfactory U Unsatisfactory X A temporary additional time NR Grade not	achievement in ory achievement grade limited to to complete the reported to Reg	requirements has been awarded. field /clinical placement or non-graded subject area. in field/clinical placement or non-graded subject area. o situations with extenuating circumstances giving a student erequirements for a course. instrar's office. In the course without academic penalty.			
Books and Required Resources:	Automotive Technology: A Systems Approach by Erjavec Restole Publisher: Thomson Nelson Learning Canada Edition: 4th Canadian Edition ISBN: 9780176501679					
Course Outcomes and	Course Outc	ome 1	Learning Objectives for Course Outcome 1			
Learning Objectives:		es, styles and gasoline fuel	Describe the construction and operation of fuel delivery systems     Describe the construction and operation of multiport and direct injection systems     Describe the purpose, construction and operation of primary fuel metering input and output devices     Explain fuel metering modes of operation     Describe OBDII modes and trouble code structure			
	Course Outcome 2		Learning Objectives for Course Outcome 2			

	Perform diagnostic procedures on fuel delivery systems		Identify and utilize appropriate personal protection and safety precautions when servicing automotive fuel systems     Perform testing procedures to isolate problems with fuel pumps, regulators, injectors, filters, tanks and lines     Perform injector balance testing     Perform testing procedures for water and alcohol fuel contamination		
	Course Outcome 3	3	Learning (	Objectives for Course Outcome 3	
	Perform diagnostic procedures on fuel injection electronic control systems		to access ginformation     Read,     Acces     Acces	diagnose and clear OBDII trouble codes s and interpret live data stream information s non continuously monitored test results -directional communications to operate and test	
	Course Outcome 4		Learning Objectives for Course Outcome 4		
Identify and test emission control components			control sys     Identif     Use el system fail     Perfor     Perfor	y emission control devices ectronic test equipment to diagnose emission control	
	Course Outcome 5		Learning Objectives for Course Outcome 5		
Alternate fuels		Describe fuel injection system requirements for E-85 flex fuel vehicles     Explain the difference in fuel metering requirements for ethanol fuel blends     Describe the construction and operation of propane and natural gas fueled fuel systems			
Evaluation Process and Grading System:	Evaluation Type	Evaluation Weight			
	Assignments	10%			
	Employability Skills	10%			

Evaluation Type	<b>Evaluation Weight</b>
Assignments	10%
Employability Skills	10%
Shop	45%
Tests	35%

Date:

June 4, 2024

Addendum:

Please refer to the course outline addendum on the Learning Management System for further information.
